

# INDONESIAN FISHERIES BOOK

MINISTRY OF MARINE AFFAIRS AND FISHERIES  
JAPAN INTERNATIONAL COOPERATION AGENCY

**2008**

## PREFACE

Praise thanks to God Almighty, because only with His Blessing, we could finally completed the "**INDONESIAN FISHERIES BOOK 2008**" as the revise of Indonesian Fisheries Book 2007, which is published under the cooperation between the Ministry of Marine Affairs and Fisheries (MMAF) and the Japan International Cooperation Agency (JICA).

The Indonesian fisheries book is very practical and informative reference for all stakeholders, because some important information combines and collected into one book. This book covers profile of MMAF, performance and statistic of Indonesian fisheries, international cooperation and also structure organization of MMAF.

Hopefully, with the published of this book, all stakeholders both government and private sectors could help by its information which is very valuable and easy understanding.

## **1. PROFILE OF MMAF**

### **1. 1. History of MMAF**

**M**arine sector in Indonesia we can say, is still under developed, despite of the nation's rich marine and fisheries resources and vigorous potential in relevant development. The resources consist of renewable resources, like fisheries resources, capture fisheries and also marine and coastal culture, non-conventional energy and un-renewable resources, such as gases and oils and various kinds of minerals. Besides the two types of resources, there are many kinds of marine environmental services can be upgraded to enhance fisheries and marine development, for example: maritime tourism, maritime industry, shipping/transportation service, etc. By these reasons, the President Abdurrahman Wahid, with Presidential Decree No.355/M Year 1999 in Period of Cabinet 1999-2004, constituted Ir. Sarwono Kusumaatmaja as Minister of Marine Exploration.

Afterward, the constitution has been followed by the forming of The Minister of Marine Exploration (Departemen Eksplorasi Laut - DEL) along with detail of its duty function through Presidential Decree No. 136 Year 1999 about Domiciling, Duty, Function, Organizational Formation, and Departmental Administration. In the reality, the usage of DEL nomenclature did not last longer because of the pursuant from DPR and various parties have changed, the reeling of the Minister of Marine Exploration to become the Minister of Marine Exploration and Fisheries pursuant to Presidential Decree No. 145 Year 1999. Then, the Ministry of Marine Exploration (DEL) nomenclature became the Ministry of Marine Exploration and Fisheries (Departemen Eksplorasi Laut dan Perikanan - DELP) through Presidential Decree No.147 Year 1999.

Then, the changes of cabinet formation happened after the Annual Conference of MPR in 2000, and the nomenclature of DELP become the Ministry of Marine Affairs and Fisheries (Departemen Kelautan dan Perikanan - DKP) according to Presidential Decree No. 165 Year 2000 about Domiciling, Duty, Function, Authority, Organizational Formation, and Departmental Administration.

With regard to the realization of its main duties and functions, MMAF organizational structure consists of 8 (eight) Echelon 1 working units, as stated in the President Regulation No. 10/2005 concerning Organization Unit and Echelon 1 Duty, Ministry of Republic Indonesia.

## **1. 2. Vision and Mission**

### **a. Vision**

The Management of marine and fishery resources which is sustainable and carried out with high responsibility for the objective of national unity and welfare.

## **b. Mission**

1. To increase the welfare of catch and culture fishermen, and other businessmen in marine and fisheries.
2. To increase the role of marine and fisheries as the agent of economic growth.
3. To maintain the loading capacity and to increase the environmental quality of the marine and fishery resources.
4. To heighten the people intelligence and health condition through increasing of fish consumption.
5. To boost the roles of sea as a nation unifying factor as well as fostering marine based tradition and culture.

## **1. 3. Objectives and Targets**

### **a. Objectives**

The objectives of marine and fisheries development in medium term development framework are:

1. To create Indonesian welfare through increasing of fishers income, fish culturing, and other actors of marine and fisheries business.
2. To improve role of marine and fisheries sector in national economic.
3. To create quality of environment condition of marine and fisheries resources and sustainability resources.
4. To increase community fish consumption.
5. To improve marine role as nation integrator and empowerment nation marine culture.

### **b. Targets**

The targets of marine and fisheries development are:

1. Improving quality and effort of program object group human resources.
2. Increasing contribution of marine and fisheries sector in national economy.
3. Decreasing damage level and utilization violation of marine and fisheries resources.
4. Increasing fish consumption level of community.
5. Developing people awareness of marine as nation integrator and improving marine culture of community.

Development of marine and fisheries in the future will be consistent and directed to realize 3 (three) development pillars i.e. pro-poor (poverty eradication), pro-job (unemployment reduction) and pro-growth (economic growth).

In year 2008, outcomes to be achieved are:

1. Pro-poor

Increasing the income of the fishers, fish farmer and other coastal community from the estimation of Rp.1.05 million/person/month in year 2007 become Rp. 1.25 million/person/month in 2008.

2. Pro-job

Increasing the accumulation of work opportunities supplying from 6.50 million people in 2007 become 8.94 million people in 2008.

3. Pro-growth

Increasing the contribution of Fisheries GDP to Non Oil National GDP (excluding processing) from 2.45% in 2007 become 4.40% in 2008.

These 3 (three) development outcomes are inline with national development theme for 2008 namely Economic Growth Fast-moving for poverty and unemployment reduction (Government Work Plan year 2008).

## 1. 4. Strategy, Policy and Program

### a. Strategy

To achieve the objectives and targets in marine and fisheries development, the development strategy is prepared to include the following steps:

1. The development of marine and fisheries will be implemented in transparency and high accountability with regard to creating the good and clean government, which is reflected in various public services and programs implementation to achieve the mid-term strategy goals.
2. The utilization of marine and fisheries potency for community welfare, which will be reflected in various regulations along with national necessities based on the 3 (three) main directions of the national development, namely *pro growth strategy* (economic growth); *pro job strategy* (unemployment reduction) and *pro poor strategy* (poverty eradication).
3. The marine and fisheries development will be implemented with the concern to the principles of justice and even distribution among regions, the decrease of underdevelopment and gap, and also the strong priority on the development of small islands at remote boundaries as an important part of the unity sovereignty of Indonesia.

## **b. Policy**

With regard to achieving its vision and missions, the Ministry of Marine Affairs and Fisheries has released some policies concerning mid-term development plan based on the 3 (three) main directions of the national development, as follows:

1. To develop the business scale capacity of fishers, fish farmer and other stakeholders of marine and fisheries.
2. To develop the competitive capacity and environmental conception of aquaculture.
3. To strengthen and develop the national capture fisheries business in efficiently, sustainable and community based.
4. To develop and strengthen the industry of handling, processing and product marketing.
5. To develop the sustainable and community based of small island.
6. To increase rehabilitation, the conservation of marine and fisheries resources, and its ecosystem.
7. To strengthen the surveillance and control of the utilization of marine and fisheries resources.
8. To increase the tackling efforts on illegal fishing.
9. To develop education, training and extension.
10. To strengthen of research, knowledge and technology of marine and fisheries.

## **c. Program**

To achieve objectives which are appropriate with formulated strategy and policy, the marine and fisheries development programs are:

1. Program of empowerment to fishers as well as fish farmer and other actors of marine and fisheries business. This program includes credit supplying for small, micro and medium scales of business, increasing the capacity of small business starting from production, processing until marketing, direct assisting in basic infrastructures equipping, Fuel (BBM) distribution guarantee, and price subsidizing based on national policy.
2. Program of marine and fisheries resources development and management. This program covers fisheries revitalization, integrated fisheries industry development focused on tuna, shrimp and seaweed.
3. Program of marine and fisheries resources conservation and controlling.

## 2. PERFORMANCE AND STATISTIC OF INDONESIAN FISHERIES

### 2. 1. General Illustration of Indonesian Fisheries

Indonesia has a large maritime zone, some 5.8 Km<sup>2</sup> consisting of archipelagic waters, territorial seas, and Exclusive Economic Zones. Its coastline is more than 81,000 km long. Its sustainable fisheries (MSY) of all kinds are about 6.4 millions MT a year while its total allowable catch (TAC) is estimated at 80% amounting to about 5.12 million MT annually. In addition, there are also great potentials for aquaculture, inland openwater fisheries as well as the development of marine biotechnology.

Fisheries Production, 2001-2006 (MT)

Source: DG of Capture Fisheries and DG of Aquaculture, MMAF, 2008

Indonesian national fisheries production grow continuously at an average annual rate of 7.00%, e.g. 6.12 MT in 2004, about 6.87 MT in 2005 and about 7.49 MT in 2006.

As for the capture fisheries product, it increases annually at a mean rate of 2.40%, e.g. about 4.65 MT in 2004, about 4.71 MT in 2005 and 4.81 MT in 2006. A big improvement happens to the aquaculture fisheries product, it experiences an annual increase of about 20.91%, the product was about 1.47 MT in 2004, about 2.16 MT in 2005 and about 2.68 MT in 2006.

The export of fisheries product was about 0.9 MT in 2004, about 0.86 MT in 2005 and about 0.93 MT in 2006, i.e. fluctuated around the annual average of 0.9%. One the other hand, the import of fisheries product was about 0.16 MT in 2004, 0.15 MT in 2005 and 0.18 MT in 2006, that means it fluctuated around the annual average of 0.16%.

Viewing at the increases in product with rather constant amounts of import and export, it should be interpreted that the domestic consumption of fisheries product increased from year to year.

## 2. 2. Indonesian Capture Fisheries

### Marine :

Area = 5.8 million Km<sup>2</sup>

Maximum Sustainable Yield (MSY) = 6.4 million MT/year

Total Allowable Catch (TAC) = 5.12 million MT/year (80% MSY)

Production = 4.51 million MT (70.469% MSY)\*

### Inland Openwater :

Area = 5.4 million Ha (Lake & Reservoir 3.9%; Swamp 71.6%; Riverine 22.1%)

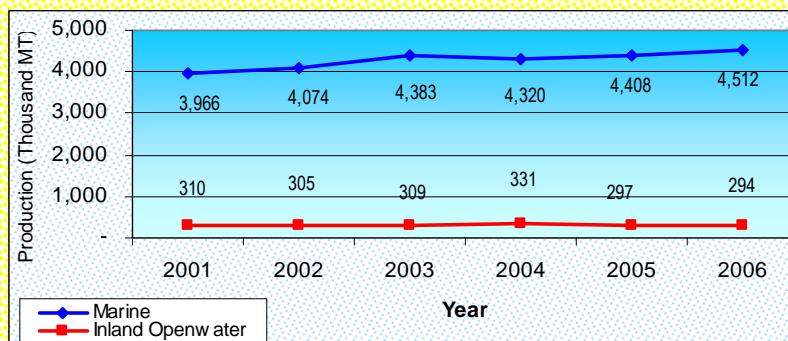

Potential (1985) = 0.9 million MT/year

BRKPs revision (2004) = 4.95 million MT/year

With Stock Enhancement = 6.4 million MT/year

Production = 0.29 million MT\*

## 2. 3. Indonesian Aquaculture

### a. Aquaculture area

In Indonesia the extent of areas with aquaculture potential is around 11.81 million hectares, consisting of 2.22 million hectares with potential for freshwater aquaculture, 1.22 million hectares with potential for brackish water aquaculture and 8.36 million hectares with marine culture potential. Currently, exploitation of this potential has only reached 9.49 % for freshwater aquaculture, 39.78 % for brackish-water aquaculture and 0.89 % for marine culture.

### b. Aquaculture fisheries production

The total national aquaculture production in 2006 was 2.68 million MT. Which is still low if derided the potential area which is available for aquaculture. Therefore there is still great potential for growth in terms of area. The total national fish consumption is around 5,006 thousand MT, i.e. is around 25.03 kg/year per capita.

Trend of Indonesian Aquacultures Production by Waters (Thousand MT)

Source : DG of Aquaculture, MMAF, 2007

The bigger aquaculture productions in 2006 were seaweed (1.37 million MT), second is common carp (0.247 million MT), Milk fish (0.212 million MT), Nile Tilapia (0.169 million MT), Black Tiger Shrimp (0.147 million MT), Metapenaeus vannamei (0.141 million MT), Cat fishes (0.076 million MT), Cat fishes/Patin (0.031 million MT), Giant Gouramy (0.028 million MT) and Nilam carp (0.024 million MT).

The main producing area are East Nusa Tenggara Province for marine culture (481,123 MT), Lampung Province for Brackishwater (158,001 MT) and West Java Province for Fresh water production (127,578 MT).

## 2. 4. Indonesian Fisheries Product Processing and Marketing

### a. The Big Scheme Policy of Fisheries Product Marketing

The system of fisheries product marketing are divided become domestic market (inter province and inter island) and foreign market (export). The big scheme policy of fisheries product marketing specifically for export are strengthening by 3 (three) pillars such as :

- 1) Information of foreign market.
- 2) Exporter assistance which covers export development, import control, and promotion & cooperation.
- 3) Access to foreign market.

Some actions are take in order to implementing those pillars such as creating the best product, proper to export, high quality and competitiveness. Besides that, in order to improve the market access some action had already done through various trade diplomation forum neither multilateral (WTO), Regional (ASEAN, ASEAN-Korea Free Trade Area, ASEAN-China FTA, etc.), and as well as bilateral (Indonesia-Jepang EPA, Indonesian-Iran PTA, Indonesia-Pakistan PTA, etc.)

The structure of foreign market based on market area distribution are:

1. Productive Market :Japan, USA, and Europe Union
2. Prospective Market : China, Korea, Australia, New Zealand
3. Potential Market : African Countries, South America, and Middle East

## b. Statistic of Indonesian Fisheries Trade

### 1). Export

Indonesia is among main world an especial exporters of fisheries product beside Thailand, Norway, China, USA, and Denmark. But the position of Indonesia in fisheries trade at global scale is still relatively small with its value ratio of fisheries export at about 2.3%.

Total of Indonesian fisheries product export, during year 2001-2006, has an improvement in volume and value as show below.

Indonesian priority export commodities are shrimp, tuna (main tuna species which is in commerce : yellowfin, bigeye, bluefin and skipjack) and seaweed. Total of export volume & export value in 2001-2006 as seen in the following tables.

## 2). Import

Indonesia is not included in main fisheries product importer country in the world. The main importer fisheries product countries are Japan, United States, Spain, French, and Italy. However, Indonesia still keep to import certain fisheries product such as fish meal, fish and shrimp feed, fish oil and processing fish. The import volume and import value in 2001-2006 as seen in the following tables.
