

INDONESIAN FISHERIES BOOK

2009

MINISTRY OF MARINE AFFAIRS AND FISHERIES
JAPAN INTERNATIONAL COOPERATION AGENCY

PREFACE

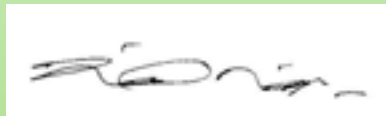

Praised thanks to God Almighty, who gave the blessing and his gift so as to be able to be completed the Indonesian Fisheries Book 2009 in order to bring about Pro-poor, Pro-job, and Pro-growth that was results of the co-operation between MMAF and JICA.

The Indonesian Fisheries Book is very practical and informative for stakeholders both that has directly active with the world of fisheries and for that was general. The Indonesian Fisheries Book 2009 not only consist of profile MMAF, Indonesian fisheries statistical methodology, international cooperation list, but also the structure of the MMAF organization with matched the newest data.

We conscious this book is undequade due to get comprehensive fisheries and marine information, therefore indeed we hope constructive suggestion from reader. So that the fisheries Book 2009 become more adequate as a book reference for central, province, regencies government and also private sector while developing of fisheries and marine sector in the future.

Jakarta, April 2009

1. PROFILE OF MMAF

1.1 History of MMAF

Marine sector in Indonesia we can say, is still under developed, despite of the nation's rich marine and fisheries resources and vigorous potential in relevant development. The resources consist of renewable resources, like fisheries resources, capture fisheries and also marine and coastal culture, non-conventional energy and un-renewable resources, such as gases and oils and various kinds of minerals. Besides the two types of resources, there are many kinds of marine environmental services can be upgraded to enhance fisheries and marine development, for example: maritime tourism, maritime industry, shipping/transportation service, etc. By these reasons, the President Abdurrahman Wahid, with Presidential Decree No.355/M Year 1999 in Period of Cabinet 1999-2004, constituted Ir. Sarwono Kusumaatmaja as Minister of Marine Exploration.

Afterward, the constitution has been followed by the forming of The Minister of Marine Exploration (Departemen Eksplorasi Laut - DEL) along with detail of its duty function through Presidential Decree No. 136 Year 1999 about Domiciling, Duty, Function, Organizational Formation, and Departmental Administration. In the reality, the usage of DEL nomenclature did not last longer because of the pursuant from DPR and various parties have changed, the reeling of the Ministry of Marine Exploration to become the Ministry of Marine Exploration and Fisheries pursuant to Presidential Decree No. 145 Year 1999. Then, the Ministry of Marine Exploration (DEL) nomenclature became the Ministry of Marine Exploration and Fisheries (Departemen Eksplorasi Laut dan Perikanan) through Presidential Decree No. 147 Year 1999.

Then, the changes of cabinet formation happened after the Annual Conference of MPR in 2000, and the nomenclature of DELP become the Ministry of Marine Affairs and Fisheries (Departemen Kelautan dan Perikanan - DKP) according to Presidential Decree No. 165 Year 2000 about Domiciling, Duty, Function, Authority, Organizational Formation, and Departmental Administration.

With regard to the realization of its main duties and functions, MMAF organizational structure consists of 8 (eight) Echelon I working units, as stated in the President Regulation No. 10/2005 concerning Organization Unit and Echelon 1 Duty, Ministry of Republic Indonesia.

Based on the Presidential Decree No. 9 Year 2005 about Domiciling, Duty, Function, Structure Organization and Ministry's Working Management Republic of Indonesia, changed with Presidential Decree No. 94 Year 2006, the structure of Ministry of Marine Affairs and Fisheries (MMAF) become : a. Minister of Marine Affairs and Fisheries; b. Secretary General; c. Inspectorate General; d. Directorate General (DG) of Capture Fisheries; e. DG. of Aquaculture; f. DG. of Marine and Fisheries Resources Surveillance and Controlling; g. DG. of Fisheries Product Processing and Marketing; h. DG. of Marine, Coastal and Small Islands; i. Agency for Marine and Fisheries Research; j. Agency for Marine and Fisheries Human Resources Development; k. Minister Expert Staff.

1.2. Vision and Mission

a. Vision

The Management of marine and fishery resources which is sustainable and carried out with high responsibility for the objective of national unity and welfare.

b. Mission

1. To increase the welfare of catch and culture fishermen, and other businessmen in marine and fisheries.
2. To increase the role of marine and fisheries as the agent of economic growth.
3. To maintain the loading capacity and to increase the environmental quality of the marine and fishery resources.
4. To heighten the people intelligence and health condition through increasing of fish consumption.
5. To boost the roles of sea as a nation unifying factor as well as fostering marine based tradition and culture.

1.3. Marine and Fisheries Development

Marine and Fisheries Development in National Development Priority

National Development Priority - 1 is :

Increase basic service and rural development with target on community economy such as increase of economy, social, culture empowerment of fisheries stakeholders and coastal communities.

National Development priority - 3 is :

Acceleration of quality growth with strengthen the economy resistance which supported by development of agriculture, infrastructure and energy with growth target around 5 %.

1.4. Strategy, Policy and Program

a. Strategy

To achieve the objectives and targets in marine and fisheries development, the development strategy is prepared to include the following steps:

1. The development of marine and fisheries will be implemented in transparency and high accountability with regard to creating the good and clean government, which is reflected in various public services and programs implementation to achieve the mid-term strategy goals.
2. The utilization of marine and fisheries potency for community welfare, which will be reflected in various regulations along with national necessities based on the 3 (three) main

3. The marine and fisheries development will be implemented with the concern to the principles of justice and even distribution among regions, the decrease of underdevelopment and gap, and also the strong priority on the development of small islands at remote boundaries as an important part of the unity sovereignty of Indonesia.

b. Policy

With regard to achieving its vision and missions, the Ministry of Marine Affairs and Fisheries has released some policies concerning mid-term development plan based on the 3 (three) main directions of the national development, as follows:

1. To develop the business scale capacity of fishers, fish farmer and other stakeholders of marine and fisheries.
2. To develop the competitive and environmental conception of aquaculture.
3. To strengthen and develop the national capture fisheries business in efficiently, sustainable and community based.
4. To develop and strengthen the industry of handling, processing and product marketing.
5. To develop the sustainable and community based of small islands.
6. To increase rehabilitation and conservation of marine and fisheries resources.
7. To strengthen the surveillance and control of the utilization of marine and fisheries resources.
8. To increase the tackling efforts on illegal fishing.
9. To develop education, training and extension.
10. To strengthen of research, knowledge and technology of marine and fisheries.

C. Program

To achieve objectives which are appropriate with formulated strategy and policy, the marine and fisheries development programs are:

1. Program of empowerment to fishers as well as fish farmer and other actors of marine and fisheries business. This program includes credit supplying for small, micro and medium scales of business, increasing the capacity of small business starting from production, processing until marketing, direct assisting in basic infrastructures equipping, Fuel (BBM) distribution guarantee, and price subsidizing based on national policy.
2. Program of marine and fisheries resources development and management. This program covers fisheries revitalization, integrated fisheries industry development focused on tuna, shrimp and seaweed.
3. Program of marine and fisheries resources conservation and controlling.

1.5. Key Performance Indicator

a. Output

1. The increase of fisheries production from estimation 10.18 million MT on 2008 become 12.73 million MT on 2009 with production of processing product from estimation 3.6 million ton on 2008 become 4.0 million ton on 2009.
2. Increase of fisheries product export from estimation US\$ 2.6 billion in year 2008 become US\$ 2.8 billion in year 2009.
3. Increase the average of domestic consumption of fish from estimation 28.00 kg/capita/year in year 2008 become 30.17 kg/capita/year in year 2009.
4. The scope of community empowerment program 16 % from poor coastal community population or around 850,000 persons, including women empowerment around 350,000 persons.
5. Increase the number of regency/city which implementing management of integrated coastal community zone around 40 % from year 2008.
6. Increase the scope of operation area of surveillance vessel and the ability of surveillance human resources and control the marine and fisheries resources in order to tackle IUU Fishing around 15 %.
7. Increase of marine and fisheries human resources quality around 4,500 persons and increase of fisheries extension for 8,000 persons.
8. Increase the fish processing unit (UPI) utility from estimation 60 % in year 2008 become 70 % in year 2009.
9. The availability of accurate and current statistic data and marine and fisheries information in 33 provinces.
10. Increase of marine and fisheries research resources and utilization of 10 dissemination packets of knowledge and technology (IPTEK) with community based.

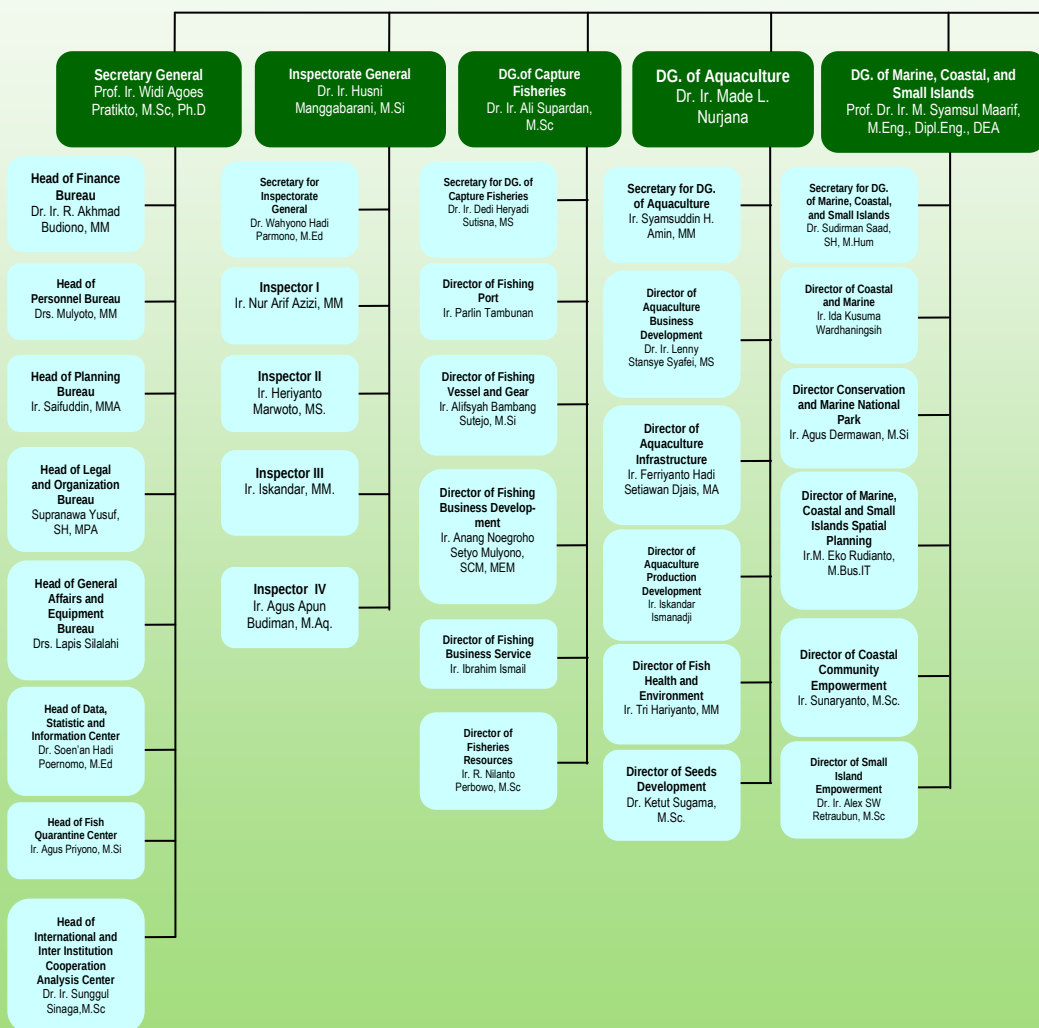

b. Outcome

1. Increase the average income of fishers, fish culturist, and other coastal communities from estimation Rp. 1.25 million/person/month in year 2008 become Rp. 1.50 million/person/month in year 2009.
2. Increase the availability of cumulative working opportunity from 8.94 million persons in year 2008 become 10.02 million persons in year 2009.
3. Increase of fisheries GDP contribution on national GDP without oil and gas (not include processing) from 2.67 % in year 2008 become 2.85 % in year 2009

2. PERFORMANCE AND STATISTIC OF INDONESIA FISHERIES

2.1 General Illustration of Indonesian Fisheries

Indonesia has a large maritime zone, some 5.8 Km² consisting of archipelagic waters, territorial seas, and Exclusive Economic Zones. Its coastline is more than 81,000 km long. Its sustainable fisheries (MSY) of all kinds are about 6.4 millions MT a year while its total allowable catch (TAC) is estimated at 80% amounting to about 5.12 million MT annually. In addition, there are also great potentials for aquaculture, inland openwater fisheries as well as the development of marine biotechnology.

Table 1. Fisheries Production, 2002-2007 (MT)

Production	2002	2003	2004	2005	2006	2007	Increasing Average 2006 - 2007 (%)
TOTAL	5,515,648	5,915,988	6,119,731	6,869,543	7,488,709	8,238,302	10.01
CAPTURE FISHERIES	4,378,495	4,691,796	4,651,121	4,705,869	4,806,112	5,044,737	4.97
Marine Fish	4,073,506	4,383,103	4,320,241	4,408,499	4,512,191	4,734,280	4.92
Inland Openwater	304,989	308,693	330,880	297,370	293,921	310,457	5.63
AQUACULTURE	1,137,153	1,224,192	1,468,610	2,163,674	2,682,597	3,193,565	19.05
Marine Aquaculture	234,859	249,242	420,919	890,074	1,365,918	1,509,528	10.51
Pond	473,128	501,977	559,612	643,975	629,610	933,832	48.32
Inland Openwater	429,166	472,973	488,079	629,625	687,069	750,204	9.19

Source: DG. of Capture Fisheries and DG of Aquaculture, MMAF, 2008

Indonesian national fisheries production grow continuously at an average annual rate of 8.40%, e.q. 5.52 million MT in 2002 to about 8.24 million MT in 2007.

As for the capture fisheries product, it increases annually at a mean rate of 2.91%, e.q. about 4.38 million MT in 2002 to about 5.04 million MT in 2007. A big improvement happens to the aquaculture fisheries product, it experiences an annual increase of about 23.60%, the product was about 1.14 million MT in 2002 to about 3.19 million MT in 2007.

The export of fisheries product was about 0.57 million MT in 2002 to about 0.85 million MT in 2007, i.e. fluctuated around the annual average of 10.42%. One the other hand, the import of fisheries product was about 0.12 million MT in 2002 to about 0.15 million MT in 2007, that means it fluctuated around the annual average of 4.99%.

Viewing at the increases in product with rather constant amounts of import and export, it should be interpreted that the domestic consumption of fisheries product increased from year to year. Total national fish supply for consumption in 2007 is around 6.38 million MT, i.e. is around 28.28 kg/capita/year.

2.2. Indonesian Capture Fisheries

Marine :

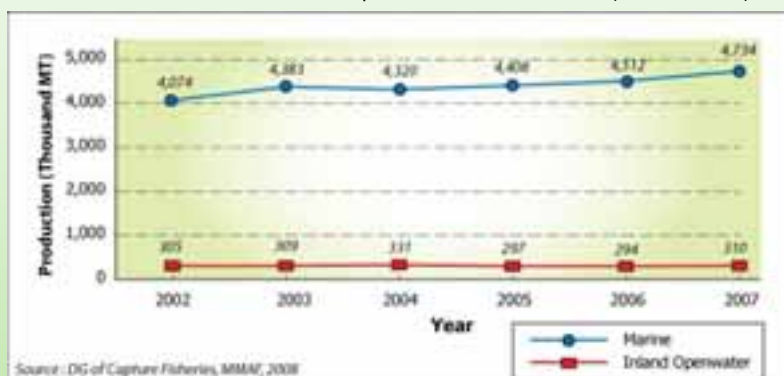

- Area = 5.8 million Km²
- Maximum Sustainable Yield (MSY) = 6.4 million MT/year
- Total Allowable Catch (TAC) = 5.12 million MT/year (80% MSY)
- Production = 4.73 million MT (92.38% MSY)*

Inland Openwater :

- Area = 5.4 million Ha (Lake & Reservoir 3.9%; Swamp 71.6%; Riverine 22.1%)
- Potential (1985) = 0.9 million MT/year
 - ⇒ BRKP's revision (2004) = 4.95 million MT/year
 - ⇒ With Stock Enhancement = 6.4 million MT/year
- Production = 0.31 million MT*

* Data 2007

Picture 2. Trend of Indonesian Capture Fisheries Production (Thousand MT)

In year 2007, Indonesian capture fisheries yield was 5.04 million MT, including the marine capture fisheries of 4.73 million MT and the inland openwater capture fisheries of 0.31 million MT.

Table 2. Indonesian Marine Capture Fisheries Production by Major Fish (MT)

Major Commodities	2002	2003	2004	2005	2006	2007
Total	4,073,506	4,383,103	4,320,241	4,408,499	4,512,191	4,734,280

Source : DG. of Capture Fisheries , MMAF, 2008

Indonesia marine capture fisheries production in year 2007 was about 4.73 million MT. In which the bigger production were Eastern little tunas (0.400 million MT), Skipjack tunas (0.302 million MT) and Tunas (0.192 million MT). Indonesian inland openwater capture fisheries production in year 2007 was about 0.31 million MT of which the bigger production were Snakehead murrel (30.3 thousand MT), Mozambique tilapia (11.2 thousand MT) and Common carp (9.1 thousand MT).

Table 3. Inland Openwater Capture Production by Major Fish, 2002-2007 (MT)

Fish	2002	2003	2004	2005	2006	2007

2.3. Indonesian Aquaculture

a. Aquaculture Area

In Indonesia the extent of areas with aquaculture potential is around 11.81 million hectares, consisting of 2.22 million hectares with potential for freshwater aquaculture, 1.22 million hectares with potential for brackishwater aquaculture and 8.36 million hectares with marine culture potential. Currently, exploitation of this potential has only reached 10.14 % for freshwater aquaculture, 36.99 % for brackishwater aquaculture and 1.01 % for marine culture.

Table 9. Total Potency of Indonesian Aquaculture Areas, 2007

No	Aquaculture Areas	Total Potential Areas*) (Ha)	Total Used Areas (Ha)	Probability for Areas Development (Ha)
TOTAL		11,806,392	762,320	11,044,072

Note : *) Based on Revitalization of Aquaculture 2006-2009, published in 2005.

Source : DG of Aquaculture, MMAF, 2008

b. Aquaculture fisheries production

The total national aquaculture production in 2007 was 3.19 million MT. Which is still low if derided the potential area which is available for aquaculture. Therefore there is still great potential for growth in terms of area.

Picture 5. Trend of Indonesian Aquacultures Production by Waters

Source : DG of Aquaculture, MMAF, 2008

The bigger aquaculture productions in 2006 were seaweed (1.73 million MT), second is shrimp (0.36 million MT), Common carp (0.264 million MT), Milk fish (0.263 million MT), Nile tilapia (0.207 million MT), Java barb (0.092 million MT), Cat fishes (0.037 million MT), Giant Gouramy (0.036 million MT) and Shells (0.016 million MT).

The main producing area are East Nusa Tenggara Province for marine culture (504,709 MT), South Sulawesi Province for brackishwater (297,677 MT) and West Java Province for freshwater production (288,696 MT).

2.4. Indonesian Fisheries Product Processing and Marketing

a. The big scheme policy of fisheries product marketing

The system of fisheries product marketing are divided become domestic market (inter province and inter island) and foreign market (export). The big scheme policy of fisheries product marketing specially for export are strengthening by 3 (three) pillars such as :

- 1) Information of foreign market.
- 2) Exporter assistance which covers export development, import control, and promotion & cooperation.
- 3) Access to foreign market.

Some actions are take in order to implementing those pillars such as creating the best product, proper to export, high quality and competitiveness. Besides that, in order to improve the market access some action had already done through various trade diplomation forum neither multilateral (WTO), Regional (ASEAN, ASEAN-Korea Free Trade Area, ASEAN-China FTA, etc.), and as well as bilateral (Indonesia-Jepang EPA, Indonesian-Iran PTA, Indonesia-Pakistan PTA, etc.)

The structure of foreign market based on market area distribution are:

1. Productive Market : Japan, USA and Europe Union
2. Prospective Market : China, Korea, Australia and New Zealand
3. Potential Market : African Countries, South America and Middle East

Table 13. Indonesian Fisheries Product Volume and Value Export, 2007

No.	Country	Volume (Kg)	Value (USD)
1	USA	125,789,330	762,263,525

b. Statistic of Indonesian Fisheries Trade

(1) Export

Indonesia is among main world an especial exporters of fisheries product beside Thailand, Norway, China, USA, and Denmark. But the position of Indonesia in fisheries trade at global scale is still relatively small with its value ratio of fisheries export at about 2.3%. Total of Indonesian fisheries product export, during year 2002-2007, has an improvement in volume and value as show below.

Picture 7. Indonesian Fisheries Product Export in Volume and Value, 2002 – 2007

Source : DG. of Fisheries Product Processing and Marketing, MMAF, 2008

Indonesian priority export commodities are shrimp, tuna (main tuna species which is in commerce : *yellowfin*, *bigeye*, *bluefin* and *skipjack*) and seaweed. Total of export volume & export value in 2002-2007 as seen in the following table.

Table 14. Export Volume of Major Fisheries Commodities, 2002- 2007 (MT)

(2) Import

Indonesia is not included in main fisheries product importer country in the world. The main importer fisheries product countries are Japan, United States, Spain, French, and Italy. However, Indonesia still keep to import certain fisheries product such as fish meal, fish and shrimp feed, fish oil and processing fish. The import volume and import value in 2002-2007 as seen in the following tables.

Table 16. Import Volume of Major Fisheries Commodities, 2002- 2007 (MT)

Fisheries Resources Surveillance and Controlling

(1). The Operational of Vessel Patrols

The operational vessel patrols have inspected about 2,492 of fishing vessels. 269 of 2,492 fishing vessels were indicated conducting illegally fishing and were adhocked to the closest port. These adhocked fishing vessels consist of 236 of Indonesian Fishing Vessels (KII) and 133 of Foreign Fishing Vessels (KIA). The surveillance result in detail in 2009 is provided in the table below.

Picture 12. Vessel Patrol

(3) The Implementation of Vessel Monitoring System (VMS)

Minister of Marine Affairs and Fishery Decree No : Per.05/Men/2007, has informed that: (1) foreign fishing vessels and bigger fishing vessel (>100 GT) are obligated to install transmitter by their own cost, (2) fishing vessel between 60 – 100 GT, transmitter will be given by government (borrow); and (3) smaller fishing vessel (< 60 GT), VMS off line will be installed and provided by government. In 2008, it has provided 500 unit VMS offline devices including 10 unit of the transfer data component in 10 location. At the end of 2008, 400 unit of VMS off line have been installed. As of February 2009, the number of installed transmitter at fishing vessels has reached 2,867 unit.

Picture 14. VMS Scheme Network and FMC Room

(4) The Regional Plan of Action (RPOA)

The Regional Plan of Action (RPOA) to Promote Responsible Fishing Practice including Combating IUU Fishing in the Region is a regional initiative that initiated by Indonesia-Australia and agreed by 9 (nine) ASEAN countries (Indonesia, Malaysia, Thailand, Filipina, Vietnam, Cambodia, Singapore, Brunei Darussalam, and Timor Leste) plus Australia and Papua New Guinea. Indonesia-MMAF is the Secretariat of RPOA and the Coordinator of Coordination Committee. The goal is to promote responsible fishing practices and including combating IUU Fishing in the region (South China Sea, Sulu-Sulawesi Seas and Arafura-Timor Seas). The action plan of the RPOA are (1) current resource and management situation in the region, (2) implementation of international and regional instruments, (3) role of regional and multilateral organizations, (4) coastal state responsibilities, (5) flag state responsibilities, (6) port state measures, (7) regional market measures, (8) regional capacity building, (9) strengthening MCS system, and (10) transshipment at sea; Some meeting and workshop have been conducting during the implementation of the RPOA. Please visit the RPOA website (www.rpoa_sec.dkp.go.id) for further detail information.

a. Marine

Aquaculture

Kerapu/Grupers; *Ephinephelus* sp
2007 prod : 6,370 MT
Gnrl mrkt size : 500-1.000 gram

Kakap/Asian Seabass; *Lates calcalifer*
2007 prod : 523 MT
Gnrl mrkt size : gram

Udang Barong/Lobster; *Panulirus* sp
2007 prod : -

Teripang/Sea cucumber;
2007 prod : 94 MT

Rumput laut/Seaweed; *Eucheema* sp
2007 prod : 1,485,654 MT

Mutiara/Pearl; *Pinctada* sp
2007 prod : -

Capture Fisheries

Manyung/Giant catfish; *Netuma thalassina*
2007 prod : 82,291 MT
Max size : 150 cm

Cendro/Needle fish; *Belonidae Tylosurus* spp
2007 prod : 5,908 MT
Max size : 100 cm

Ikan sebelah/Indian halibut; *Psettodidae*
2007 prod : 13,049 MT
Max size : 50 cm

Ekor kuning/Redbelly yellow
tailfusilier; *Caesio cuning*
2007 prod : 58,835 MT
Max size : 60 cm

Selar/Trevallies; *Selaroides* spp
2007 prod : 142,706 MT
Max size : 20 cm

Kuwel/Jack trevallies; *Caranx* spp
2007 prod : 51,254 MT
Max size : 75 cm

Layang/Scad; *Decapterus* spp
2007 prod : 305,485 MT
Max size : 30 cm

Sunglir/Rainbow runner; *Elagatis bipinnulatus*
2007 prod : 7,330 MT
Max size : 90 cm

Tetengkek/Torpedo Scad; *Megalaspis cordyla*
2007 prod : 39,603 MT
Max size : 40 cm

Bawal hitam/Black pomfret; *Formio niger*
2007 prod : 57,008 MT
Max size : 30 cm

Bawal putih/Silver pomfret; *Pampus argenteus*
2007 prod : 46,291 MT
Max size : 29 cm

Talang-talang/Deep leatherskin; *Chorinemus tala*
2007 prod : -
Max size : 50 cm

Daun bambu/Queen fish; *Chorinemus* spp
2007 prod : 17,779 MT
Max size : 75 cm

Kakap putih/Barramundi; *Lates calcarifer*
2007 prod : 90,869 MT
Max size : 200 cm

Golok-golok/Dorab wolf helling; *Chirocentrus dorab*
2007 prod : 30,851 MT
Max size : 100 cm

Japuh/Rainbow sardine; *Dussumieria acuta*
2007 prod : 24,263 MT

Tembang/Fringescale sardinella; *Sardinella fimbriata*
2007 prod : 169,823 MT
Max size : 16 cm

Terubuk/Hilsa shad; *Tenualosa ilisha*
2007 prod : 3,225 MT
Max size : 50 cm

Lemuru/Indonesian Oil Sardine; *Sardinella Longiceps*
2007 prod : 176,665 MT
Max size : 20 cm

Beloso/Greater lizardfish; *Saurida tumbil*
2007 prod : 26,429 MT
Max size : 40 cm

Ikan lidah/MTguae soles; *Cynoglossus* spp
2007 prod : 7,456 MT
Max size : 40 cm

Teri/Anchovies;*Stolephorus* spp
2007 prod : 175,522 MT
Max size : 15 cm

Ikan terbang/Flying fish;*Cypselurus* spp
2007 prod : 18,092 MT
Max size : 25 cm

Julung-julung/Garfish and
Halfbeaks;*Hemirhamphus* spp
2007 prod : 24,209 MT
Max size : 40 cm

Gerot-gerot/Saddle grunt;*Pomadourus*
maculatus
2007 prod : 17,575 MT
Max size : 50 cm

Ikan nomei/Bombay duck;*Harpodon*
nehereus
2007 prod : 5,750 MT
Max size : 40 cm

Ikan layaran/Indo-Pacific blue
marlin;*Tetrapturus audeax*
2007 prod : 3,878 MT
Max size : 250 cm

Setuhuk hitam/Black marlin;*Makaira*
mazarra
2007 prod : 1,931 MT
Max size : 448 cm

marlin;*Makaira mazarra*
2007 prod : -
Max size : 450 cm

Setuhuk loreng/Stripped
marlin;*Tetrapturus audeax*
2007 prod : 877 MT
Max size : 350 cm

Ikan pedang/Swordfish;*Xiphias gladius*
2007 prod : 2,815 MT
Max size : 450 cm

Ikan napoleon/Napoleon
wrasse;*Cheilinus undulatus*
2007 prod : 760 MT
Max size : 180 cm

Kakap merah/Red snappers;*Lutjanus*
spp
2007 prod : 116,994 MT
Max size : 90 cm

Belanak/Mangrove mullets;*Mugil*
cephalus
2007 prod : 38,960 MT
Max size : 35 cm

Biji nangka/Yellow-strips
goatfish;*Upeneus vittatus*
2007 prod : 2,733 MT
Max size : 25 cm

Kurisi/Ornate treadfin
bream;*Nemipterus hexodon*
2007 prod : 64,406 MT
Max size : 25 cm

Kurau/Four finger treadfin; *Eleutheronema tertradtactylum*
2007 prod : 6,484 MT
Max size : 200 cm

Swanggi/Purple-spotted; *Priacanthus tayenus*
2007 prod : 21,766 MT
Max size : 30 cm

Gulamah/Croacker; *Nibea albiflora*
2007 prod : 57,488 MT
Max size : 38 cm

Tongkol krai/Frigate tuna; *Auxis thazard*
2007 prod : 134,593 MT
Max size : 50 cm

Tongkol komo/kawa kawa; *Euthynnus affinis*
2007 prod : 143,101 MT
Max size : 100 cm

Cakalang/Skipjack tuna; *Katsuwonus pelamis*
2007 prod : 301,531 MT
Max size : 90 cm

Tenggiri/Narrow-barred Spanish mackerel; *Scomberomorus commerson*
2007 prod : 115,424 MT
Max size : 200 cm

Banyar/Indian mackerel; *Rastrelliger kanagurta*
2007 prod : 13,045 MT
Max size : 35 cm

Slengseng/Spotted chub mackerel; *Scomber australasicus*
2006 prod : 597 MT
Max size : 40 cm

Tenggiri papan/Indo-Pacific king mackerel; *Scomberomorus guttatus*
2007 prod : 28,928 MT
Max size : 82 cm

Albakora/Albacore; *Thunnus alalunga*
2007 prod : 34,355 MT
Max size : 120 cm

Madidihang/Yellow tuna; *Thunnus albaceres*
2007 prod : 103,655 MT
Max size : 195 cm

Tuna sirip biru selatan/Southern bluefin tuna; *Thunnus maccoyii*
2007 prod : 1,079 MT
Max size : 225 cm

Tuna mata besar/Bigeye tuna; *Thunnus obesus*
2007 prod : 52,489 MT
Max size : 225 cm

Tongkol abu-abu/Longtail tuna; *Thunnus obesus*
2007 prod : 117,941 MT

Kerapu bebek/Humpback hind;*Cromileptes altivelis*
2007 prod : 6,271 MT
Max size : 50 cm

Kerapu balong/Honeycomb grouper;*Epinephelus merra*
2007 prod : 5,087 MT
Max size : 50 cm

Kerapu lumpur/Greasy rockcod;*Epinephelus tauvina*
2007 prod : 1,117 MT
Max size : 150 cm

Kerapu sunu/Leopard coral grouper;*Plectropomus leopardus*
2007 prod : 7,827 MT
Max size : 65 cm

Ikan baronang/Orange-spotted spinefoot;*Siganus guttatus*
2007 prod : 14,598 MT
Max size : 35 cm

Alu-alu/Great barracuda;*Sphyræna barracua*
2007 prod : 7,835 MT
Max size : 100 cm

Kerong-kerong/Jarbau terapon;*Terapon jarbua*
2007 prod : 6,374 MT
Max size : 30 cm

Layur/Hairtails;*Trichiurus spp*
2007 prod : 47,414 MT
Max size : 100 cm

Mako/Mackerel shark;*Isurus spp*
2007 prod : 497 MT
Max size : 394 cm

Ikan gergaji/Sawfishes;*Pristis spp*
2007 prod : 22 MT
Max size : 450 cm

Cucut martil/Winghead;*Eusphyra blochi*
2007 prod : 1,423 MT

Cucut botol/Dogfish sharks;*Squalus spp*
2007 prod : 12,066 MT
Max size : 158 cm

Pari kembang/Stingrays;*Dasyatis spp*
2007 prod : 35,650 MT

Pari kelewari/Devilrays;*Mobula spp*
2007 prod : 2,020 MT

Pari burung/Eaglerays;*Myliobatus spp*
2007 prod : 3,808 MT

Pari kekeh/Whitespotted wedgesfishes;*Rhynchobatus djiddensis*
2007 prod : 9,597 MT

Udang dogol/Endeavour prawn/shrimp;*Metapenaeus ensis*
2007 prod : 33,455 MT

Udang putih/Banana prawn/White shrimps;*Penaeus merguensis*
2007 prod : 81,193 MT
Gnrl mrkt size : 25-30 gram

Udang windu/Giant tiger prawn/
shrimp;*Penaeus monodon*
2007 prod : 42,036 MT
Gnrl mrkt size : 30-35 gram

Kepiting/Mangrove mud crab;*Scylla serrata*
2007 prod : 25,641 MT

Rajungan/Swimming crab;*Potrunus sp*
2007 prod : 30,421 MT

Kerang darah/blood cockles;*Anadara granosa*
2007 prod : 64,641 MT

Cumi-cumi/Common squids;*Loligo spp*
2007 prod : 63,425 MT

Kerang mutiara/Black-lip pearl
olyster;*Pinctada margaritifera*
2007 prod : 205 MT

Teripang/Sea cucumber;*Stichopus spp*
2007 prod : 4,273 MT

Rumput laut/Sea weeds;*Euchema spp*
2007 prod : 4,643 MT

b. Brackiswater

Bandeng/Milkfish;*Chanos chanos*
2007 prod : 263,139 MT
Gnrl mrkt size : 300-500 gram

Belanak/Mullets;*Mugil sp*
2007 prod : 5,354 MT
Max size : 35 cm

Kakap/Asian seabass;*Lates calcalifer*
2007 prod : 3,894 MT

Mujair/Tilapia;*Tilapia mossambica*
2007 prod : 19,604 MT

Tawes/Java barb;*Puntius javanicus*
2007 prod : - MT

Udang windu/Black tiger
shrimp;*Penaeus monodon*
2007 prod : 133,113 MT

Udang putih/Banana prawn/White shrimps;*Penaeus merguensis*
2007 prod : 16,995 MT
Gnrl mrkt size : 25-30 gram

Udang api-api/Metapenaeus shrimp;*Metapenaeus sp*
2007 prod : - MT

Udang Vaname/Vanname shrimp;*Lithopenaeus vannamei*
2007 prod : 179,966 MT

Kepiting/Mud crab;*Scylla sp*
2007 prod : 6,631 MT

Rajungan/Swimming crab;*Potrunus sp*
2007 prod : 400 MT

Rumput laut/Seweed;*Gracillaria sp*
2007 prod : 242,821 MT

c. Freshwater Culture

Aquaculture

Ikan mas/Common carp;*Cyprinus carpio*
2007 prod : 106,592 MT
Gnrl mrkt size : 250-500 gram

Tawes/Java barb;*Puntius javanicus*
2007 prod : 9,074 MT

Ikan nilem/Nilem carp;*Osteochilus hasselti*
2007 prod : 13,587

Mujair/Tilapia;*Tilapia mosambica*
2007 prod : 3,564 MT

Ikan nila/Nila tilapia;*Tilapia nilotica*
2007 prod : 93,521 MT
Gnrl mrkt size : 300-500 gram

Gurame/Giant gouramy;*Osphronemus gouramy*
2007 prod : 33,800 MT
Gnrl mrkt size : 500-1.000 gram

Sepat siam/Snakeskin gouramy;*Trichogaster pectoralis*
2007 prod : 191 MT

Tambakan/Kissing gouramy;*Helostoma temminckii*
2007 prod : 6,084 MT

Ikan lele/Catfishes;*Clarias sp*
2007 prod : 88,405 MT

Sidat/River eels;*Anguilla* sp
2007 prod : - MT

Ikan patin/Catfishes;*Pangasius* sp
2007 prod : 15,158 MT

Ikan Toman/Snake head;*Ophiocephalus micropelti*
2007 prod : 92 MT

Ikan betutu/Sand gobies;*Oxyeleotris marmoratus*
2007 prod : 23 MT

Ikan Jelawat/Hows carp;*Leptobarbus hoeveni*
2007 prod : 1,553 MT

Udang Galah/Giant freshwater prawn;*Macrobrachium rosenbergi*
2007 prod : 989 MT

Capture (Inland Openwater)

Betok/Climbing perches;*Anabas testudineus*
2007 prod : 11,054 MT

d. Ornamental Fishes

Marine

Morish/ Moorishidol,
Zanclus canescens,
Max. length 25 cm

Kepe Monyong Asli/ Long-nosed
Butterfly, *Forcipiger flavissimus*
Max. length 26 cm

Mandarin Asli/ Callionymidae
Pterosynchiropus splendidus
Max. length 6 cm

Botana Kacamata/ Acanthuridae
Acanthurus glaucopareius
Max. length 17 cm

Botana Kasur /
Acanthurus lineatus
Max. length 42 cm

Triger Kembang/ Clown Triggerfish
Balistoides conspicillum,
Max. length 50 cm

Botana lettersix/ Blue Surgeonfish,
Paracanthurus hepatus,
Max. length 26 cm

Skorpion Radiata
Pterois radiata
Max. length 20 cm

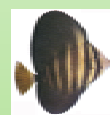

Kepe Monyong Biasa
Chelmon rostratus
Max. length 20 cm

Skorpion Kembang
Dendrochirus zebra
Max. length 18 cm

Botana Naso
Naso lituratus
Max. length 45 cm

Keranjang Bali
Zebrasoma veliferum
Max. length 30 cm

Burung Laut/ Acanthuridae
Zebrasoma scopas
Max. length 20 cm

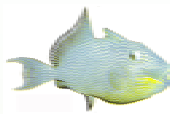

Capungan Jakarta/ Apogonidae
Sphaeramia nematoptera
Max. Length 10 cm

Capungan Ambon
Pterapogon kauderni
Max. length 10 cm

Jagungan
Oxymonacanthus longirostris
Max. length 10 cm

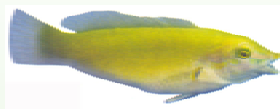

Triger Arab
Pseudobalistes fuscus

Kepe Falkula Palsu
Chaetodon lineolatus
Max. length 45 cm

Kepe Falkula Jakarta
Chaetodon falcula
Max. length 29 cm

Keling Ijo
Halichoeres chloropterus
Max. length 20 cm

Angel fish

Freshwater

Koi

Botia / Clown Loach
Chromobotia macracanthus

Arwana / Gold Arwana

Betta splendens/Siamese fighting fish

Louhan

Diskus

Guppy

Blank line rasbora

Carp

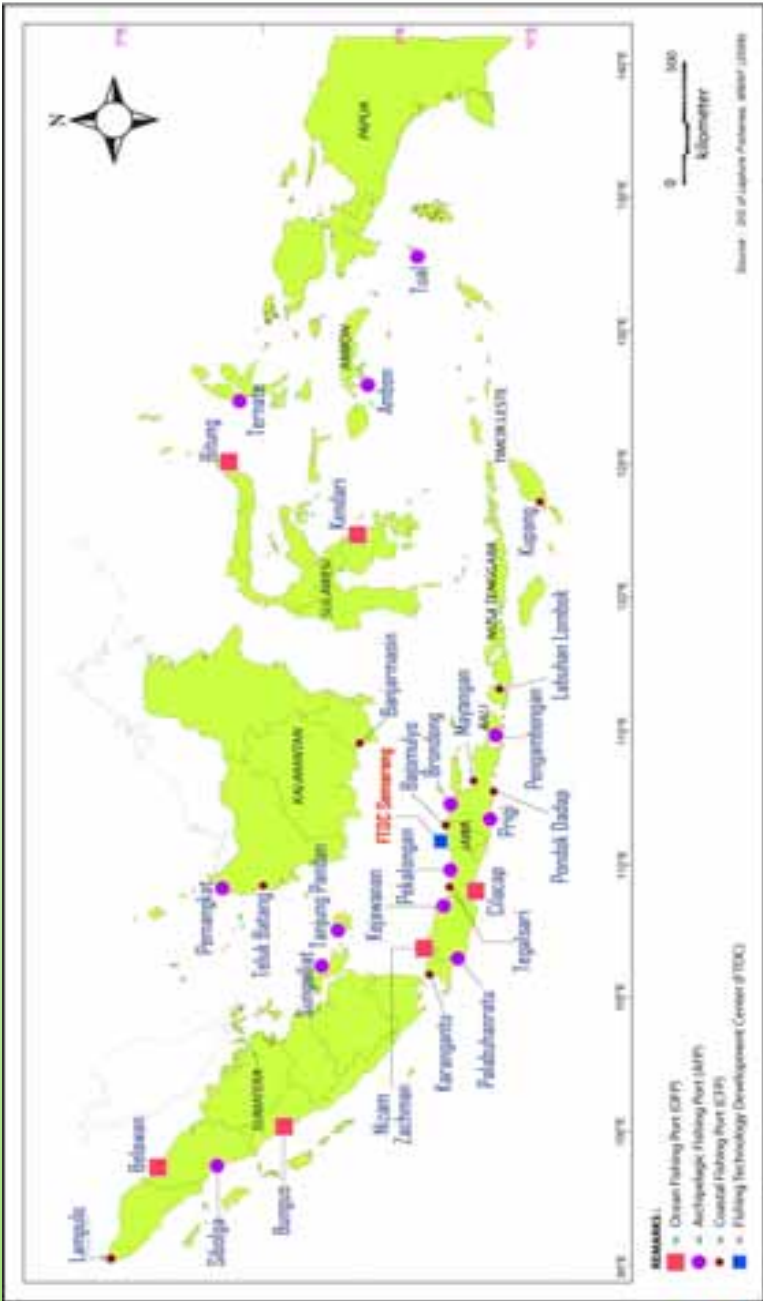

Mas koi
