FOREWORD

The National Statistics Office (NSO) is pleased to present this final report on the 2011 Annual Poverty Indicators Survey (APIS). The survey, designed to provide non-income indicators of poverty, is the eighth in a series of poverty indicators surveys conducted nationwide since 1998. The 2011 APIS provides information on the demographic characteristics, health status, education, economic characteristics, housing, water and sanitation, and other information that can be used for the assessment of Filipino family's living conditions.

This publication presents the results of the 2011 APIS. It provides national and regional estimates on selected non-income poverty indicators and describes the profiles of families who belong to the bottom 30 percent income stratum and upper 70 percent income stratum.

The results from the 2011 APIS can be used by policy makers and program implementers in their planning, assessment and evaluation of the various programs designed to reduce poverty incidence in the country. It can also be used by researchers interested in analyzing the poverty situation in the Philippines using non-income indicators.

The NSO wishes to extend the sincerest gratitude to everyone who contributed to the successful completion of the 2011 APIS especially the respondents who generously shared their time and information to enable us to gather data that can be used in analyzing the poverty situation in the country, and the various NSO employees who untiringly carried out the various activities of the survey, from the preparatory phase to the post-enumeration phase.

Background

The 2011 Annual Poverty Indicators Survey (APIS) was conducted by the National Statistics Office (NSO) in July 2011. The 2011 APIS is the eighth in the series of annual poverty indicators surveys conducted nationwide. Since 1998, APIS has been conducted during the years when the Family Income and Expenditure Survey (FIES) are is conducted, except in 2001 and 2005 due to budgetary constraints.

Objectives of the Survey

The APIS is a nationwide survey designed to provide non-income indicators related to poverty at the national and regional levels. It is designed to gather data on the socio-economic profile of families and other information that are related to their living conditions. Specifically, it generates indicators which are correlated with poverty, such as indicators regarding the ownership or possession of house and lot, the types of the materials of the roofs and walls of their housing units, their access to safe water, the types of toilet facility they use, and presence of family members of specified characteristics such as children 6-11 years old enrolled in elementary, children 12-15 years old enrolled in high school, members 18 years old and over gainfully employed, and working children 5-17 years old.

A module on Social Protection Program was added in this survey round to determine the coverage of benefactors or recipients of the programs of the government or other entities.

Sampling Design

The 2011 APIS is a sample survey designed to provide data representative of the country and its 17 administrative regions. The survey's sample design helps ensure this representativeness. The 2011 APIS used the 2003 master sample created for household surveys on the basis of the 2000 Census of Population and Housing (CPH) results. The survey used four replicates of the master sample. For each region (domain) and stratum, a three-stage sampling scheme was used: the selection of primary sampling units (PSUs) for the first stage, of sample enumeration areas (EAs) for the second stage, and of sample housing units for the third stage. PSUs within a region were stratified based on the proportion of households living in housing units made of strong materials, proportion of households in the barangay engaged in agricultural activities and per capita income of the city/municipality.

As earlier mentioned, a three-stage sampling design was used in each stratum within a region. In the first stage, primary sampling units (PSUs) were selected with probability proportional to the number of households in the 2000 Census. PSUs consisted of a barangay or a group of contiguous barangays. In the second stage, in each sampled PSU, EAs were selected with probability proportional to the number of households in the 2000 Census. An EA is defined as an area with discernable boundaries consisting of approximately 350 contiguous households. In the third stage, from each sampled EA, housing units were selected using systematic sampling. For operational considerations, at most 30 housing units were selected

per sample EA. All households in sample housing units were interviewed except for sample housing units with more than three households. In such a housing unit, three households were randomly selected with equal probability.

Only household members related to the household head by blood, marriage or adoption were considered as members of the sample household in APIS. Family members of the household head who are working abroad were excluded.

The results presented in this report are weighted to ensure that the data are representative of the population of the Philippines and its regions. Sampling weights, or expansion factors, were applied to the data obtained from sample households in order to derive estimates for the larger population from which the sample households were selected for the purpose of survey interviewing. The weights or expansion factors applied to each sample household reflected the probability of the households being selected for the survey sample. More specifically, the basic sampling weights assigned were equal to the inverse of the joint probability of selection in the three stages of sample selection. Since the sample was self-weighting within regions (domains) or strata, each household in a particular stratum received the same weight, or raising factor.

The weights adjustment factor takes into account the sample EAs which were not enumerated and households which were not interviewed. The product of the basic weights and weights adjustment factor was used to obtain the preliminary weighted estimates of the total number of families.

In order to make the weighted estimate of the total number of persons by age group and sex consistent with the estimated number of persons by age group and sex as of July 2011, a final weight adjustment factor was used. The estimated number of persons by age group and sex, by region as of July 2011 was derived using 2000 Census-based population projection for the region. In each region, the final weight adjustment is equal to the ratio of the estimated number of persons by age group and sex as of July 2011 to the preliminary weighted estimate of the total number of persons by age group and sex from the 2011 APIS data.

Response Rate

Of the 43,833 eligible sample households for the 2011 APIS, 42,063 were successfully interviewed. This translated to a response rate of 96 percent at the national level. In addition, Region VIII (Eastern Visayas) even surpassed the national response rate with 98.7 percent. Households which were not interviewed may either be cases of referral, or non-availability of the household or any responsible member of the household for an interview during the enumeration period.

Limitations of the Data

Data gathered from APIS are results of a sample survey and are therefore subject to sampling variations, that is, sampling errors are expected since the data are not obtained through complete enumeration or census.

The survey covered a national sample of households deemed sufficient to provide estimates about the population at the national and regional levels only. Hence, tabulations and cross-tabulations of variables at lower geographic levels such as provincial and municipal levels are not generated since these may not be statistically reliable.

Survey estimates may also be affected by non-sampling errors such as deliberate under or over reporting of income and expenditures or reluctance on the part of the respondents to reveal their true levels of income/expenditures.

Moreover, considering that both cash and non-cash expenditures and income are gathered in APIS, valuation of non-cash income and expenditures may pose some problems. The instructions are to use market prices prevailing in the locality for goods and services received as gifts, and farm gate prices for goods consumed from own production. However, market prices may not be available for all items in the locality or market prices/farm gate prices may be highly variable for different localities.

Furthermore, data users attempting to match 2011 APIS and the 2009 FIES should take note of the differences in the reference period. The 2009 FIES was conducted in two visits covering the periods January to June 2009 and July to December 2009 while 2011 APIS covered January to June 2011 only.

Survey Questionnaire

The 2011 APIS questionnaire (APIS Form 1) contains the following sections:

Section A	Identification and Other Information
Section B	Demographic Characteristics
Section C	Health Status
Section D1	Schooling Status
Section D2	Highest Grade Completed
Section E	Economic Characteristics
Section F	Housing
Section G	Water and Sanitation
Section H	Other Relevant Information
Section I	Social Protection
Section J	Family Sustenance and Entrepreneurial Activities
Section K	Other Sources of Income
Section L	Other Receipts

Section M Family Expenditures

The description or intention of each section of the 2011 APIS questionnaire is presented below.

Identification and Other Information – contains information about the geographic identification (region, province, city/municipality and barangay, EA code, sample housing serial number and household control number), design codes (replicate, stratum, PSU No., rotation group and number of households in the housing unit) and result of visit to the sample housing unit/household.

Demographic Characteristics – obtains the demographic characteristics of each family member such as relationship to the family head, sex, age and marital status.

Health Status – obtains information on whether each family member age 5 years or older got ill or injured a month prior to the survey, and whether the illness and/or injury experienced by each member is work-related or not.

Schooling Status and Highest Grade Completed – determines whether a family member aged 3 to 24 is currently attending formal school, and if so, the grade or year level member currently being attended. If the member is not currently attending school, then the reason for not doing so is also asked. This section also determines the educational attainment of the family members 5 years old and over. In particular, information about preschool attendance will give an idea on 'school readiness' among children in Grade 1.

Economic Characteristics – obtains information on the employment status of each family member 5 years old and over. It also includes questions on occupation and business engaged in by the member during the past six months, as well as the salaries and wages from employment of each working family member.

Housing, Water and Sanitation – obtains information that relates to housing characteristics and household conveniences/amenities owned by the family. The main source of water supply and kind of toilet facility used are asked.

Other Relevant Information – determines if any member of the family availed of loans in the past 6 months, and if so, the source are also asked. In this section, the following information are also gathered: whether or not the family has been a beneficiary of the KALAHI-CIDSS and Child Benefit program; and if any member of the family experienced hunger in the past 3 months because he/she had nothing to eat. For those who experienced hunger, the frequency of experiencing hunger is also asked.

Social Protection – determines if any member of the family received payments/benefits in any of the social protection programs from sponsoring agencies, whether government or non-government.

Family Sustenance and Entrepreneurial Activities – determines if any member of the family is engaged in any of the following and entrepreneurial activities: family sustenance activity; net share of crops, fruits and vegetables produced or livestock or poultry raised by other households; crop farming and gardening; livestock and poultry raising; fishing; forestry and hunting; wholesale and retail; manufacturing; community, social, recreational and personal services; transportation, storage and communication services; mining and quarrying; construction; or entrepreneurial activities not elsewhere classified. This section asks for the total net income, value consumed and value given away as gifts of the products derived/produced from entrepreneurial.

Other Sources of Income – obtains information on sources of family income not derived from work.

Other Receipts – obtains information on the sources of non-income receipts of families, such as income not derived from earnings, property income and gifts received.

Family Expenditures – determines the expenses made by the family purely for family members' personal consumption.

Concepts and Definitions

Bottom 30% – In descending order of the family per capita income, the bottom 30% refers to the bottom 30 percent of the total families in the income distribution. This grouping of families was used as a proxy for those falling below the poverty line.

Upper 70% – In descending order of the family per capita income, the upper 70% refers to the upper 70 percent of the total families in the income distribution. It is the complement of the bottom 30 percent.

Respondent – An adult knowledgeable member of the sample family who can provide accurate answers to all or most of the questions in the survey.

Family – Aggregate of persons bound by ties of kinship, who live together under the same roof and eat together or share in common the family food. For the purpose of this survey, a household can be classified as a nuclear family, extended family or a single person family. For a household comprising of members who are not related with each other by blood, marriage or adoption, only the head of the household is considered. This case is a single person family.

Family head – An adult member of the family who is responsible for the care and organization of the family or who is regarded as such by the members of the family.

Highest educational attainment – The highest grade or year completed in school, college or university.

Work - Any activity of a person done for pay, profit or without pay on family farm or enterprise, or an activity done by a farm operator or member of his family on another's farm on "exchange labor" arrangement. In addition, any activity that a person does during the reference period in relation to minor activities such as home gardening, raising of crops/fruits, raising hogs/poultry, and fishing for home consumption, and manufacturing for home use are also considered as work.

Building - Any structure built, designed or intended for the enclosure, shelter or protection of any person, animal or property. It consists of one or more rooms and/or other spaces, covered by a roof, and usually enclosed within external walls or with common dividing walls with adjacent buildings, which usually extend from the foundation to the roof.

Housing unit - A structurally separate and independent place of abode which, by the way it has been constructed, converted, or arranged, is intended for habitation by one or more households. Structures or parts of structures which are not intended for habitation but are used as living quarters by households are also considered as housing units these include commercial, industrial, and agricultural buildings, or natural and man-made shelters such as caves, boats, abandoned trucks, and culverts.

Floor area - The area enclosed by the exterior walls of the housing unit. In case of several floors, the area of the housing unit is the sum of areas of all floors.

Class of worker - The relationship of the worker to the establishment in which he/she works.

The classes of workers are:

- a. **Worked for private household** – a person who worked in a private household for pay, in cash or in kind. Examples are domestic helper, household cook, household guard, gardener, and family driver.
- b. **Worked for private establishment** – a person who worked in a private establishment for pay, in cash or in kind. This class not only includes persons working for private industry but also those working for a religious group (priest, acolyte, missionary, nuns/sisters, etc.), unions and non-profit organizations, and farm laborers who worked in another farm for pay, in cash or in kind.
- c. **Worked for government/government corporations** – a person who worked for the government or a government corporation or any of its instrumentalities.
- d. **Self-employed without any paid employee** – a person who worked for profit or fees in own business, farm, profession or trade without any paid employee.
- e. **Employer in own family-operated farm or business** – a person who worked in his own business, farm, profession or trade, and had one or more regular paid employees, including paid family members.

- f. **Worked with pay in own family-operated farm or business** – a person who worked in own family-operated farm or business, and receives cash or a fixed share of the produce as payment for his service.
- g. **Worked without pay on own family-operated farm or business** – a member of the family who worked without pay in a farm or business operated by another family member. The room and board and any cash allowance given as incentives are not counted as compensation for these family workers.

Family expenditures – The expenses or disbursements made by the family purely for personal consumption. Therefore, it excludes all expenses in relation to farm or business operations, investment ventures, purchase of real property and other disbursements, which do not involve personal consumption.

Social Protection – Constitutes policies and programs that seek to reduce poverty and vulnerability to risks and enhance the social status and rights of the marginalized by promoting and protecting livelihood and employment, protecting against hazards and sudden loss of income, and improving people's capacity to risks (Social Development Committee Resolution No.1 Series of 2007).

Pantawid Pamilyang Pilipino Program (4Ps) – The 4Ps is a poverty reduction program that provides conditional cash transfers (CCT) to poor households with pregnant women and children 0-14 years old on the condition that they comply with specific health, nutritional and educational conditionalities.

Proportion of families with access to safe water supply – The ratio of the number of families who access water from community water system (piped into their dwelling, yard/plot or public tap) and protected wells to the total number of families.

Proportion of families with sanitary toilet – The ratio of the number of families with flush toilet (either owned or shared) and close pit to the total number of families.

Proportion of families with owned or owner-like possession of housing units – The ratio of the number of families with housing unit owned or amortized to the total number of families.

Proportion of families with houses made of strong materials – The ratio of the total number of families of those families with houses having roofs and outer walls made of strong materials such as galvanized iron/aluminum, tile, concrete, bricks stone and asbestos.

Proportion of families with gainfully employed family head – The ratio of the number of families with a family head who is gainfully employed to the total number of families.

Proportion of families with gainfully employed members 18 years old and over – The ratio of the number of families with gainfully employed members 18 years old and over to the total number of families with members 18 years old and over.

Proportion of families with children 6-11 years old in elementary – The ratio of the number of families with children 6-11 years old attending elementary school to the total number of families with children 6-11 years old.

Proportion of families with children 12-15 years old in high school – The ratio of the number of families with children 12-15 years old attending high school to the total number of families with children 12-15 years old.

Proportion of families with members 5-17 years old who are working – The ratio of the number of families with children 5-17 years old who are working to the total number of families with children 5-17 years old.

HIGHLIGHTS OF THE 2011 APIS RESULTS

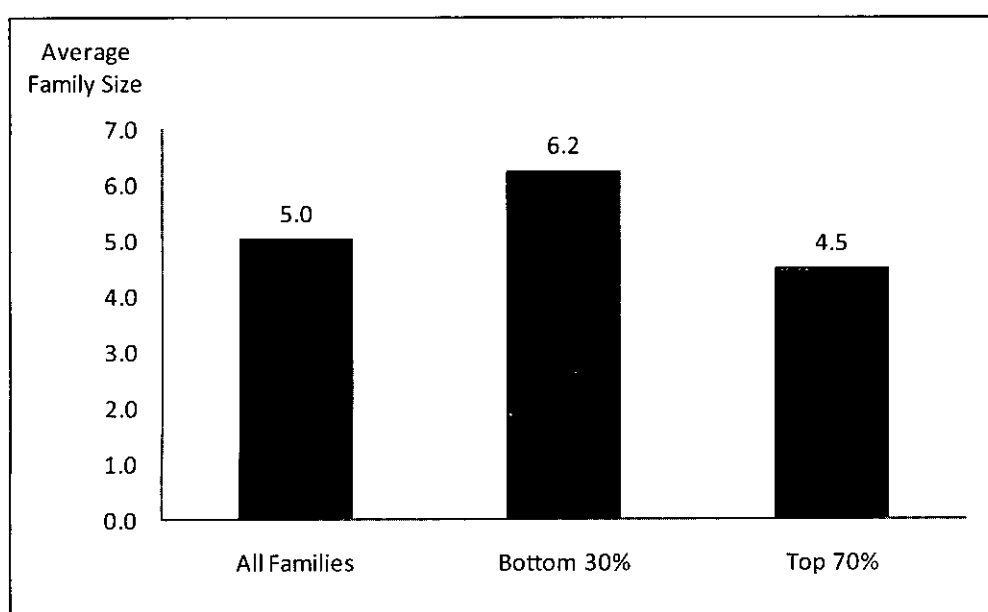

In this report, families were classified as poor or non-poor by grouping them into two income strata according to their per capita income. Families who fall at the bottom 30% percent were considered as poor, while those at the top 70% were classified as non-poor. Findings from the survey are presented using the bottom 30% and top 70% income strata.

A. FAMILY SIZE AND CHARACTERISTICS OF FAMILY HEADS

A.1 Average Family Size

Information on the family size and characteristics of family heads may indicate the economic status of a family. As of July 2011, there was an estimated 19.1 million families in the country. The average family size in the same period was five persons (Table 1). Poor families were larger than non-poor families. The average family size of poor families across regions ranged from 5.7 persons per family in Central Visayas to 6.8 persons per family in the NCR.

FIGURE 1. Average Family Size by Income Stratum, Philippines 2011

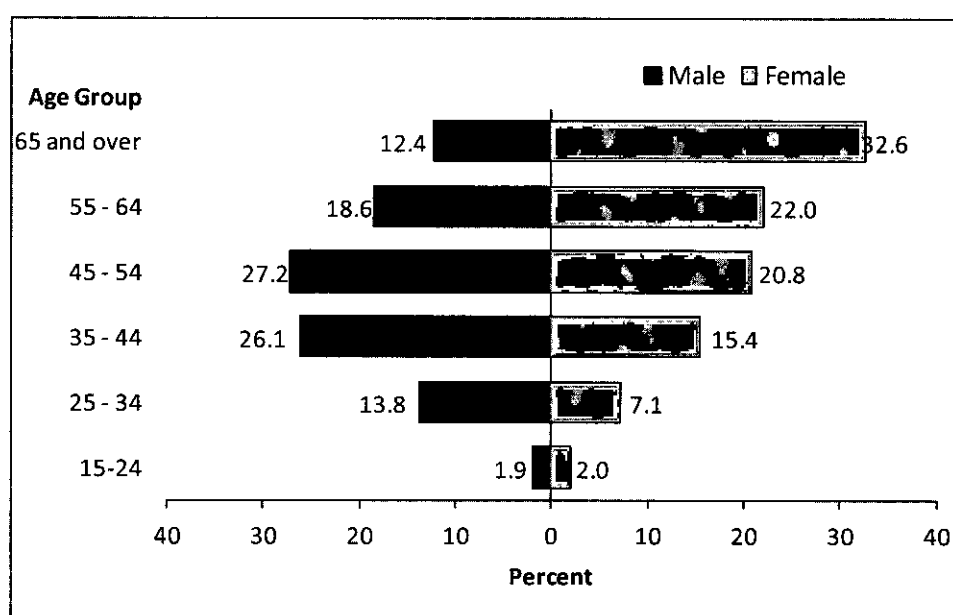

A.2 Age and Sex of Family Heads

Eight in ten family heads (78.0 %) were males. The survey also showed that female family heads were generally older than the male family heads. About 55 percent of the female family heads were aged 55 and over compared to 31 percent among the male heads (Table 2). A family head is an adult member who is responsible for the care and organization of the family or generally who is regarded as such by the family members.

Heads among the non-poor families were generally older than the heads of poor families. Four in ten heads (39.3 %) of the heads of non-poor families were aged 55 years and over compared to 29 percent among the heads of poor families.

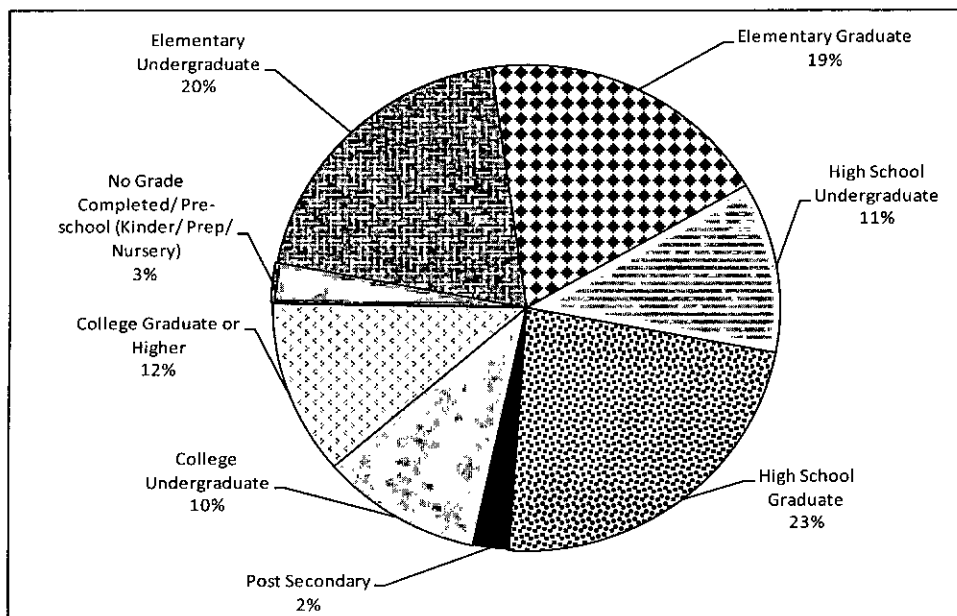

FIGURE 2. Family Heads by Age and Sex, Philippines 2011

A.3 Educational Attainment of Family Heads

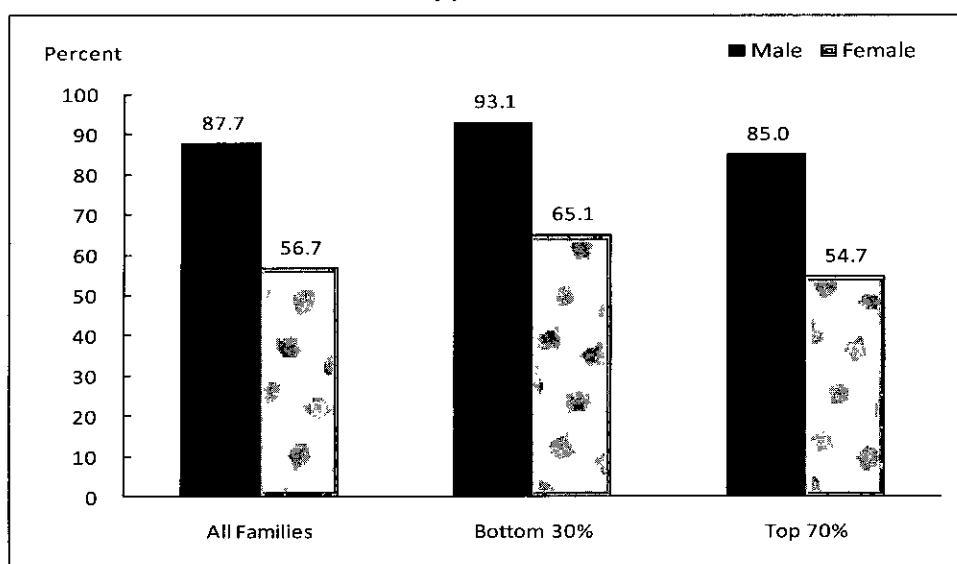

Seven in ten of the family heads (73.2 %) did not reach college, that is, 39 percent had attained or completed elementary education, while 34 percent had reached or finished high school. Those who were college undergraduates comprised 10 percent and academic degree holders, 12 percent (Table 2).

The survey also showed a higher proportion of female heads who finished college or higher level of education compared to their male counterpart. One in ten male heads (10.4 %) finished college or higher level of education while 16 percent of the total female heads attained that level of education.

FIGURE 3. Family Heads by Highest Grade Completed, Philippines 2011

A.4 Gainful Employment of Family Heads

In 2011, four out of five (80.9 %) family heads were gainfully employed (Table 2) or had a job or business at anytime from January 1 to June 30, 2011. Male heads who were gainfully employed comprised 88 percent of the total male heads. The corresponding proportion among female heads is lower at 57 percent.

FIGURE 4. Gainfully Employed Heads by Sex and Income Stratum, Philippines 2011

The proportion with gainful employment among family heads of poor families was higher (89.2 %) compared to that for non-poor family heads (77.3 %).

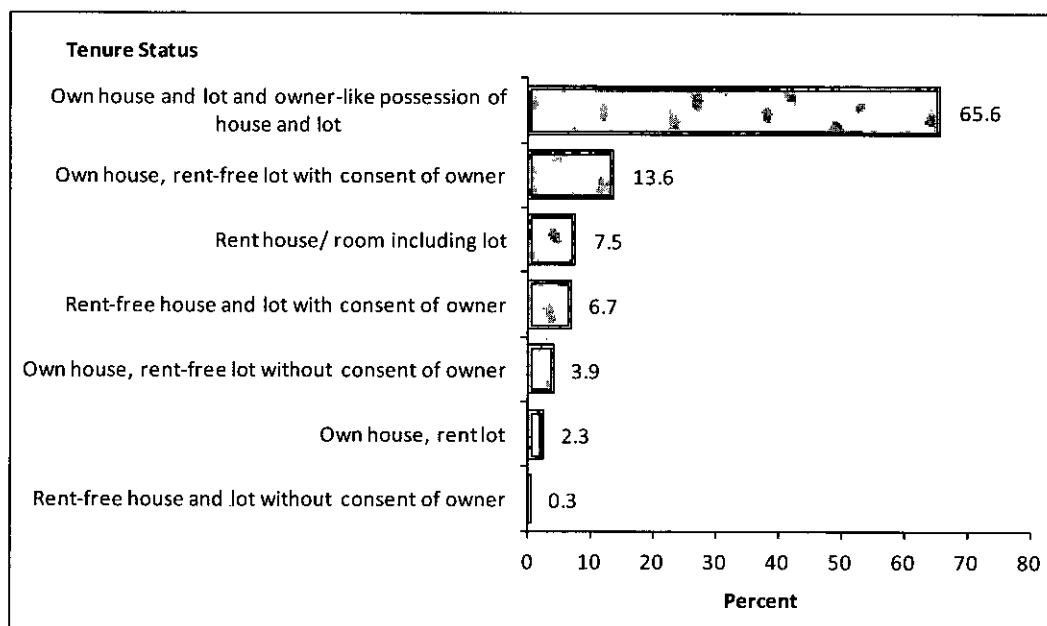

B. HOUSING CHARACTERISTICS

B.1 Tenure Status of Housing Unit and Lot

The data on family's housing characteristics can indicate the health and economic well being of families. In the 2011 APIS, the tenure status of housing unit and lot was asked.

In 2011, two-thirds (65.6 %) of all in the country own the house and lot they occupied (Table 3). The remaining 34 percent occupied houses and lots under the following tenure: own house, rent-free lot with consent of owner (13.6 %), rent house/room including lot (7.5 %), rent-free house and lot with consent of owner (6.7 %), own house, rent-free lot without consent of owner (3.9 %), own house, rent lot (2.3 %), or rent-free house and lot without consent of owner (less than one percent). Among the poor families, 58 percent owned their house and lot, while among the non-poor families, the proportion is higher at 69 percent.

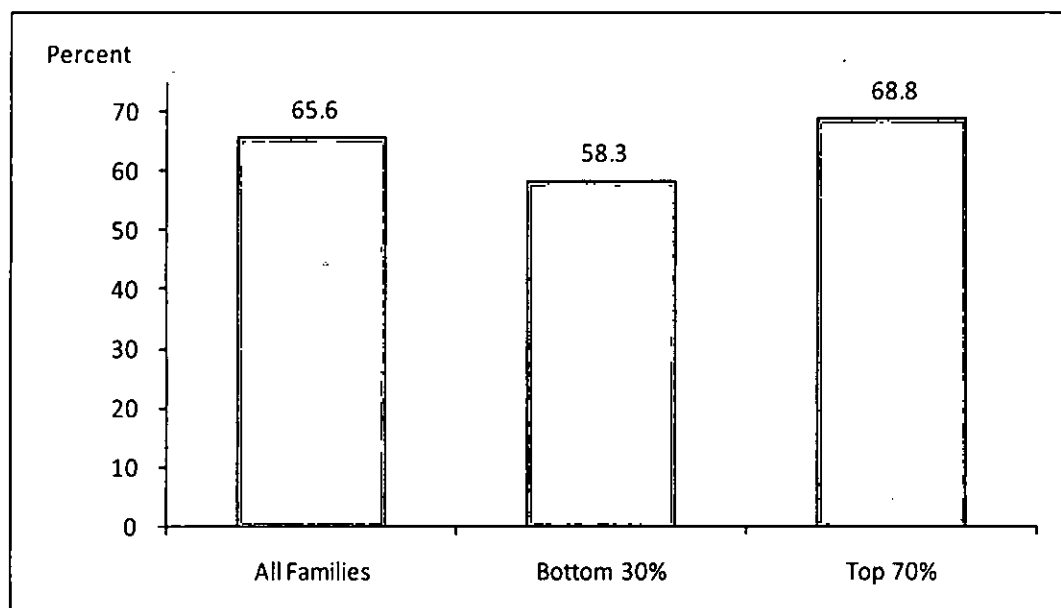

FIGURE 5. Families by Tenure Status of Housing Unit and Lot, Philippines 2011

In seven out of 17 regions, the proportion of families who owned the house and lot that they occupied was higher than the national level with 66 percent. In five of these seven regions, at least four in five families (at least 80%) owned the house and lot that they occupied. These were Ilocos Region (87.3 %), Cagayan Valley (85.8 %), Cordillera Administrative Region (81.7 %), ARMM (81.4 %) and Central Luzon (81.0 %). The other two regions registering a proportion of

families owning the house and lot that they occupy higher than the national level are MIMAROPA (71.5 %) and CALABARZON (67.0 %). Among the regions, NCR had the highest proportion of families which owned the house but occupied the lot rent-free without the consent of the owner (11.3 %).

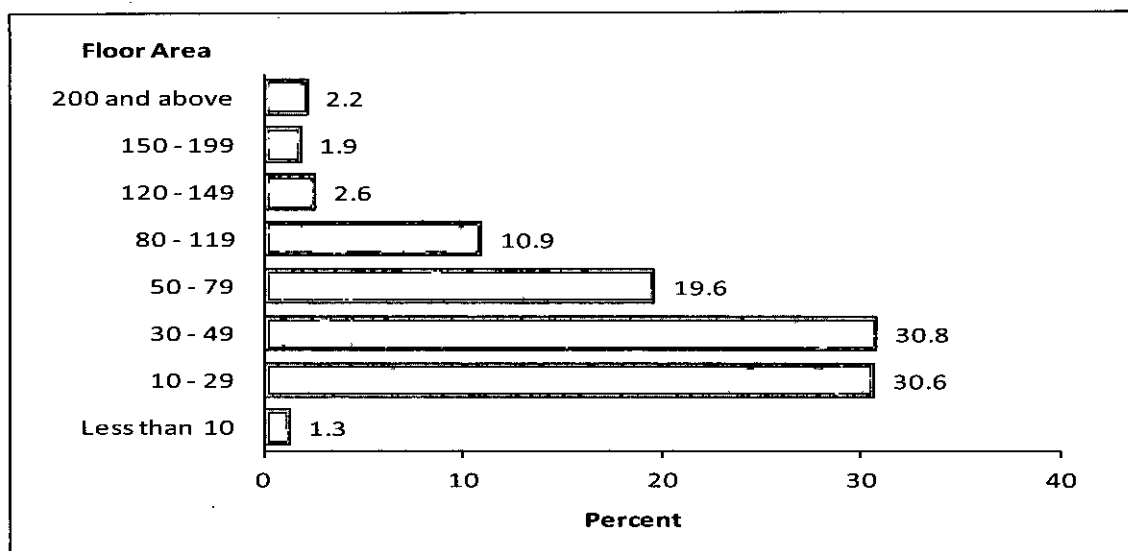

FIGURE 6. Percentage of Families with Own or Owner-like Possession of Housing Unit and Lot by Income Stratum, Philippines 2011

B.2 Floor Area of Housing Unit

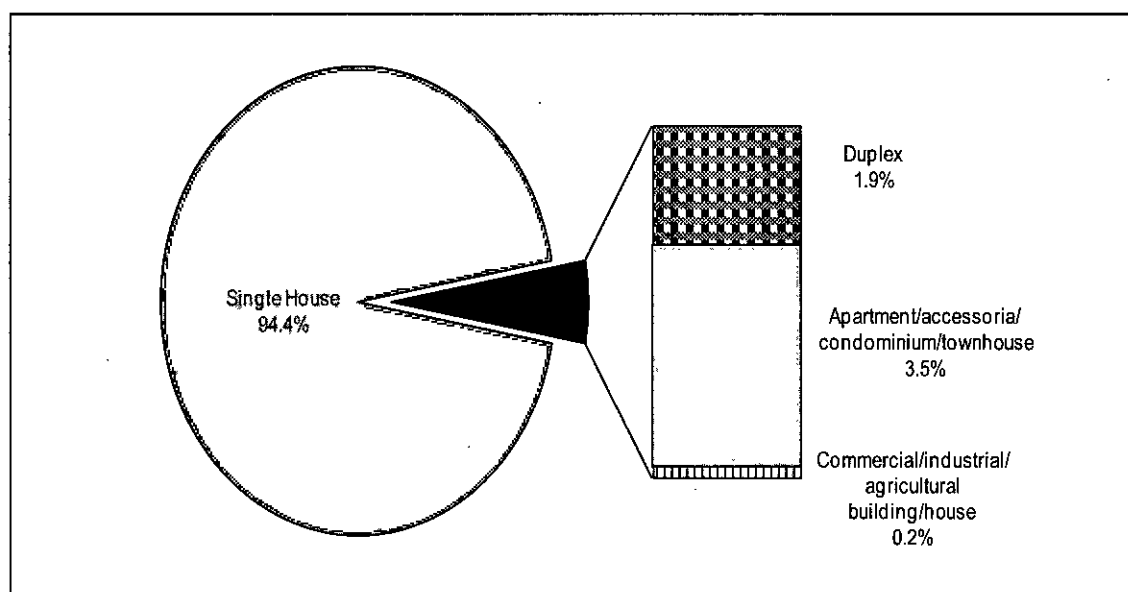

Two-thirds of families (62.7 %) were residing in housing units with a floor area of less than 50 square meters (sq. m.). Families residing in housing units with a floor area of less than 10 sq. m. comprised less than 2 percent, families living in housing units with a floor area ranging from 10 to 29 sq. m., 31 percent, and those with 30 to 49 sq. m., 31 percent (Table 4).

Among the poor families, almost half (47.5 %) occupied housing units with a floor area of 10 to 29 sq. m. One out of three poor families was living in a housing unit with a floor area of 30 to 49 sq. m. Non-poor families were living in housing units with a larger floor area. Forty-five percent of the non-poor families lived in housing units with a floor area of at least 50 sq. m. compared to 19 percent of poor families.

FIGURE 7. Families by Floor Area of Their Housing Unit, Philippines 2011

B.3 Type of Building/House

Ninety-four percent of Filipino families were residing in single houses (Table 5). The rest dwelt in apartments, accessoria, condominiums or townhouses (3.5 %), duplex houses (1.9 %), or commercial, industrial, agricultural buildings or houses (less than one percent). In NCR, 13 percent of families were living in apartments, accessoria, condominiums or townhouses. Families living in single houses are about 83 percent.

FIGURE 8. Families by Type of Building/House where They Reside, Philippines 2011

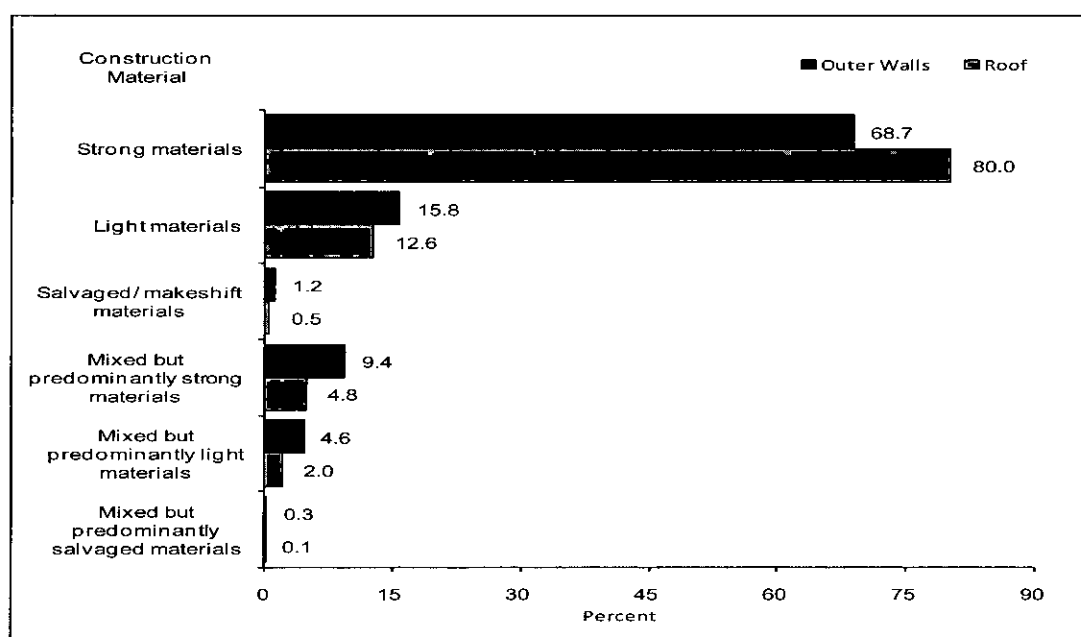

B.4 Construction Materials of the Roof and Outer Walls

The majority of Filipino houses had roofs and outer walls made of strong materials. About 80 percent of families had houses with strong roofs and 69 percent had strong outer walls (Tables 6 and 7). Strong materials for roof and outer walls refer to galvanized iron or aluminum, tile, concrete, brick stone or asbestos, while light materials refer to cogon, nipa or anahaw.

Among the regions, CAR recorded the highest proportion of families living in houses with strong roofs and outer walls (95.0 % and 89.1 %, respectively). On the other hand, ARMM had the lowest proportion of families living in houses that used strong materials for their roofs (59.5 %), and Western Visayas (43.9 %) for the outer walls.

As expected, a larger proportion of non-poor families had housing units made of strong roofs (87.4 %) and outer walls (78.3 %) compared to the poor families (62.8 % and 46.4 %, respectively). One in four poor families was living in a house with roof made of light materials (27.3 %), and three in 10 families (32.4 %) were living in houses with outer walls made of light materials.

FIGURE 9. Families by Type of Construction Materials of the Roof and Outer Walls of the Building they Occupy, Philippines 2011

B.5 Electricity

Not all families had electricity in their homes. In 2011, 87 percent of the 19 million families in the country had electricity in their homes (Table 8). Among the regions, NCR had the

highest proportion of families who had electricity in their homes with 99 percent of the total families in the said region having electricity at home, followed by Central Luzon (95.9 %), CALABARZON (95.0 %), and Ilocos Region (94.3 %). ARMM had the lowest proportion of families with electricity in their homes (62.3 %).

The proportion of the non-poor families and poor families who had electricity in their homes remarkably differs. At the national level, 94 percent of the non-poor families had electricity in their homes compared to 70 percent among the poor families.

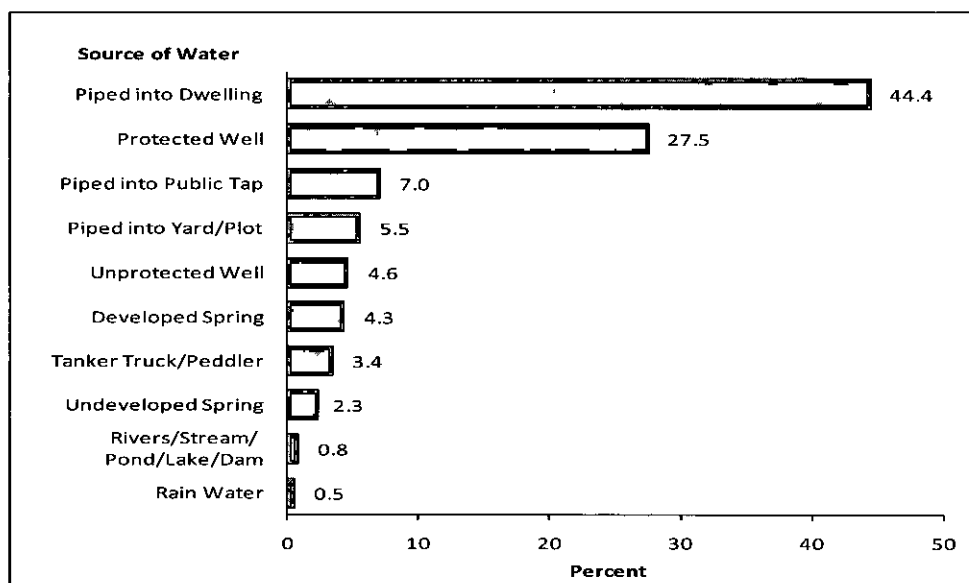

B.6 Main Source of Water Supply

The data on main source of water supply provide information on the proportion of families with access to safe water supply. Considered as clean and safe sources of water supply are community water system, which may be piped into dwellings or into yards, or piped into public taps, and protected well.

Eighty-four percent of the total families had access to a safe source of water supply (Table 8). The remaining 16 percent of families obtained their water from sources considered unsafe, such as unprotected well (4.6 %), developed spring (4.3 %), undeveloped spring (2.1 %), river, stream, pond, lake or dam (less than one percent), rainwater (less than one percent), and tanker truck or peddler (3.4 %). Seven out of ten poor families had access to safe water compared to nine in ten non-poor families.

Five regions in Luzon had over 90 percent of their families with access to safe water. These are Central Luzon (94.5 %), NCR (94.4 %), Ilocos (93.9 %), CALABARZON (92.7 %) and Cagayan Valley (91.6 %). In contrast, only 52 percent of families in ARMM had access to a safe water source.

FIGURE 10. Families by Main Source of Water Supply, Philippines 2011

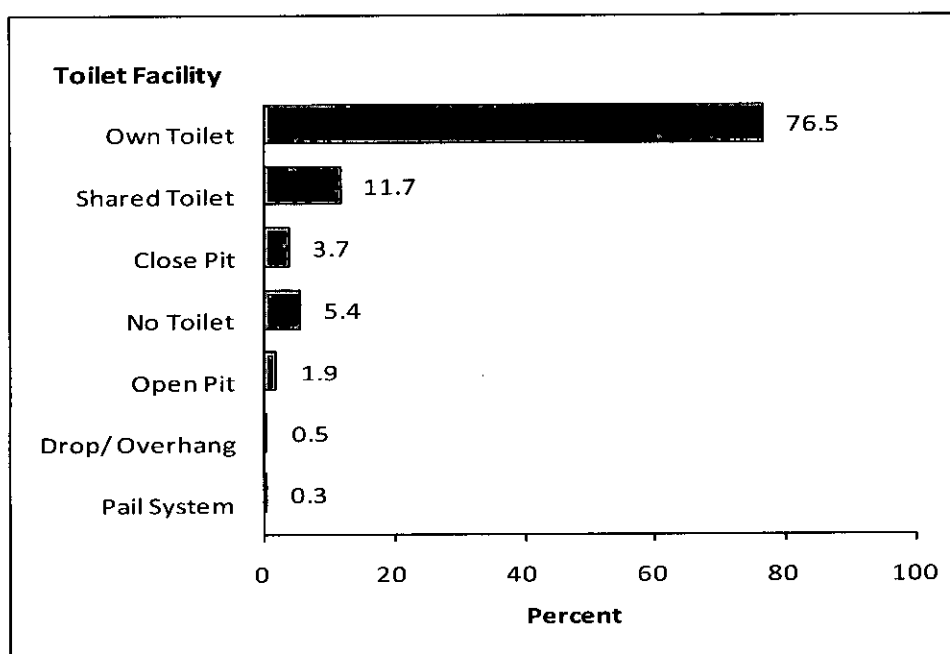

B.7 Toilet Facility

Data about the toilet facility used by the family provide indicators of health and sanitation status of families. One of such indicators is the proportion of families who used a sanitary toilet. For this survey, sanitary toilet refers to flush toilet (either owned or shared) and close pit type of toilet facility.

At the national level, the proportion of Filipino families with sanitary toilets was 92 percent (Table 9). Other families used open pit (1.9 %), drop or overhang (less than one percent) and pail system (less than one percent), which are considered unsanitary toilets. In the Philippines, there were 5 percent or about 1 million families with no toilet facilities in their homes.

Poor families were more likely to use an unsanitary toilet than non-poor families. In 2011, the percentage of poor families without a sanitary toilet at home was 19 percent compared to 3 percent among the non-poor families.

FIGURE 11. Families by Type of Toilet Facility Used, Philippines 2011

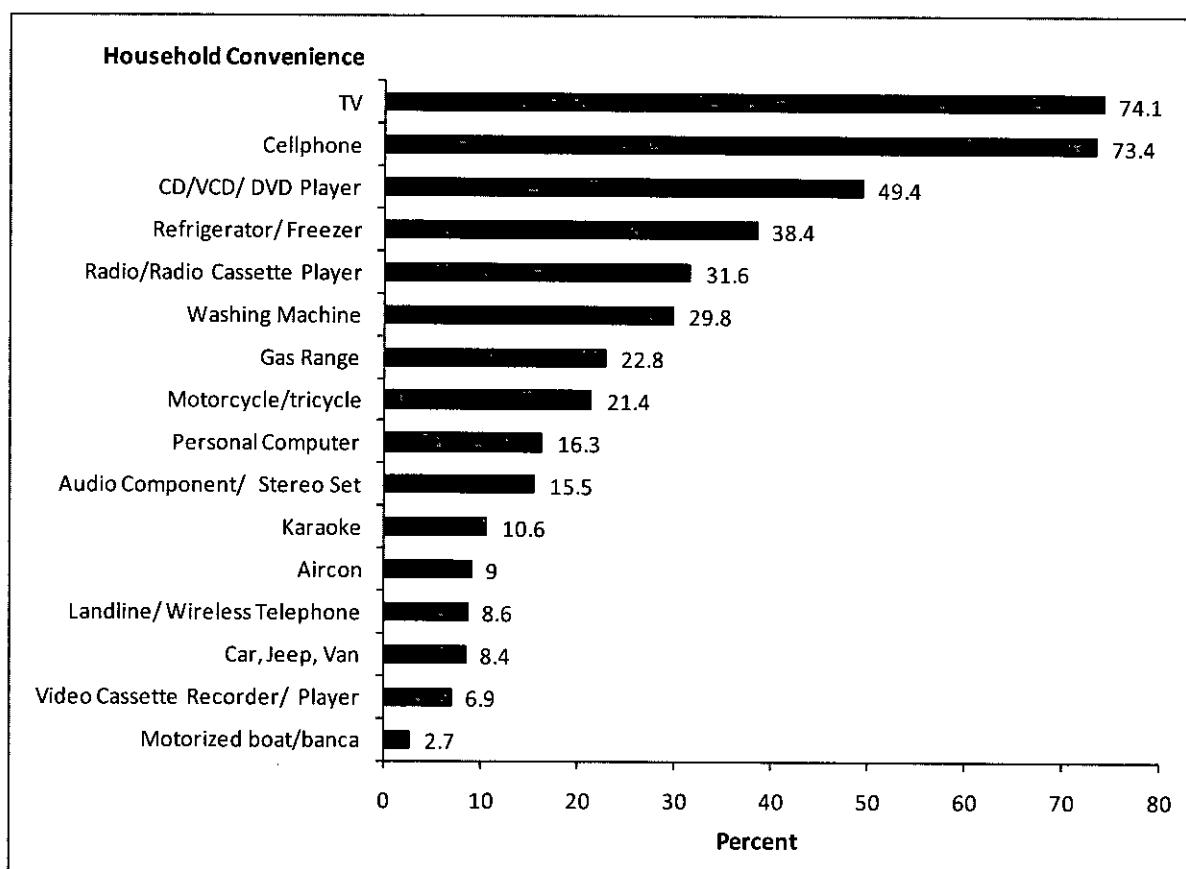

B.8 Household Conveniences

The data on ownership of family conveniences provides proxy indicators of the economic status of the family. Non-poor families tend to own household conveniences than the poor families.

Television (TV) was the most common household appliance in Filipino homes, followed by cellphones. Three out of four families (74.1%) owned TV while a similar percentage (73.4%) had a cellular phone (Table 10). Among non-poor families, those with TV made up 85 percent, while among poor families, 48 percent. Meanwhile, among non-poor families, those with at least one member having a cellular phone comprised 83 percent, while among poor families, 52 percent.

FIGURE 12. Percentage of Families Owning Household Conveniences, Philippines 2011

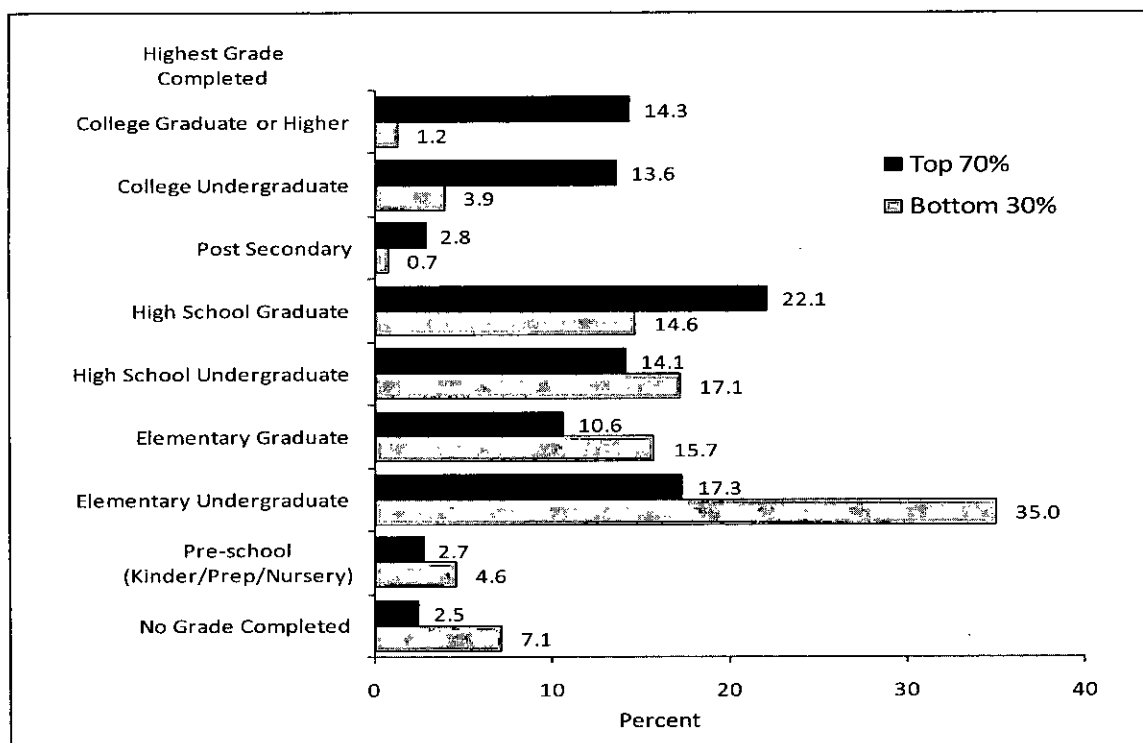

C. EDUCATION

C.1 Highest Grade Completed of Population 5 Years and Over

Inadequate education is associated with poverty. Members of non-poor families tend to be more highly educated than members of the poor families. Persons who had attained a college level or a higher level of education comprised 28 percent among non-poor families compared to 5 percent among poor families. Those who were high school graduates in non-poor families comprised 22 percent, while in poor families, 15 percent. Across regions, persons

who had attained college or higher level of education in non-poor families comprised from 22 percent (ARMM) to 35 percent (CAR). For poor families, the percentage ranged from 4 percent (Davao Region) to 10 percent (CAR) (Table 11).

FIGURE 13. Population 5 Years Old and Over by Highest Grade Completed and Income Stratum, Philippines 2011

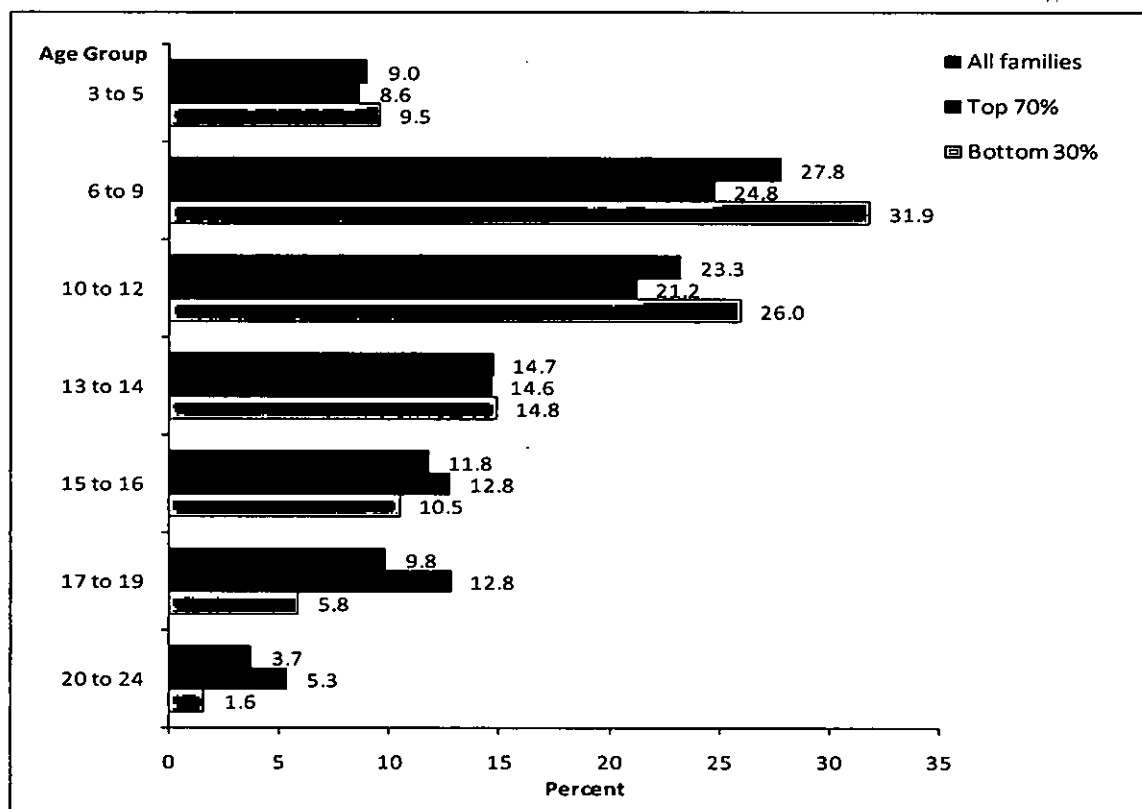

C.2 Attendance in School of Persons 3 to 24 Years Old

In the survey, the attendance in school by family members 3 to 24 years old was asked. The cut-off age for school attendance is 3 years old to measure attendance of children in early childhood learning schools like nursery, kindergarten and preparatory schools. School refers to formal schools, including vocational/technical schools offering post-secondary courses. In this survey, a person who was enrolled in the school year covering June 2011 to March 2012 is considered as attending school.

In 2011, of the estimated 45.4 million population 3 to 24 years old, two-thirds (67.1 %) were enrolled or attending school during school year 2011-2012 (Table 12). Similar level of school attendance was recorded among the members 3 to 24 years old of the poor and the non-poor families. By sex, of the total females of this specified age group, 68 percent attended school during the said school year, while among the males, 66 percent.

Of the total number of persons aged 3 to 24 years who were attending school, 28 percent were children aged 6 to 9 years. Those in age group 10 to 12 years comprised 23 percent, and those aged 13 to 16 years, 27 percent.

FIGURE 14. Population 3 to 24 Years Old Who Were Attending School during School Year 2011-2012 by Schooling Age and Income Stratum, Philippines 2011

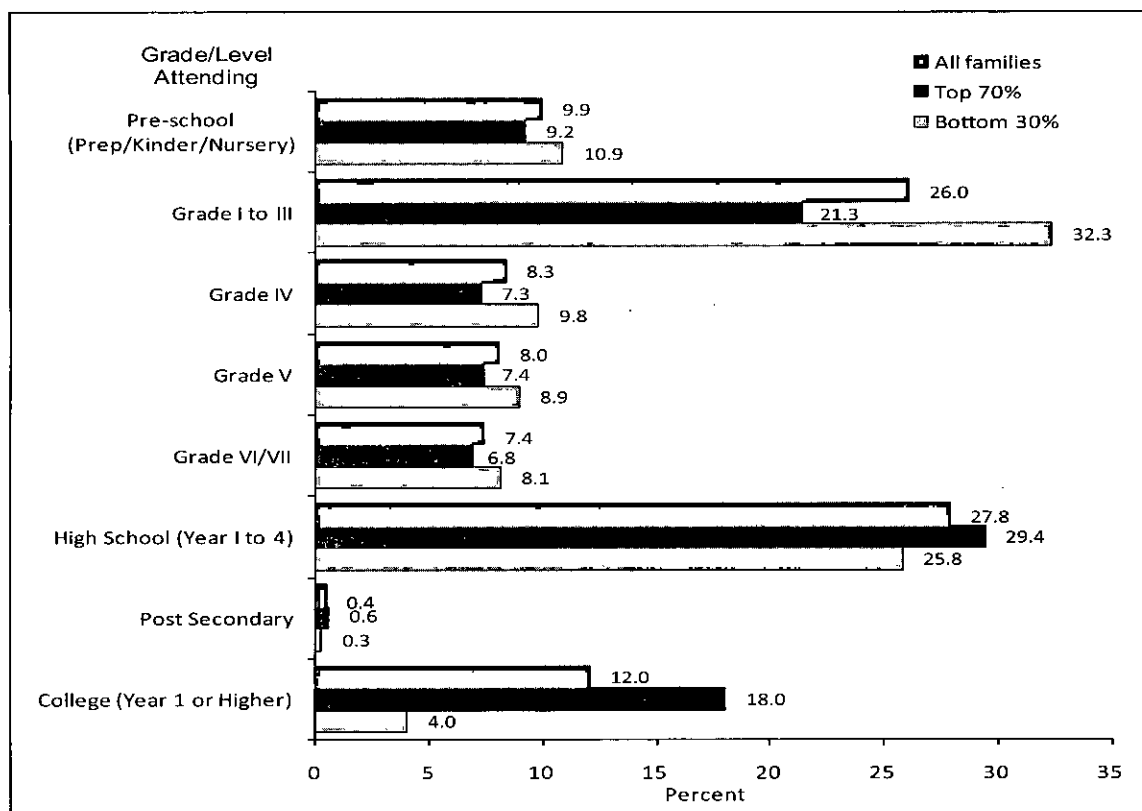

Among the regions, CAR registered the highest percentage of school attendees at 71 percent while ARMM had the lowest percentage at 63 percent.

Persons of school age in the non-poor population were more likely to pursue higher education compared to those in the poor population. While 18 percent of the school age population in the non-poor population were attending college or post graduate schools, the corresponding proportion in the poor population is 4 percent (Table 13).

In ten out of seventeen regions, the proportion of persons of school age who were attending college was below the national average of 12 percent. These were Western Visayas (11.6 %), Northern Mindanao (11.4 %), Davao (11.2 %), Eastern Visayas (11.3 %), Central Visayas (10.6 %), Zamboanga Peninsula (9.6 %), Bicol (9.8 %), Caraga (9.2 %), MIMAROPA (9.4 %) and SOCCSKSARGEN (9.1 %).

FIGURE 15. Population 3 to 24 Years Old Who Were Attending School during School Year 2011-2012 by Grade/Year Level Attending and Income Stratum: Philippines 2011

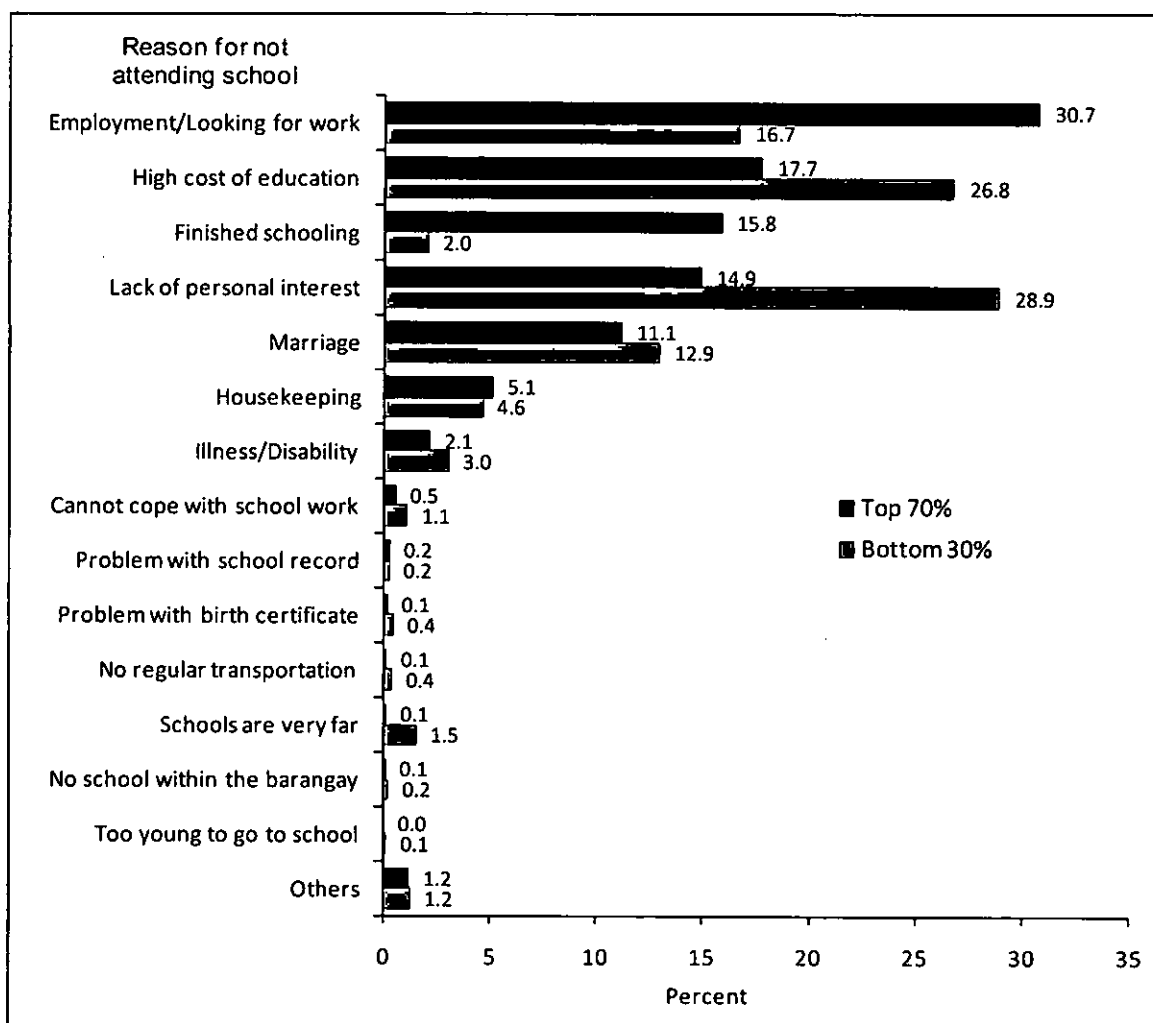

C.3 Reasons for not Attending School

There were approximately 12 million persons 6 to 24 years old who were out of school in school year 2011-2012 (June 2011 to March/April 2012) (Table 14).

At the national level, the most common reasons for not attending school were employment or looking for work (24.9 % of those not attending school), high cost of education (21.5 %) and lack of personal interest (20.7 %). These were also the most common reasons reported for those not attending school in the poor population: lack of personal interest (28.9 %), high cost of education (26.8 %), and employment or looking for work (16.7 %). While among the non-poor population, employment or looking for work (30.7 %), high cost of education (17.7 %), and finished schooling (15.8 %) were the main reasons for not attending school.

Among the males aged 6 to 24 years, lack of personal interest (28.9 %) and employment/looking for work (28.8 %), and high cost of education (21.5%) were the top reasons why they were not attending school. A slightly different pattern was observed among females aged 6 to 24 years were high cost of education (21.5 %), employment/looking for work (20.5 %), and marriage (18.4 %) were the reasons why they were not attending school.

FIGURE 16. Population 6 to 24 Years Old Who Were Not Attending School During School Year 2011-2012, by Main Reason for Not Attending School and Income Stratum, Philippines 2011

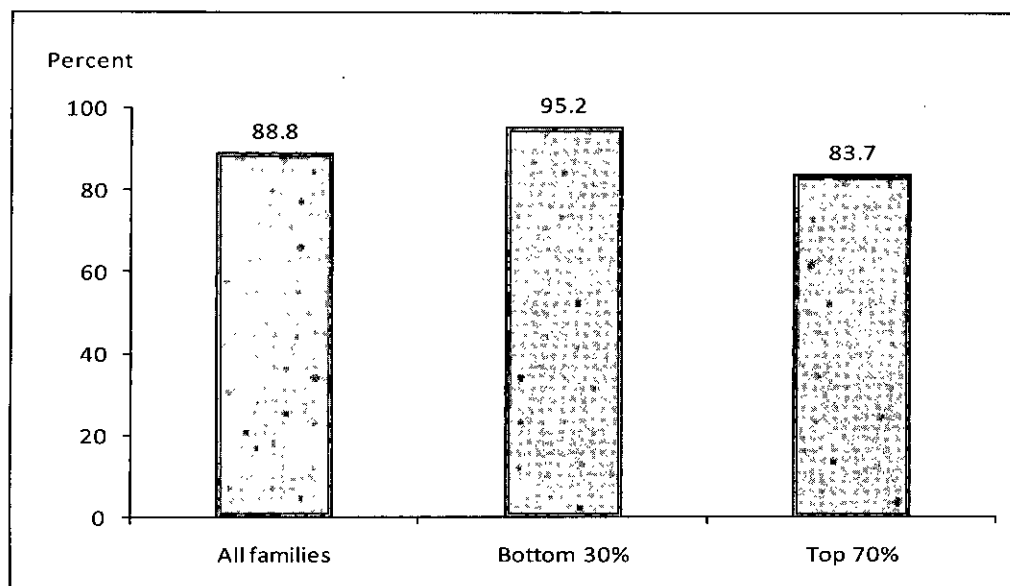

C.4 Children in Elementary Grade

A total of 8.1 million families with children aged 6 to 11 years was recorded in the survey. Of this number, 7.2 million or 89 percent had children who were enrolled in elementary grades. The proportion of families with children aged 6 to 11 years who were enrolled in elementary grades to the total families with children belonging to this age group was higher among the poor families (95.2 %) than the non-poor families (83.7 %).

Among the regions, NCR posted the lowest percentage (79.9 %) of families with children 6 to 11 years old who were enrolled in elementary. Bicol and Zamboanga Peninsula registered the highest percentage at 95 percent each.

FIGURE 17. Percentage of Families with Children 6 to 11 Years Old Who Were in Elementary Grades, by Income Stratum, Philippines 2011

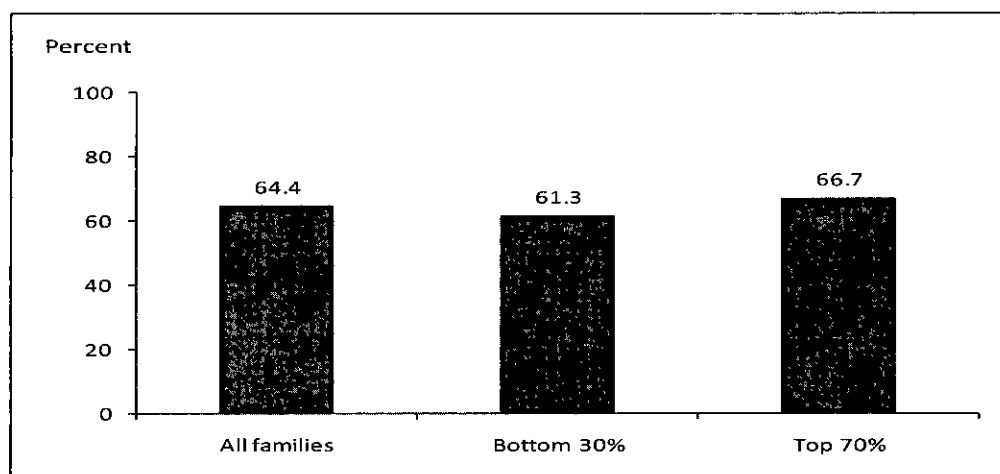

C.5 Children in High School

Of the 6.5 million families with children aged 12 to 15 years, 64 percent or 4.2 million families were reported having children in this age bracket who were in high school (Table 16). Among non-poor families with children aged 12 to 15 years, 67 percent were with children of this age group who were enrolled in high school, while it was 61 percent among poor families.

Three Luzon regions namely Ilocos, Cagayan Valley, and NCR, registered the highest proportion of families with children 12 to 15 years old attending high school with corresponding percentages of 73 percent, 71 percent, and 68 percent.

FIGURE 18. Percentage of Families with Children 12 to 15 Years Old Who Were in High School by Income Stratum, Philippines 2011

D. ECONOMIC CHARACTERISTICS

D.1 Families with Working Members 18 Years Old and Over

In the 2011 APIS, a family member was considered employed if he or she had worked or had a job or business at anytime during the reference semester, that is, from January 1 to June 30, 2011. A work is defined as any economic activity that a person does for pay, profit or without pay on family farm or enterprise, or an activity done by a farm operator or member of his family on another's farm on "exchange labor" arrangement.

Of the total 19.1 million families with at least one member aged 18 years and over, about 93 percent or 17.8 million were gainfully employed during the reference period. In Eight out of seventeen regions, the proportion of families with aged 18 years and over who were gainfully employed was higher than the national level. These were ARMM (98.7 %), Zamboanga Peninsula (96.5 %), SOCCSKSARGEN (95.6 %), Davao (95.0 %), Northern Mindanao (94.8 %), Caraga and MIMAROPA (94.7 % each), and Cagayan Valley (94.2 %) (Table 17).

In all regions, the proportion of families with members aged 18 years and over and with gainfully employed members of these ages was higher among the poor families than the non-poor families. This is because poor families than non-poor families are more likely to have members 25 years and over who were engaged in any economic activity and members aged 18 to 24 who were employed rather than in schools (Figures 19 and 20).

In regions other than the NCR, 67 percent of the total poor families with members aged 18 to 24 years had members who were in this age group who were gainfully employed, while among the non-poor families, the proportion was lower at 57 percent (Figure 19). Meanwhile, the proportion of families with members aged 18 to 24 years who were attending school at anytime during the school year 2011 to 2012 was similar for both the poor families (18.6 %) and non-poor families (20.4 %).

The survey also revealed that of the poor families with members aged 25 years and above, 96 percent had family members in this age group who were engaged in an economic activity during the semester prior to the survey. The proportion for non-poor families was lower at 90 percent. Figure 20 shows the corresponding percentages for the NCR, suggesting a higher participation in economic activities by members aged 18 to 24 years in non-poor families compared to poor families, and showing similar proportions of poor and non-poor families with members aged 25 years and above who were gainfully employed.

FIGURE 19. Among Families with Members 18 to 24, the Percentage with Members 18 to 24 Who Were Studying and Percentage with Members 18 to 24 Who Were Gainfully Employed, and Among Families with Members 25 years and Over, the Percentage with Members 25 Years and Over Who Were Gainfully Employed, by Income Stratum, Regions Other than NCR 2011

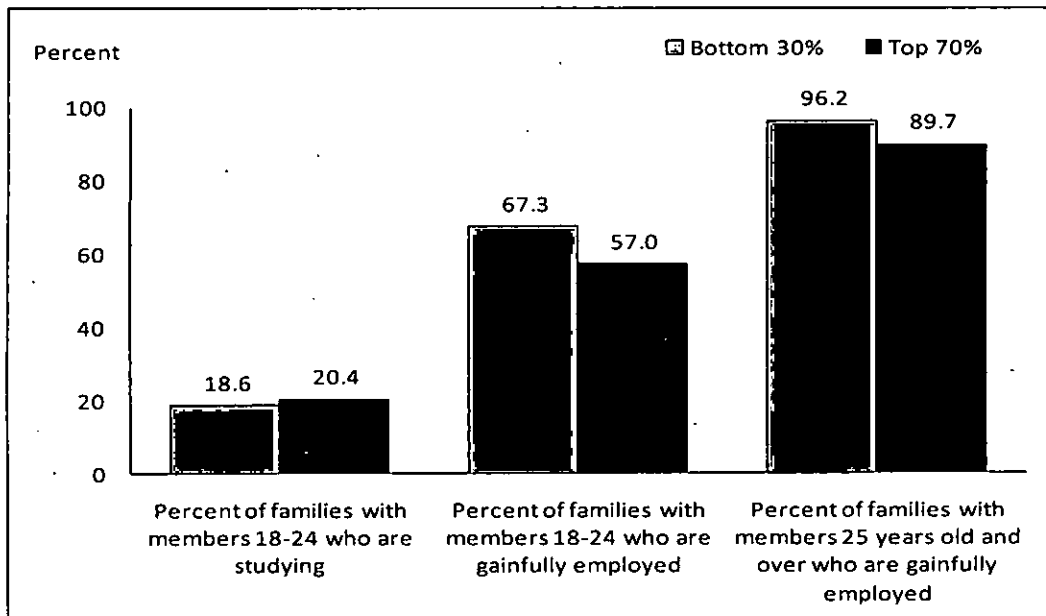

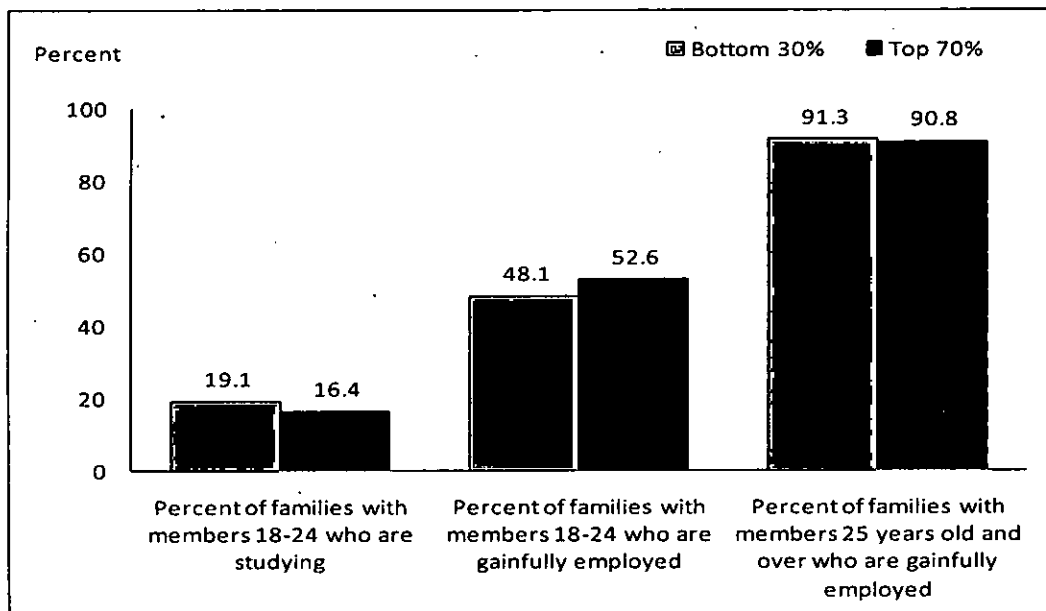

FIGURE 20. Among Families with Members 18 to 24, the Percentage with Members 18 to 24 Who Were Studying and Percentage with Members 18 to 24 Who Were Gainfully Employed, and Among Families with Members 25 years and Over, the Percentage with Member 25 Years and Over Who Were Gainfully Employed, by Income Stratum, NCR 2011

D.2 Families with Working Children 5-17 Years Old

The Labor Code of the Philippines specifies that no child below 18 years old shall be employed except when he/she works directly under the sole responsibility of his parents/guardian and his/her employment does not in any way interfere with his/her schooling. Although the survey results would not show whether the conditions stated above are met, it would show the proportion or number of families with children below 18 years old who are working.

Of the 12.3 million families with members aged 5 to 17 years, 11 percent or 1.4 million families were reported to have working children (Table 18). Among the poor families with members 5 to 17 years old, 19 percent had working children while for the non-poor families, 7 percent had working children.

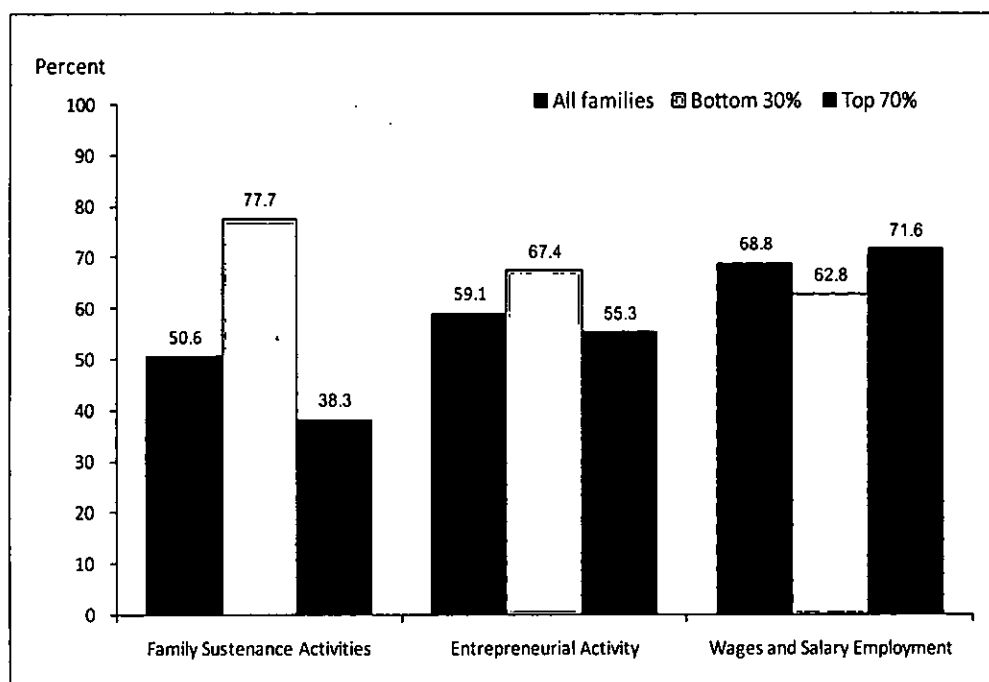

Among the regions, Northern Mindanao had the highest proportion of families with members aged 5 to 17 years old who were working with 22 percent out of the total families with members 5 to 17 years old in the said region, followed closely by Caraga (21.1 %). On the contrary, NCR recorded the lowest proportion of families with working children with 3 percent.

D.3 Families Engaged in Any Economic Activity

There are three major economic activities that contribute to a family's income. These are wages and salary, family sustenance activities and entrepreneurial activities. Other sources of income include net share of crops, cash receipts both from abroad and domestic source, rentals, interest, pension, dividends, etc.

In 2011, the number of families with at least one member reported to have engaged in any type of economic activity in the 6 months preceding the survey was estimated at 18.3 million (Table 19). Wage and salary workers accounted for 69 percent of such families; those engaged in entrepreneurial activity, 59 percent; and those engaged in family sustenance activity, 51 percent. For this report, more than one economic activity can be reported for one family.

FIGURE 21. Percentage of Families Engaged in any Type of Economic Activity, by Income Stratum, Philippines 2011

Among the poor families engaged in an economic activity in the 6 months prior to the survey, 78 percent were involved in family sustenance and 67 percent in entrepreneurial activities. Families with wage and salary earning members comprised 63 percent. While among the non-poor families, the largest proportion of families with members engaged in an economic activity were those with members who were salary and wage earners (71.6 %).

Among the families engaged in an economic activity in Cagayan Valley, 83 percent were involved in family sustenance activities. In ARMM, 90 percent of families engaged in an economic activity had entrepreneurial activities. A large proportion of the families in all regions had members who were salary and wage workers, except for ARMM with only 18 percent.

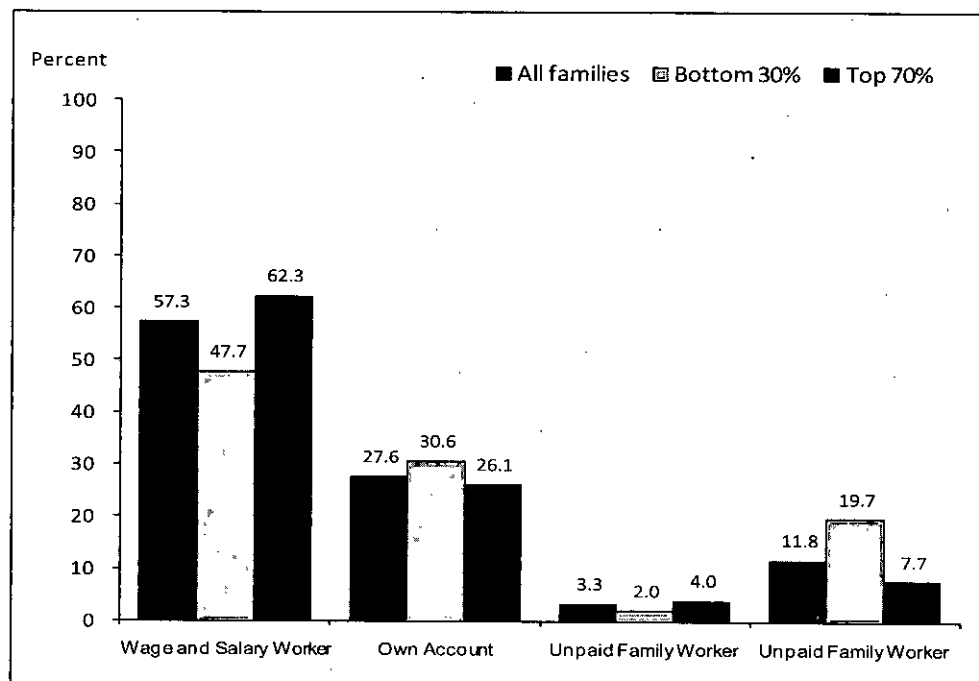

D.4 Employed Persons 5 Years Old and Over by Class of Worker

Among employed persons in 2011 which numbered around 40.3 million, the largest proportion (57%) were wage and salary workers, followed by self-employed without any employee at 28 percent (Table 20). Wage and salary workers include those who worked for private households, private establishments and government offices and those who worked with pay in own family-operated farm or business. Unpaid family workers comprised of 12 percent. Employer in own family-operated farm or business had the least percentage at 3 percent. Similar pattern was observed in all regions except in NCR, Cagayan Valley and ARMM.

In ARMM, 56 percent of employed persons were self-employed without any employee and 28 percent employed persons were unpaid family workers. Only 15 percent were wage and salary workers.

The largest proportion of poor population and non-poor population were wage and salary workers with corresponding percentages of 48 percent and 62 percent.

FIGURE 22. Employed Persons 5 Years Old and Over by Class of Worker and Income Stratum: Philippines 2011

E. FAMILY'S HEALTH

E.1 Illness/Injury Work-Related

There were approximately 12.7 million persons 5 years old and over or 15 percent of the population 5 years and older who got ill or injured one month prior to the conduct of the survey in 2011 (Table 21). Of this number, 14 percent had work-related illness/injury.

Of the population 5 years and older who got ill or injured one month before the survey, the proportion of those whose ailments or injuries were work-related was higher in eight regions compared to the national average. These regions were Eastern Visayas (21.9 %), SOCCSKSARGEN (21.5 %), Bicol (18.8 %), Caraga (18.9 %), MIMAROPA (18.3 %), Western Visayas (16.2 %), Davao (15.6 %) and ARMM (14.7 %).

F. OTHER RELEVANT INFORMATION

F.1 Acquisition of House and/or Lot thru the Assistance of Government Housing or Financing Program

Only 2 percent of total families or 432 thousand families had members who acquired a house and/or lot thru the assistance of government housing or financing program (Table 22). Thirty-one percent of families which acquired a house and/or lot thru the assistance of government housing or financing program had acquired the house or lot in 1991 or earlier, 29 percent within the period 1992-1998, 12 percent in 1999-2000, 22 percent in 2001-2009, and 5 percent in 2010-2011.

Among the regions, CALABARZON and MIMAROPA had the highest percentage of families who acquired a house and/or lot thru the assistance of government housing or financing program at 4 percent.

F.2 Acquisition of Agricultural Land Under the CARP Land-Distribution Program

About 19 percent of total families or 3.6 million families owned a land used for agricultural purposes (Table 24). Of this number, 7 percent had acquired their agricultural lands under the Comprehensive Agrarian Reform Program (CARP) land-distribution program.

One in four (24.4 %) poor families owned a land used for agricultural purposes compared to one in six (16.2 %) non poor families. Seven percent of the poor families who owned lands used for agricultural purposes had acquired their lands under the CARP. The corresponding percentage among non-poor is 8 percent.

Among the regions, Western Visayas registered the highest percentage of families who acquired their agricultural lands under the land-distribution program at 20 percent. For 10 regions, the proportion of families with lands acquired thru the CARP was lower than the national estimate. These were NCR (5.2 %), Central Visayas (4.9 %), SOCCSKSARGEN (5.0 %), Ilocos (3.9 %), Eastern Visayas (4.2 %), Zamboanga Peninsula (4.4 %), Northern Mindanao (3.5 %), CALABARZON (3.3 %), ARMM (3.2 %) and CAR (1.3 %). The lowest percentage of families with agricultural lands acquired under the CARP land-distribution program was in CAR at one percent.

F.3 Hunger

At the national level, families who experienced hunger in the three months prior to the survey made up 6 percent of all families in the country (Table 25). Of those families who experienced hunger, about 30 percent experienced it at least once in each week during the reference period, 39 percent experienced it at least once in each month, and 31 percent experienced it at least once in three months.

Among the regions, Eastern Visayas registered the highest proportion of families who experienced hunger with 16 percent of the total families in the said region. The survey also revealed that at least one in ten families in SOCCSKSARGEN (13.0%), Caraga (11.7%), and Northern Mindanao (10.1%) experienced hunger during the reference period.

About 15 percent of the poor families in the entire country experienced hunger. Among the non-poor families, 3 percent experienced it.

F.4 Availment of Loan

Of the total families, 26 percent or 4.9 million families had members who availed loans in the six months prior to the survey in any lending institution or private individual whose business is lending money with interest (Table 26).

Among the regions, SOCCSKSARGEN had the highest proportion of families who availed loan during the reference period with 39 percent, followed by Bicol (34.4 %) and MIMAROPA (33.4 %). Meanwhile, NCR had the lowest proportion of families who availed loan with 19 percent.

For a majority of the regions, the most common source of loan was relative or friend except for Central Visayas (Region VII), Eastern Visayas (Region VIII), and Northern Mindanao (Region X) where the most common source of loan was microfinance institution. For Caraga, it was bank (Table 27).

G. FAMILY INCOME AND EXPENDITURE

G.1 Total Family Income

In the 2011 APIS, family income includes salaries and wages from jobs or businesses. Incomes derived from entrepreneurial activities and from other sources such as cash receipts, gifts, support, relief, and other forms of assistance.

The total family income for the period January to June 2011 reached almost Php 2.0 trillion (Table 28). Almost 88 percent of this income or Php 1.7 trillion was earned by the non-poor families. The largest percentage (44.3 %) of total family income was from salaries and wages. Income from entrepreneurial activities accounted for 22 percent of the total family income. A considerable percentage (32.2 %) of the total family income was derived from other sources.

Almost two-fifths of the Php 226 billion earned by poor families were contributed by wage and salary workers (38.7 %) and those with entrepreneurial activities (34.7 %). Forty-five

percent of the total income of the non-poor families came from salaries and wages while 21 percent was from entrepreneurial activities and 34 percent from other sources.

In all regions except Ilocos, Cagayan Valley and ARMM, the biggest share of total family income came from salaries and wages. In ARMM, the largest percentage (62.4 %) of total family income came from entrepreneurial activities.

The average family income for the 6 months prior to the survey, computed by dividing the total income for the period by the total number of families, amounted to Php 102,077 (Table 30). The average family income for the poor families was Php 39,414 while Php 128,921 for the non-poor families.

G.2 Family Expenditure and Saving

Family expenditures refers to the expenses or disbursements made by the family purely for personal consumption. It includes expenditures for food, fuel, transportation, household and personal care, clothing, education, medicines, and others.

Total family expenditure from January 1 to June 30, 2011 amounted to Php 1.8 trillion (Table 29). The total family savings or the total income minus the expenditure, for the same period was estimated at Php 197.6 billion. Non-poor families had a saving of Php 209.4 billion. Meanwhile, poor families disbursed Php 11.8 billion. This income group spent more than what they have earned. This is true for poor families in all regions except ARMM with 59.5 million saving.

Among the regions, NCR and CALABARZON, had the biggest income, while Central Luzon and CALABARZON recorded the largest savings.

The average family expenditure at the national level was Php 91,747, Php 41,470 for the poor families and Php 113,285 for the non-poor families (Table 31).

G.3 Average Per Capita Income and Average Per Capita Expenditure

Average per capita income is computed by dividing the total income for the reference period by the total population. Likewise, average per capita expenditure is the total expenditure divided by total population.

The average per capita income nationally for the period January 1 to June 30, 2011 was about Php 20,400 (Table 31). The average per capita income for the poor families was Php 6,300 while Php 28,800 for the non-poor families. On the other hand, the average per capita expenditure at the national level was Php 18,300 while Php 6,700 for poor families and Php 25,300 for non-poor families.

Among the regions, NCR reported the highest per capita income (Php 36,300) and per capita expenditure (Php 34,700). ARMM had a per capita income of Php 9,500; it is the only region with a value of less than Php 10,000. ARMM also recorded the lowest average per capita expenditure at Php 8,600.
