JABATAN  
*Department's  
Perspectives*

# Wawasan

Menjadi Agensi Terunggul Dalam  
Pengurusan Hutan Tropika  
Secara Berkekalan

## Vision

*To Be The Agency Of Excellence  
In The Sustainable Management  
Of Tropical Forest*

## Misi

Untuk Mengurus Dan Membangunkan  
Sumber Hutan Secara Berkekalan Serta  
Mengoptimumkan Sumbangannya  
Kepada Pembangunan Sosioekonomi  
Negara.

## Mission

*To Sustainably Manage And  
Develop The Forest Resources And  
Optimize Their Contributions To  
National Socio - economic  
Development*

# OBJEKTIF

- Untuk menguruskan sumber hutan negara secara berkekalan bagi pengeluaran berterusan hasil dan perkhidmatan hutan serta penggunaannya secara optimum bersesuaian dengan keperluan alam sekitar.
- Untuk meningkatkan bekalan pengeluaran hasil dan perkhidmatan hutan melalui aktiviti-aktiviti perhutanan bersesuaian yang akan meningkatkan kualiti, produktiviti serta penggunaan sumber hutan.
- Untuk terus membangunkan teknologi mantap yang bersesuaian dengan keperluan alam sekitar bagi pemeliharaan, pengurusan dan penggunaan sumber hutan.
- Untuk memelihara dan melindungi kepelbagaiannya biologi hutan, air serta tanah, dan penggunaannya secara berkekalan.
- Untuk meningkatkan kualiti dan kecekapan kilang-kilang pemprosesan berasaskan keluaran hutan serta menambahkan aktiviti-aktiviti hiliran dengan nilai-tambah yang tinggi.
- Untuk memperkuatkan pembangunan sumber manusia bagi menyokong sektor perhutanan.
- Untuk meningkatkan kesedaran awam berhubung peranan hutan terhadap alam sekitar dan pemeliharaan melalui pembelajaran serta penyebaran maklumat.
- Untuk meningkatkan sumbangan sektor perhutanan kepada pendapatan negara, pertukaran wang asing dan peluang-peluang pekerjaan.

# OBJECTIVES

- *To manage the forest resources sustainably for the continuous production of forest goods and services and their optimum utilization, compatible with environmental requirements.*
- *To increase the supply of forest goods and services through appropriate forestry activities that enhance the quality, productivity and utilization of the forest resources.*
- *To further develop appropriate environmentally sound technology for the conservation, management and utilization of the forest resources.*
- *To conserve and protect the forest biological diversity, water and soil, and their sustainable utilization.*
- *To increase the quality and efficiency of the forest-based processing mills and enhance higher value added downstream activities.*
- *To strengthen human resource development (HRD) to support the forestry sector.*
- *To improve public awareness on the environmental and conservational roles of forests through education and dissemination of information.*
- *To increase the forestry sector's contribution to national income, foreign exchange earnings and employment opportunities.*

# PIAGAM PELANGGAN IBU PEJABAT PERHUTANAN SEMENANJUNG MALAYSIA

- Semua permohonan untuk mendapatkan maklumat-maklumat mengenai pengurusan, pembangunan dan pemuliharaan sumber hutan serta industri perhutanan akan dikemukakan dalam tempoh satu (1) minggu dari tarikh permohonan diterima kecuali bagi maklumat-maklumat yang belum diperolehi oleh Jabatan.
- Nasihat-nasihat teknikal mengenai pengurusan, pembangunan dan pemuliharaan sumber hutan serta industri perhutanan akan dikemukakan dalam tempoh dua (2) minggu dari tarikh ianya diterima kecuali bagi perkara-perkara yang memerlukan kajian yang khusus.
- Semua permohonan untuk mendapatkan penerbitan tidak terperingkat akan diedarkan dalam tempoh dua (2) minggu dari tarikh permohonan diterima.
- Permohonan untuk mengikuti latihan dalam perkhidmatan yang dianjurkan oleh Jabatan akan dimaklumkan keputusannya dalam tempoh dua (2) minggu selepas tarikh tamat penerimaan permohonan.
- Permohonan untuk mengikuti kursus-kursus di Sekolah Perhutanan, Kepong dan Pusat Latihan Membalak, Terengganu akan dimaklumkan keputusannya dalam tempoh satu (1) bulan selepas tarikh temuduga.
- Semua laporan kemajuan projek pembangunan hutan akan dikemukakan kepada agensi pusat tidak lewat dari tarikh yang ditetapkan.
- Keputusan tawaran pelaksanaan projek pembangunan hutan akan dimaklumkan tidak lewat dari empat (4) bulan selepas tawaran dikeluarkan.
- Tindakan untuk mengemukakan dokumen bagi bayaran kemajuan kontrak ke Perbendaharaan akan diambil dalam tempoh satu (1) bulan dari tarikh permohonan diterima sekiranya semua syarat-syarat yang ditetapkan dipenuhi.
- Bon perlaksanaan kontrak akan dilepaskan dalam tempoh satu (1) bulan selepas tamat tempoh bon tersebut.
- Semua aduan berhubung perkhidmatan perhutanan akan diambil tindakan dalam tempoh tiga (3) hari dari tarikh aduan diterima.

## CLIENT'S CHARTER FORESTRY DEPARTMENT HEADQUARTERS PENINSULAR MALAYSIA

- All requests for information on management, development and conservation of forest resources as well as forest industries shall be entertained within one (1) week from the date such requests were made except for information not readily available in the Department.
- Technical advice on management, development and conservation of forest resources, as well as forest industries shall be forwarded within two (2) weeks from the date such requests were made except for matters requiring specific studies.
- All requests for unrestricted publications shall be distributed within two (2) weeks from the date such requests were made.
- All applications to attend in-service training organised by the Department shall be notified within two (2) weeks after the closing date for such applications.
- All applications to attend courses at the Forestry School in Kepong and the Logging Training Centre in Terengganu shall be notified within one (1) month after the dates of interviews.
- All progress reports on forest development projects shall be submitted to the central agency not later than the date stipulated.
- Results of tenders for the implementation of forest development projects shall be made known not later than four (4) months after such tenders were issued.
- Actions to forward the contract progress payment documents to the Treasury shall be undertaken within one (1) month from the date of application provided all conditions are fulfilled.
- Performance bonds shall be released within one (1) month after the expiry date of such bonds.
- All complaints pertaining to forestry services shall be acted upon within three (3) days after such complaints were received.

# PIAGAM PELANGGAN JABATAN PERHUTANAN NEGERI SEMENANJUNG MALAYSIA

- Semua permohonan untuk mengeluarkan hasil-hasil hutan atau menjalankan Kilang Berasas Kayu akan diproses mengikut prosedur yang telah ditetapkan.
- Lesen untuk mengeluarkan hasil hutan akan dikeluarkan dalam tempoh tidak melebihi enam (6) bulan dari tarikh kelulusan diberi, setelah semua syarat-syarat kelulusan dipatuhi.
- Lesen untuk menjalankan Kilang Berasas Kayu akan dikeluarkan dalam tempoh masa tidak melebihi satu (1) bulan dari tarikh siap kilang dibina setelah memenuhi semua syarat-syarat kelulusan.
- Keputusan mengenai permohonan melanjutkan tempoh lesen mengeluarkan hasil hutan atau lesen menjalankan Kilang Berasas Kayu akan diberi dalam tempoh tidak melebihi satu (1) bulan dari tarikh permohonan diterima.
- Menghargai maklumat serta maklum balas yang diterima daripada orang awam. Semua aduan kesalahan hutan akan diambil tindakan dalam masa tidak melebihi tiga (3) hari.
- Memberi perkhidmatan yang sebaik mungkin serta layanan yang mesra setiap masa.

## CLIENT'S CHARTER STATE FORESTRY DEPARTMENT PENINSULAR MALAYSIA

- All applications to take forest produce or to operate Wood-based Industries shall be processed according to prescribed procedures.
- Licences to take forest produce shall be issued within a period of not more than six (6) months from the date of approval, provided the required terms are fulfilled.
- Licences to operate Wood-based Industries shall be issued within a period of not more than one (1) month from the completion of mill construction provided all terms of approval are fulfilled.
- Decisions on applications for extension of all licences to take forest produce or to operate Wood-based Industries shall be made within a period of not more than one (1) month from the date of such applications were received.
- Information and feedback received from the public will be acknowledged. All complaints pertaining to forest offences shall be acted upon within a period of not more than three (3) days.
- To render the best possible services and courtesy at all times.

The background of the image is a close-up photograph of a plant. It features several bright green, heart-shaped leaves. A thin, light-colored stem extends from the center-left towards the top right, bearing several small, rounded, reddish-pink flowers or buds. The lighting is soft, creating a natural and organic feel.

## PERUTUSAN KETUA PENGARAH DIRECTOR GENERAL'S MESSAGE

Dalam era yang semakin mencabar di mana sektor perhutanan mendapat perhatian daripada semua lapisan masyarakat, pelbagai usaha telah dipertingkatkan bagi memastikan segala kepentingan dan faedah hutan terus dinikmati secara optimum. Sehubungan dengan itu, sepanjang tahun 2007, Jabatan Perhutanan Semenanjung Malaysia (JPSM) mempergiatkan lagi usaha ke arah mencapai matlamat pengurusan hutan secara berkekalan. Ke arah ini, penilaian pengurusan hutan berdasarkan Standard MC&I (2002) telah dilaksanakan di negeri-negeri iaitu Johor, Kedah, Kelantan, Negeri Sembilan, Pahang, Perak, Selangor dan Terengganu. Negeri Sembilan serta Pahang telah berjaya memenuhi keperluan Standard dan telah dianugerahkan Sijil Pengurusan Hutan oleh Majlis Pensijilan Kayu-kayuan Malaysia (MTCC). Sehingga akhir tahun 2007, kawasan sejumlah 4.30 juta hektar telah disahkan dan dianugerahkan Sijil Pengurusan Hutan di bawah Piawaian MC&I (2002) Majlis Pensijilan Kayu-kayuan Malaysia (MTCC).

Tahun 2007 juga merupakan tahun kedua pelaksanaan projek-projek di bawah Rancangan Malaysia Kesembilan (RMK9). Dalam hubungan ini, JPSM telah melaksanakan sejumlah 11 program pembangunan yang mengandungi 108 projek di peringkat persekutuan dan negeri. Peruntukan pembangunan RMK9 tahun 2007 adalah sebanyak RM75 juta, manakala pencapaian kewangan adalah sebanyak RM69.96 juta atau 93.3%.

Dalam usaha memastikan sumber kepelbagaiannya biologi hutan negara terus terpelihara, JPSM telah menganjurkan "National Conference on the Management and Conservation of Forest Biodiversity in Malaysia" pada 20-21 Mac 2007. Sebanyak 41 kertas kerja telah dibentangkan. Seminar ini bertujuan untuk meningkatkan pengetahuan saintifik dan mendokumentasikan maklumat berkaitan kekayaan flora dan fauna di Semenanjung Malaysia.

Kepentingan sumber hutan bukan kayu juga mendapat perhatian dan menjadi salah satu agenda penting Jabatan. Dalam konteks ini, penghasilan gaharu daripada pokok Karas telah diberi perhatian khusus dalam tahun 2007. Ke arah ini, Persidangan Gaharu Kebangsaan telah diadakan pada 11 September 2007 di Kuala Lumpur bagi menyampaikan status terkini perlادangan dan penyelidikan spesies Karas serta membincangkan isu-isu dan cabaran dalam industri gaharu.

Lanjutan daripada peristiwa tsunami pada tahun 2004, pihak Kementerian Sumber Asli dan Alam Sekitar telah mengambil langkah proaktif dengan menubuhkan sebuah Pasukan Petugas Khas Jawatankuasa Operasi

Menanam Pokok Bakau dan Spesies-Spesies Yang Sesuai Di Pesisiran Pantai Negara yang dipengerusikan oleh Ketua Setiausaha. Satu upacara rasmi Pelancaran Program Penanaman Pokok Bakau dan Spesies-Spesies Lain Yang Sesuai Di Pesisiran Pantai Negara telah disempurnakan oleh Y.A.B Perdana Menteri Malaysia pada 2 Februari 2007 di Kampung Baru Pulau Sayak, Kota Kuala Muda, Kedah.

Ke arah meningkatkan keberkesanan pemuliharaan serta mengumpulkan maklumat-maklumat baru kepelbagaiannya biologi hutan, JPSM telah menganjur dan mengetuai sebanyak 17 Ekspedisi Saintifik Kepelbagaiannya Biologi Hutan mulai tahun 1999 di mana 3 ekspedisi telah diadakan pada tahun 2007. Sehubungan dengan itu, sebanyak 14 siri seminar Ekspedisi Saintifik Kepelbagaiannya Biologi Hutan telah diadakan, termasuk 3 seminar pada tahun 2007. Sehingga penghujung 2007, sebanyak 10 siri Buku Prosiding mengenai hasil-hasil penemuan dalam Seminar Ekspedisi Saintifik Kepelbagaiannya Biologi Hutan telah diterbitkan.

Dalam pada itu, JPSM turut memberi penekanan kepada peningkatan kemahiran dan pengetahuan staf serta melaksanakan program pendidikan bagi meningkatkan kesedaran masyarakat sejajar dengan keperluan semasa dalam menghadapi cabaran global. Dalam tahun 2007, sebanyak 14 siri perkhemahan kesedaran perhutanan telah diadakan yang melibatkan kaum belia, pelajar sekolah rendah dan menengah bagi meningkatkan kesedaran berhubung kepentingan hutan dalam pengekalan kestabilan alam sekitar.

Akhir kata, saya mengambil kesempatan ini untuk merakamkan ucapan terima kasih kepada semua staf JPSM di atas segala usaha gigih dan dedikasi yang berterusan dalam menempa pelbagai kejayaan sepanjang tahun 2007. Saya juga mengucapkan terima kasih kepada pihak Kementerian Sumber Asli dan Alam Sekitar, semua agensi dan Badan bukan kerajaan yang berkaitan di atas segala kerjasama dan sokongan yang diberikan kepada Jabatan

*Efforts have been intensified to ensure the optimum benefits of the forests can be continuously enjoyed amidst this challenging era with the forestry sector facing greater attention from all levels of communities. In this regard, the Forestry Department Peninsular Malaysia [FDPM] has enhanced her efforts towards the attainment of sustainable forest management objective throughout the year in 2007. Towards this end, forest management assessments based on the MC&I (2002) Standard have been conducted in the states of Johore, Kedah, Kelantan, Negeri Sembilan, Pahang, Perak, Selangor and Terengganu. In this context, the states of Negeri Sembilan and Pahang have successfully met the requirements of the Standard and were subsequently awarded the Forest Management Certificate by the Malaysian Timber Certification Council [MTCC]. At the end of 2007, a total area of 4.30 million hectares have been certified and awarded the Certificate for Forest Management under the Malaysia Timber Certification Council [MTCC] standard MC&I (2002).*

*The year 2007 was the second year in the implementation of the development projects under the Ninth Malaysia Plan [RMK9]. In this connection, FDPM has carried out a total 11 development programmes comprising 108 projects at both the federal and state levels. The total development budget under RMK9 allocated in 2007 amounted to RM75 million, while the financial achievement for the year amounted to RM69.96 million or 93.3%.*

*In her quest to ensure that the country's biological diversity resources are better conserved, FDPM has organised the National Conference on the Management and Conservation of Forest Biodiversity in Malaysia on 20-21 March 2007. A total of 41 working papers were presented. This seminar was conducted with the aim of improving the scientific knowledge of the participants and to better document the information on forest flora and fauna of Peninsular Malaysia.*

*The importance of non-timber forest resources were also given due attention and remained an important agenda of the Department. In this context, the production of agarwood from Karas trees have been given special attention in 2007. Towards this end, the National Agarwood Conference was organised on 11 September 2007 in Kuala Lumpur to disseminate information on the current status of Karas tree plantation establishment and to discuss the numerous issues and challenges facing the agarwood industry.*

*Pursuance to the 2004 Tsunami incidence, the Ministry of Natural Resources and Environment has taken proactive steps in establishing a Special Task Force on the Planting Programme with Mangroves and Other Suitable Tree Species Along the National Coastline chaired by the Secretary-General. In this regard, the Planting programme with Mangroves and Other Suitable Tree Species Along the National Coastline was officially launched by the Right Honourable Prime Minister of Malaysia on 2 February 2007 in Kampung Baru Pulau Sayak, Kota Kuala Muda, Kedah.*

*To further enhance the efficiency in the conservation and the collection and collation of new information on forest biodiversity, FDPM has conducted and headed a total of 17 Forest Biological Diversity Scientific Expeditions whereby 3 of them were conducted in 2007. In line with this, a series of 14 seminars on the Forest Biological Diversity Scientific Expeditions were also organised of which 3 were in 2007. Consequently, a total of 10 Proceedings on outcomes of the numerous Seminars on the Forest Biological Diversity Scientific Expeditions have been published as at the end of 2007.*

*The Forestry Department Peninsular Malaysia also emphasised on the enhancement of skills and knowledge of her staff in line with the current requirements in addressing global challenges, as well as in the implementation of education programme to increased community awareness. In the year 2007, a total of 14 forestry awareness camps were organised to improve the awareness level of the youth, primary and secondary school students on the importance of forests to the sustain the stability of the environment.*

*In closing, I would like to take this opportunity to express my sincere appreciation to all the staff of FDPM on their continuous dedication and untired efforts in realising numerous achievements throughout the year 2007. I would also like to convey my sincere thanks to the Ministry of Natural Resources and the Environment, all related agencies and Non-governmental organisations for their kind co-operations and supports rendered to the Department.*

**DATO' SERI AZAHAR BIN MUDA**  
Ketua Pengarah Perhutanan  
Semenanjung Malaysia  
Director General of Forestry  
Peninsular Malaysia

# Fungsi Direktorat

## *Functions of the Directorate*

Ahli direktorat terdiri daripada Ketua Pengarah Perhutanan Semenanjung Malaysia dan dua orang Timbalan Ketua Pengarah. Direktorat adalah bertanggungjawab dalam penggubalan dan pelaksanaan dasar-dasar, strategi-strategi dan objektif-objektif Jabatan serta menyelaras kerja-kerja pentadbiran, pengurusan, pembangunan dan pemeliharaan sumber hutan selaras dengan keperluan negara.

*The Directorate comprises the Director General of Forestry Peninsular Malaysia and two Deputy Director Generals. They are responsible for the formulation and implementation of policies, strategies and objectives of the Department, as well as in coordinating the administration, management, development and conservation of the forest resources to meet the needs of the country.*

# CARTA ORGANISASI Organisation Chart

**Ketua Pengarah Perhutanan  
Semenanjung Malaysia**  
*Director General of Forestry  
Peninsular Malaysia*

# ORGANISASI / ORGANISATION

Jabatan Perhutanan Semenanjung Malaysia (JPSM) berada di bawah Kementerian Sumber Asli dan Alam Sekitar, Malaysia dan terdiri daripada Ibu Pejabat Perhutanan di Kuala Lumpur, 10 Jabatan Perhutanan Negeri dan 33 Pejabat Hutan Daerah di seluruh Semenanjung Malaysia. Jabatan ini diketuai oleh Ketua Pengarah Perhutanan dan dibantu oleh dua Timbalan Ketua Pengarah Perhutanan. Pada akhir tahun 2007, bilangan gunatenaga adalah seramai 5,487 orang.

*The Forestry Department Peninsular Malaysia (FDPM) is under the Ministry of Natural Resources and Environment, Malaysia and it comprises the Forestry Department Headquarters in Kuala Lumpur, 10 State Forestry Departments and 33 District Forest Offices located throughout Peninsular Malaysia. The Department is headed by the Director General of Forestry and assisted by two Deputy Director Generals of Forestry. At the end of 2007, the total workforce is 5,487.*

## FUNGSI-FUNGSI JABATAN

Jabatan Perhutanan Semenanjung Malaysia berfungsi dalam pengurusan, perancangan, perlindungan dan pembangunan kawasan Hutan Simpanan Kekal (HSK) selaras dengan Dasar Perhutanan Negara (DPN) dan Akta Perhutanan Negara (APN).

## IBU PEJABAT PERHUTANAN

Ibu Pejabat Perhutanan Semenanjung Malaysia bertanggungjawab untuk menggubal dasar-dasar perhutanan, memberi nasihat dan khidmat teknikal kepada Jabatan-jabatan Perhutanan Negeri dalam aspek perancangan, pengurusan dan pembangunan hutan, industri hutan dan industri berasas kayu, kajian operasi hutan serta latihan dan pembangunan sumber manusia.

Di Ibu Pejabat Perhutanan terdapat dua (2) bahagian teknikal yang bertanggungjawab secara langsung kepada Ketua Pengarah Perhutanan. Setiap bahagian teknikal diketuai oleh Timbalan Ketua Pengarah Perhutanan. Tujuh (7) Unit bertanggungjawab secara langsung kepada Timbalan Ketua Pengarah (Operasi Hutan) dan enam (6) Unit bertanggungjawab secara langsung kepada Timbalan Ketua Pengarah (Perancangan dan Pembangunan Hutan).

### Bahagian Operasi Hutan

Bahagian ini diketuai oleh Timbalan Ketua Pengarah Perhutanan (Operasi Hutan) yang bertanggungjawab dalam bidang pentadbiran dan kewangan, latihan dan pembangunan sumber manusia, pemantauan penguatkuasaan hutan, pembangunan industri berasas kayu, kejuruteraan hutan, isu perhutanan antarabangsa dan kerusetiaan serta Tugas-Tugas Khas dan Wilayah Persekutuan.

### Bahagian Perancangan Dan Pembangunan Hutan

Bahagian ini diketuai oleh Timbalan Ketua Pengarah Perhutanan (Perancangan dan Pembangunan Hutan) yang bertanggungjawab dalam bidang silvikultur & perlindungan hutan, pembangunan ladang hutan, pengurusan sumber hutan, perancangan pembangunan sumber hutan, kajian ekonomi perhutanan dan pembangunan teknologi maklumat.

## FUNCTION OF THE DEPARTMENT

*The Forestry Department Peninsular Malaysia is responsible for the management, planning, protection and development of the Permanent Reserved Forest (PRF) in accordance with the National Forestry Policy (NFP) and the National Forestry Act (NFA).*

## FORESTRY DEPARTMENT HEADQUARTERS

*The Forestry Department Headquarters is responsible for the formulation of forestry policies, providing technical advice and assistance to the State Forestry Departments with regard to forest planning, management and development, forest and wood-based industries, forest operational studies as well as training and human resource development.*

*The Forestry Department Headquarters has two (2) main technical divisions directly responsible to the Director General of Forestry. Each technical division is headed by the Deputy Director General of Forestry. Seven (7) Units are directly responsible to the Deputy Director General (Forest Operations) and six (6) Units are directly responsible to the Deputy Director General (Forest Planning & Development).*

### Forest Operations Division

*The division is headed by the Deputy Director General of Forestry (Forest Operations) responsible for the administration and finance, training and manpower development, monitoring forest enforcement, development of wood-based industries, forest engineering and forestry international issues and secretarial and also Special Functions and Federal Territory.*

### Forest Planning And Development Division

*The division is headed by the Deputy Director General of Forestry (Forest Planning and Development) responsible for silviculture & forest protection, forest plantation development, forest resource management, forest resource development planning, forestry economic studies and information technology development.*

## JABATAN PERHUTANAN NEGERI

Jabatan Perhutanan Negeri bertanggungjawab dalam pentadbiran dan pengawalan pengusahahsilan hutan, kutipan hasil hutan dan pembangunan sumber hutan negeri. Jabatan ini juga merancang dan menyelaraskan pembangunan industri berasas kayu. Jabatan Perhutanan Negeri dibahagikan kepada Bahagian Operasi Hutan dan Pembangunan Hutan serta disokong oleh Pejabat Hutan Daerah/Jajahan.

### Bahagian Operasi Hutan

Bertanggungjawab terhadap pentadbiran, penguatkuasaan undang-undang hutan dan kutipan hasil hutan. Menyelaras dan berhubung dengan Ibu Pejabat Perhutanan, lain-lain Jabatan Negeri, Badan-badan dan Agensi Berkanun.

### Bahagian Pembangunan Hutan

Bertanggungjawab merancang, melaksana dan memantau aktiviti-aktiviti pengurusan hutan dan silvikultur, penyediaan dan pelaksanaan Rancangan Pengurusan Hutan serta projek pembangunan hutan di peringkat negeri.

### Pejabat Hutan Daerah/Jajahan

Bertanggungjawab berkaitan pentadbiran di peringkat daerah/jajahan, pengawalan pengusahahsilan hutan, kutipan hasil hutan dan penguatkuasaan undang-undang hutan di peringkat daerah. Pejabat ini juga bertanggungjawab melaksanakan aktiviti-aktiviti pengurusan dan silvikultur hutan.

## STATE FORESTRY DEPARTMENTS

The State Forestry Department is responsible for the administration and regulation of forest harvesting, forest revenue collection and development of the state forest resources as well as to plan and coordinate the development of wood-based industries. The State Forestry Department is divided into Forest Operations and Forest Development Division and supported by the District Forest Office.

### Forest Operations Division

Responsible for the administration, forest law enforcement and forest revenue collection. Co-ordinates and liaise with the Forestry Department Headquarters, other State Departments and Agencies.

### Forest Development Division

Responsible in planning, implementation and monitoring for forest management and silvicultural activities, preparation and implementation of Forest Management Plans as well as undertakes the planning of the development projects in the state.

### District Forest Office

Responsible for district level administration, regulation of forest harvesting, forest revenue collection and forest law enforcement. The office is also responsible for implementing forest management and silvicultural activities.

# **UNIT PENTADBIRAN DAN KEWANGAN**

## **ADMINISTRATION AND FINANCE UNIT**

Unit ini bertanggungjawab untuk memberi perkhidmatan pentadbiran, sokongan pengurusan, pengurusan sumber manusia, perjawatan, pengurusan kewangan dan pengurusan Pusat Sumber. Unit ini juga menguatkusakan peraturan dan langkah-langkah keselamatan fizikal dan dokumen jabatan.

*The Unit is responsible in providing administrative services, management support services, human resource management, staffing, financial management and Resource Centre management. The Unit also enforces various regulations and physical security measures on the department's documents.*

# PERUNTUKAN PERLEMBAGAAN, DASAR DAN UNDANG-UNDANG *CONSTITUTIONAL PROVISIONS, POLICY AND LEGISLATIONS*

## I. PERUNTUKAN PERLEMBAGAAN

Di bawah Perkara 74(2) Perlembagaan Malaysia, perhutanan adalah di bawah kuasa Kerajaan Negeri. Oleh yang demikian, setiap negeri berkuasa menggubal undang-undang di sektor perhutanan dan dasar perhutanan tersendiri. Pihak berkuasa Persekutuan hanya memberi nasihat dan bantuan teknikal kepada negeri, penyelenggaraan stesen-stesen percubaan dan demontrasi, latihan dan penyelidikan.

Bagi memudahkan penyelarasan dan penyeragaman dalam bidang perhutanan, Majlis Perhutanan Negara (MPN) telah ditubuhkan pada 20 Disember 1971 oleh Majlis Tanah Negara. Majlis Tanah Negara (MTN) diberi kuasa di bawah perlembagaan Malaysia untuk menggubal dasar kebangsaan bagi memajukan dan mengawal penggunaan tanah untuk perlombongan, pertanian dan perhutanan. MPN merupakan forum antara Kerajaan Persekutuan dan Negeri bagi membincangkan masalah dan isu berhubung dengan dasar perhutanan, pentadbiran dan pengurusan. Semua keputusan MPN perlulah disahkan oleh MTN. Tanggungjawab untuk melaksanakan keputusan MPN adalah menjadi tugas Kerajaan-kerajaan Negeri kecuali jika ianya di bawah kuasa Kerajaan Persekutuan.

## II. DASAR DAN PERUNDANGAN

Pada tahun 1977, Dasar Perhutanan Negara telah diluluskan oleh MPN dan kemudian disahkan oleh MTN pada 19 April, 1978. Dasar tersebut telah dikaji semula pada 10 November, 1992

## I. CONSTITUTIONAL PROVISIONS

*Under Article 74(2) of the Malaysian Constitution, forestry comes under the jurisdiction of the respective State Governments. As such, each state is empowered to enact laws on forestry and to formulate forest policy independently. The executive authority of the Federal Government only extends to the provision of advice and technical assistance to the states, the maintenance of experimental and demonstration stations, training and research.*

*In order to facilitate the adoption of a coordinated and common approach to forestry, the National Forestry Council (NFC) was established on 20th December, 1971 by the National Land Council. The National Land Council (NLC) is empowered under the Malaysian Constitution to formulate a national policy for the promotion and control of the utilization of land for mining, agriculture and forestry. The NFC serves as a forum for the Federal and the State Governments to discuss and resolve common problems and issues relating to forestry policy, administration and management. All the decisions of the NFC have to be endorsed by the NLC. The responsibility for implementing the decisions of the NFC lies with the State Governments unless it is within the authority of the Federal Government.*

## II. POLICY AND LEGISLATIONS

*In 1977, the National Forestry Policy was approved by the NFC and later endorsed by the NLC on 19th April, 1978. This Policy was revised on 10 November, 1992 to take cognizance of the*

atas kesedaran yang ditunjukkan oleh masyarakat dunia terhadap kepentingan pemeliharaan kepelbagaiannya biologi dan penggunaan sumber genetik secara berkekalan serta peranan masyarakat dalam pembangunan perhutanan. Penerimaan dasar tersebut merupakan suatu kejayaan memperkuatkan asas perlembagaan dan mengeratkan kerjasama dan persefahaman di antara Kerajaan Persekutuan dan Kerajaan Negeri dalam pembangunan sektor perhutanan.

Selain dari Akta Perhutanan Negara 1984 [Pindaan 1993] dan Akta Industri Berasas Kayu 1984 terdapat juga undang-undang lain yang penting dan ada kaitan dengan sektor perhutanan seperti:

- Kanun Tanah Negara 1965;
- Kanun Keseksaan [FMS Cap.45], 1948 [Pindaan 1993];
- Kanun Acara Jenayah [FMS Cap.6], 1903 [Pindaan 1995];
- Akta Keterangan 1950 [Pindaan 1993];
- Akta Prosedur Kewangan 1967 [Pindaan 1993];
- Enakmen Bekalan Air 1935;
- Akta Perlindungan Tanah 1960;
- Akta Perlindungan Hidupan Liar 1972 [Pindaan 1976 & 1988];
- Akta Lembaga Perindustrian Kayu Malaysia 1973;
- Akta Kualiti Alam Sekeliling 1974 [Pindaan 1995];
- Akta Taman Negara 1980 [Pindaan 1983];
- Akta Lembaga Penyelidikan dan Pembangunan Hutan Malaysia 1985;
- Enakmen Perlombongan 1926;
- Akta Kerajaan Tempatan 1976.

*concern expressed by the world community on the importance of biological diversity conservation and the sustainable utilization of genetic resources, as well as the role of local communities in forest development. The acceptance of the Policy is a major breakthrough in strengthening the institutional base and enhances the co-operation and understanding between the Federal and State Governments in the field of forestry sector development.*

*Other legislation which are considered of major importance to the forestry sector apart from the National Forestry Act, 1984 [Amendment 1993] and the Wood-based Industries Act, 1984 are as follows:*

- *National Land Code 1965;*
- *Penal Code [FMS Cap.45],1948 [Amendment 1993];*
- *Criminal Procedure Code [FMS Cap.6]1903 [Amendment 1995];*
- *Evidence Act 1950 [Amendment1993];*
- *Financial Procedure Act 1967 [Amendment 1993];*
- *Water Enactment 1935;*
- *Land Conservation Act 1960;*
- *Protection Of Wildlife Act 1972 [Amendment 1976 &1988];*
- *Malaysian Timber Industry Board Act 1973;*
- *Environmental Quality Act 1974 [Amendment 1995];*
- *National Park Act 1980 [Amendment 1983];*
- *Malaysian Forestry Research and Development Board Act 1985;*
- *Mining Enactment 1926;*
- *Local Government Act 1976.*

# KEMAJUAN DALAM TAHUN 2007

## YEAR UNDER REVIEW 2007

### I. SUMBER HUTAN

Pada akhir tahun 2007, kawasan berhutan merangkumi 5.84 juta hektar atau 44.4% dari keseluruhan 13.16 juta hektar muka bumi Semenanjung Malaysia. Daripada jumlah ini, seluas 4.70 juta hektar atau 80.5% telah dijadikan sebagai HSK yang diwartakan di bawah Akta Perhutanan Negara, 1984. HSK ini diuruskan di bawah prinsip pengurusan hutan secara berkekalan untuk tujuan memaksimalkan kepentingan ekonomi, sosial dan alam sekitar.

### I. FOREST RESOURCES

*At the end of 2007, forested land accounts for 5.84 million ha or 44.4% of Peninsular Malaysia's total land area of 13.16 million ha. Of this total, 4.70 million ha or 80.5% are designated as PRFs, gazetted under the National Forestry Act, 1984. These PRFs are managed under sustainable forest management principles for maximum economic, social and environmental benefits.*

**Kawasan Berhutan Dan Tidak Berhutan Di Semenanjung Malaysia, 2007**

**Forested And Non-forested Land In Peninsular Malaysia, 2007**

## **II. PENGURUSAN SUMBER HUTAN**

Sumber hutan asli di Semenanjung Malaysia terdiri daripada tiga jenis hutan utama iaitu Hutan Darat, Hutan Paya Gambut dan Hutan Paya Laut. Pengurusan hutan secara sistematik telah bermula sejak lebih dari 106 tahun dahulu.

Kriteria dan Petunjuk Malaysia merupakan satu piawaian untuk pensijilan pengurusan hutan yang berdasarkan Kriteria dan Petunjuk ITTO [MC&I (2001)] dan kemudiannya Prinsip dan Kriteria Forest Stewardship Council [MC&I (2002)] akan terus menjadi asas kepada pengurusan hutan secara berkekalan. Pada akhir tahun 2007, terdapat lapan buah negeri di Semenanjung Malaysia yang meliputi kawasan HSK seluas 4.67 juta hektar telah dinilai dan dianugerahkan Sijil Pengurusan Hutan di bawah MC&I (2001). Di samping itu, dua buah negeri iaitu Negeri Sembilan dan Pahang telah mendapat Sijil Pengurusan Hutan di bawah MC&I (2002).

## **III. PEMBANGUNAN SUMBER HUTAN**

Usaha-usaha terus diperhebatkan untuk memastikan sumber hutan terus terpelihara dan fungsinya dalam pengeluaran barang dan perkhidmatan hutan dapat dikekalkan.

Sehubungan dengan ini, peruntukan kewangan daripada belanjawan Persekutuan dan Negeri telah dilulus dan dibelanjakan bagi membiayai perlaksanaan program-program pembangunan hutan.

## **II. FOREST RESOURCE MANAGEMENT**

*The natural forests of Peninsular Malaysia are classified into three forest types, namely the Dry Inland Forest, Peat Swamp Forest and Mangrove Forest. Systematic forest management began more than 106 years ago.*

*The Malaysian Criteria and Indicators which are standards for forest management certification and based on the ITTO Criteria and Indicators [MC&I (2001)] and the Forest Stewardship Council's Principles and Criteria [MC&I (2002)] will continue to be the basis for sustainable forest management. At the end of 2007, eight states in Peninsular Malaysia covering an area of 4.67 million hectares have been assessed and awarded Forest Management Certificate under MC&I (2001). In addition, two states namely Negeri Sembilan and Pahang were also awarded Forest Management Certificate under MC&I (2002).*

## **III. FOREST RESOURCE DEVELOPMENT**

*Concerted efforts continued to be intensified to ensure that the forest resources are conserved and their functions in the production of forest goods and services are sustained.*

*In this regard, allocations from Federal and State have been approved and spent to finance the implementation of forest development programmes.*

Peruntukan kewangan ini adalah terdiri daripada peruntukan Pembangunan Tahunan Persekutuan dan Negeri, Tabung Kumpulan Wang Pembangunan Hutan Negeri (KWPH), Peruntukan Wang Levi Eksport Kayu Kayan dan dari sumber-sumber lain. Dalam tahun 2007, sejumlah RM75 juta atau 93.3% daripada peruntukan tahunan telah dibelanjakan. JPSM telah melaksanakan sejumlah 11 buah program pembangunan yang mengandungi 108 projek di peringkat persekutuan dan negeri sepetimana yang dirancangkan di bawah Rancangan Malaysia Kesembilan (2006-2010) seperti berikut :

- i. Pengurusan Sumber Hutan
- ii. Penilaian Sumber Hutan
- iii. Pembangunan Sumber Hutan
- iv. Pembangunan Hutan Ladang
- v. Sumber Bukan Kayu
- vi. Perhutanan-tani
- vii. Pemeliharaan dan Perlindungan
- viii. Ekopelancongan dan Hutan Rekreasi
- ix. IT dan K-Perhutanan
- x. Pembangunan Sumber Manusia
- xi. Infrastruktur dan Kemudahan

*These financial allocations comprised of Federal and States' Annual Development Budget, State Forest Development Fund (cess), Timber Export Levy Fund and other sources. For the year 2007, a total of RM75 million representing 93.3% of the annual allocation was spent. A total of 11 development programmes comprising 108 projects at the federal and state levels were implemented by the FDPM as planned under the Ninth Malaysia Plan (2006-2010) as follows:*

- i. Forest Resource Management
- ii. Forest Resource Valuation
- iii. Forest Resource Development
- iv. Forest Plantation Development
- v. Non-Wood Resources
- vi. Agro-forestry
- vii. Conservation and Protection
- viii. Eco-tourism and Forest Recreation
- ix. IT and K-Forestry
- x. Human Resource Development
- xi. Infrastructure and Facilities.

#### **Peruntukan dan Perbelanjaan Pembangunan Hutan, 2007 Forest Development Allocation and Expenditure, 2007** (RM juta / million)

PERSEKUTUAN / NEGERI Federal/State	PERUNTUKAN Allocation	PERBELANJAAN Expenditure	PERATUS Percent (%)
PERSEKUTUAN / Federal	19.17	18.32	95.6
NEGERI / State	55.83	51.64	92.5
JUMLAH / Total	75.00	69.96	93.3

#### **IV. PEMULIHARAAN HUTAN & PERLINDUNGAN ALAM SEKITAR**

Pemuliharaan hutan dan kepentingannya kepada perlindungan alam sekitar tetap merupakan agenda utama JPSM dalam tahun 2007. Pelbagai aktiviti dan program telah dijalankan sepanjang tahun demi memantapkan fungsi dan peranan Jabatan dalam aspek ini.

#### **IV. FOREST CONSERVATION & ENVIRONMENTAL PROTECTION**

*Forest conservation and its importance to environmental protection remains an important agenda of FDPM in 2007. Numerous activities and programmes were carried out to strengthen the roles and functions of the Department in this aspect.*

Ekoran daripada peristiwa Tsunami pada tahun 2004, kesedaran tentang pentingnya Hutan Paya Bakau dalam memainkan peranan sebagai benteng untuk memecah, menahan dan mengurangkan daya kekuatan pukulan ombak daripada laut. Selaras dengan itu, satu Pasukan Petugas Khas Jawatankuasa Operasi Menanam Pokok Bakau dan Spesies-Spesies Yang Sesuai Di Pesisiran Pantai Negara telah ditubuhkan bertempat di Kampung Baru Pulau Sayak Kota Kuala Muda, Kedah pada 02 Februari 2007. Program Pelancaran Penanaman Pokok Bakau dan Lain-Lain Spesies Yang Sesuai Di Pesisiran Pantai Negara telah diadakan dan dirasmikan oleh Y.A.B Perdana Menteri Malaysia.

Persidangan Gaharu Kebangsaan 2007 pula telah diadakan pada 11 September 2007 bagi memastikan gaharu sebagai sumber kepelbagaian biologi hutan terus terpelihara dan industri gaharu semakin berkembang, manakala pada 15-18 Disember 2007, Seminar On Economic Valuation Of Forest Goods And Services 2007 bagi membincangkan penilaian ke atas keluaran dan perkhidmatan hutan utama seperti kayu balak, rotan, buluh, tumbuhan perubatan dan perkhidmatan hutan seperti hutan rekreasi, eko-pelancongan, sumber air dan udara bersih untuk tujuan penaksiran telah diadakan.

#### **Ekspedisi Saintifik Kepelbagaian Biologi Hutan**

Bagi menambahbaik dan meningkatkan asas pengetahuan saintifik dan dokumentasi tentang komposisi flora dan fauna, JPSM telah menjalankan tiga (3) siri ekspedisi saintifik dalam tahun 2007 di kawasan-kawasan seperti berikut :

- (i) Cameron Highlands, Pahang  
(20 - 25 Mei 2007);
- (ii) Royal Belum II, Perak  
(18-23 Jun 2007); and
- (iii) Gunung Angsi, Kuala Pilah, N. Sembilan  
(2 - 6 Julai 2007).

Ekspedisi-ekspedisi ini telah dianjurkan dengan penyertaan dari Universiti Putra Malaysia (UPM), Universiti Kebangsaan Malaysia (UKM), Universiti Sains Malaysia (USM), Institut Penyelidikan Perhutanan Malaysia (FRIM), Institut Penyelidikan Perubatan (IMR), Persatuan Pencinta Alam Malaysia (MNS), World Wide Fund for Nature (WWF) dan lain-lain agensi kerajaan serta bukan kerajaan.

*Following the Tsunami disaster in 2004, there was the realization on the importance of Mangrove Forests as a buffer to break, stop and reduce the force of the sea. In line with this, a Special Task Force on the Planting Programme with Mangroves and Other Suitable Tree Species Along the National Coastline was established at Kampung Baru Pulau Sayak, Kota Kuala Muda, Kedah on 2 February 2007. The Planting of Mangroves and Other Suitable Tree Species along the National Coastline was launched by the Honorable Prime Minister of Malaysia.*

*The National Gaharu Conference 2007 was organised on 11 September 2007 to ensure agewood as a source of forest biodiversity will continue to be conserved and the agewood industries continued to be developed. On 15 - 18 December 2007, Seminar on Economic Valuation on Forest Goods and Services was held to discuss the economic valuation on forest goods and services such as log, rattan, bamboo, medicinal and forest services such as recreational forest, eco-tourism, water resource and clean air.*

#### **Forest Biological Diversity Scientific Expeditions**

*During the year, the Department continued to improve and enhance its scientific knowledge base and documentation of the floral and fauna composition. The FDPM conducted three (3) scientific expeditions in 2007 in the following areas:*

- (i) Cameron Highlands, Pahang  
(20 - 25 May 2007);*
- (ii) Royal Belum II, Perak.  
(18-23 June 2007); and*
- (iii) Gunung Angsi, Kuala Pilah, N. Sembilan  
(2 - 6 July 2007).*

*These expeditions were organized with participation from Universiti Putra Malaysia (UPM), Universiti Kebangsaan Malaysia (UKM), Universiti Sains Malaysia (USM), Forest Research Institute of Malaysia (FRIM), Institute of Medical Research (IMR), Malaysian Nature Society (MNS), World Wide Fund for Nature (WWF) and other government and non-governmental agencies.*

JPSM juga telah menganjurkan beberapa seminar sebagai usaha untuk menyampaikan keputusan dan penemuan hasil daripada ekspedisi yang telah diadakan. Sehingga kini sebanyak empat belas (14) siri seminar telah dianjurkan termasuk tiga (3) seminar pada tahun 2007, iaitu Seminar Ekspedisi Saintifik Kepelbagai Biologi Hutan Bukit Bauk, Terengganu pada 6 - 7 Ogos 2007, Seminar Ekspedisi Saintifik Kepelbagai Biologi Hutan Gunung Panti, Johor pada 3 - 4 Disember 2007 dan Seminar Ekspedisi Saintifik Kepelbagai Biologi Hutan, Hutan Simpan Bintang Hijau, Perak pada 10 - 11 Disember 2007. Rumusan seminar-seminar tersebut sedang didokumentasikan dalam bentuk buku prosiding. Sehingga penghujung 2007, sebanyak sepuluh (10) Prosiding Seminar Ekspedisi Saintifik Kepelbagai Biologi telah berjaya diterbitkan.

## V. PENGUSAHASILAN HUTAN

### Kawasan Dibuka Untuk Pengusahasilan

Dalam tahun 2007, kawasan HSK seluas 29,621 hektar telah diusahasaskan di bawah prinsip pengurusan hutan secara berkekalan. Kawasan ini merupakan 80.0% daripada Catuan Tebangan Tahunan yang ditetapkan iaitu 36,955 hektar. Selain daripada itu, Hutan Tanah Kerajaan seluas 30,552 hektar dan Hutan Tanah Berimilik seluas 22,492 hektar turut diusahasaskan.

**Kawasan Dilesenkan Untuk Pengusahasilan, 2007 (Hektar)**  
**Area Licensed For Harvesting, 2007 (Hectares)**

JENIS HUTAN/ Forest Types	HEKTAR/ Hectares	Peratus/ Percent (%)
Hutan Simpanan kekal <i>Permanent Reserved Forest</i>		
- CTT*	29,621	48.8
- Bukan CTT**	20,934	
Hutan Tanah Kerajaan <i>Stateland Forest</i>	30,552	29.5
Hutan Tanah Berimilik <i>Alienated Land</i>	22,492	21.7
<b>JUMLAH/ Total</b>	<b>103,559</b>	<b>100.0</b>

\* Kawasan HSK yang diurus di bawah prinsip Pengurusan Hutan Secara Berkekalan dan diusahasaskan di bawah amalan Sistem Pengurusan Memilih [SMS] / PRF managed under Sustainable Forest Management Principles and harvested under Selective Management Systems

\*\* Kawasan HSK yang diusahasaskan secara tebang habis untuk tujuan penyelidikan, pembangunan dan perladangan hutan / PRF clear felled for forest research, development and plantation.

FDPM also organized several seminars in its efforts to disseminate information from the findings of the expeditions. To date, a series of fourteen (14) seminars had been organized including three (3) seminars in 2007, namely the Seminar on Forest Biological Diversity Scientific Expedition of Bukit Bauk, Terengganu from 6 - 7 August 2007, Seminar on Forest Biological Diversity Scientific Expedition of Gunung Panti Johor from 3 - 4 December 2007 and Seminar on Forest Biological Diversity Scientific Expedition of Bintang Hijau Forest Reserve, Perak from 10-11 December 2007. The findings from the seminars had been documented and published in proceedings. At the end of 2007, a total of ten (10) Scientific Expedition Seminar Proceedings on Forest Biodiversity had been successfully published.

## V. FOREST HARVESTING

### Area Opened For Harvesting

In 2007, a total of 29,621 hectares of PRF was harvested based on sustainable forest management principles. This represented 80.0% of the Annual Allowable Cut approved totaling 36,955 hectares. In addition, an area of 30,552 hectares of Stateland Forest and 22,492 hectares of Alienated Land were also harvested.

## VI. PENGELUARAN

Dalam tahun 2007, pengeluaran kayu balak, kayu gergaji, venir dan kayu kumai berkurangan masing-masing sebanyak 10.1%, 11.6%, 53.4% dan 44.1%. Hanya pengeluaran papan lapis meningkat sebanyak 3.2% berbanding dengan jumlah pengeluaran pada tahun 2006.

**Pengeluaran Hasil Kayu Utama ( $m^3$ ) 2007**  
**Production Of Major Timber Products ( $m^3$ ) 2007**

PENGELUARAN/ <i>Production</i>	2007	2006	% PERUBAHAN/ <i>change</i> 2007/2006
Kayu Balak / <i>Logs</i>	4,220,302	4,693,447	-10.1
Kayu Gergaji / <i>Sawntimber</i>	2,668,030	3,018,881	-11.6
Papan Lapis / <i>Plywood</i>	473,145	458,738	+3.2
Venir / <i>Veneer</i>	45,293	97,191	-53.4
Kayu Kumai / <i>Moulding</i>	195,716	349,964	-44.1

## VII. INDUSTRI BERASAS KAYU

Pada tahun 2007, sebanyak 2,230 kilang pemprosesan berasaskan kayu telah dilesenkan oleh JPSM. Kilang perabot/kilang kerja kayu/pertukangan mencatatkan bilangan kilang terbesar diikuti oleh industri kilang papan seperti yang ditunjukkan di jadual berikut:

**Bilangan Industri Berasas Kayu Utama 2007**  
**Number Of Major Wood-based Industries 2007**

JENIS INDUSTRI/ <i>Type Of Industry</i>	BILANGAN/ <i>Number</i>
Kilang Papan/ <i>Sawmill</i>	667
Kilang Papan Lapis/Venir/ <i>Plywood/Veneer Mill</i>	53
Kilang Kayu Kumai/ <i>Moulding Mill</i>	175
Perabot/Kilang Kerja Kayu/ Pertukangan Tangan <i>Furniture/Wood Working/Joinery Mill</i>	1,298
Kilang Papan Blok/ <i>Blockboard Mill</i>	10
Kilang Papan Serpai/ <i>Chipboard Mill</i>	12
Kilang Papan Gentian Sederhana Padat (MDF)/ <i>Medium Density Fibreboard (MDF) Mill</i>	7
Kilang Papan Serpih/ <i>Moulded Particleboard Mill</i>	8

## VI. PRODUCTION

In 2007, the production of sawlogs, sawntimber, veneer and moulding decreased by 10.1%, 11.6%, 53.4% and 44.1% respectively. Only the production of plywood increased by 3.2% as compared to the total production in 2006.

## VII. WOOD-BASED INDUSTRIES

In 2007, there were 2,230 wood-based processing mills licenced by FDPM. The furniture/wood-making/joinery mills constituted the largest number followed by the sawmill industry, as shown in the following table:

## VIII. SUMBANGAN SOSIOEKONOMI

### Sumbangan Kepada Keluaran Dalam Negara Kasar (KDNK)

Pada tahun 2007, sektor perhutanan telah menyumbang sebanyak RM22.7 bilion atau 3.2% daripada jumlah Keluaran Dalam Negara Kasar Malaysia.

#### Perdagangan Hasil-Hasil Kayu

Pada tahun 2007, jumlah pendapatan eksport hasil kayu dari Malaysia telah menurun sebanyak 2.5% kepada RM22.7 bilion berbanding tahun 2006 (RM23.4 bilion). Ini merupakan 3.8% dari jumlah hasil eksport kasar Malaysia iaitu f.o.b RM605.1 bilion.

Perabot (RM6.72 bilion) dan papan lapis (RM6.27 bilion) merupakan penyumbang terbesar (57.2%) kepada jumlah keluaran eksport kayu dan eksport hasil berasaskan kayu. Amerika Syarikat, Jepun dan Kesatuan Eropah adalah antara destinasi eksport utama negara.

Bagi Semenanjung Malaysia, eksport hasil kayu dan hasil berasaskan kayu yang berjumlah RM11.66 bilion telah mencatatkan peningkatan sebanyak 2.3% berbanding RM11.40 bilion pada tahun 2006.

#### Jumlah Kutipan Hasil Kerajaan Negeri

Kutipan hasil hutan diperolehi terutamanya dari royalti, premium, ses pembangunan hutan, denda, pampasan dan lain-lain (lesen dan yuran). Kutipan ini telah menyumbang RM314.4 juta kepada hasil kerajaan negeri pada tahun 2007.

## VIII. SOCIOECONOMIC CONTRIBUTIONS

### Contribution to Gross Domestic Product (GDP)

*In 2007, the forestry sector contributed RM22.7 billion or 3.2% of Malaysia's Gross Domestic Product.*

#### Timber Products Trade

*In 2007, total export earnings from Malaysian timber products decreased by 2.5% to RM22.7 billion as compared to 2006 (RM23.4 billion). This accounted for 3.8% of the total gross export earnings of Malaysia at f.o.b RM605.1 billion.*

*Furniture (RM6.72 billion) and plywood (RM6.27 billion) together contributed the major portion (57.2%) of the total timber and timber-based product export earnings. United States of America, Japan and European Union were amongst the major export destinations.*

*For Peninsular Malaysia, export of timber and timber-based products which amounted to RM11.66 billion, registered an increase of 2.3% as compared to RM11.40 billion in 2006.*

#### Total State Government Revenue Collected

*Forest revenue derived mainly from royalty, premium, forest development cess, fines, compensation and others (such as licence charges and fees). The forest revenue contributed RM314.4 million to the state coffers in 2007.*

## Jumlah Pekerjaan Secara Langsung

Dalam tahun 2007, jumlah pekerjaan secara langsung dalam sektor perhutanan di Semenanjung Malaysia berjumlah 95,274 orang. Ini mencatatkan penurunan keseluruhan sebanyak 0.4% berbanding tahun 2006. Hanya Industri perabot dan Kayu kumai menunjukkan peningkatan sebanyak 8.6% dan 0.8%. Butir-butir lanjut tenaga kerja mengikut industri adalah seperti berikut :

**Gunatenaga Secara Langsung Dalam Sektor Perhutanan, Semenanjung Malaysia, 2007**  
**Total Direct Employment In the Forestry Sector, Peninsular Malaysia, 2007**

INDUSTRI/ Industry	PEKERJAAN/Employment	PERUBAHAN TAHUNAN Annual Change (% 2007/2006)
<b>Jumlah / Total</b>	<b>95,274</b>	<b>+1.32</b>
Pembalakan/ <i>Logging</i>	7,906	-6.8
Kilang Papan/ <i>Sawmill</i>	21,031	-7.9
Papan Lapis/ Venir/ <i>Plywood/ Veneer</i>	5,696	-6.3
Kayu Kumai/ <i>Moulding</i>	5,035	+0.8
*Perabot/ * <i>Furniture</i>	50,119	+8.7
Awam/ <i>Public</i>	5,487	-0.56

\* Perangkaan untuk Malaysia, seperti yang dikeluarkan dalam Statistik Pengeluaran Bulanan (Disember 2007) oleh Jabatan Perangkaan Malaysia  
*Figure for Malaysia, as published in Monthly Manufacturing Statistics [December 2007] by Department of Statistics Malaysia*

## Jumlah Pelaburan

Pada tahun 2007, jumlah pelaburan dalam industri berasas kayu utama di Semenanjung Malaysia berdasarkan nilai harta tetap adalah RM2.12 juta. Ini mencatatkan peningkatan 7.9% dari tahun 2006 (RM1.97 juta). Dari jumlah ini, RM1.09 juta atau 51.5% adalah pelaburan dalam industri kilang papan, RM0.62 juta atau 29.2% dalam industri papan lapis/venir dan RM0.41 juta atau 19.3% adalah dalam industri kayu kumai.

## Total Direct Employment

In 2007, the forestry sector in Peninsular Malaysia employed 95,274 persons. This registered an overall decrease of 0.4% as compared to 2006. Only the furniture and moulding industry reported an increase in employment of 8.6% and 0.8%. Details of direct employment by industry are as follows

## Total Investment

In 2007, the total investment in major wood-based industries in Peninsular Malaysia in terms of fixed assets was RM2.12 million, indicating an increase of 7.9% from 2006 (RM1.97 million). Of this total, RM 1.09 million or 51.5% were invested in the sawmilling industry, RM0.62 million or 29.2% in the plywood/veneer industry and RM0.41 million or 19.3% were in the moulding industry.

## IX. PEMBANGUNAN SUMBER MANUSIA

Dalam tahun 2007, Jabatan telah memberi tumpuan kepada sumber-sumber yang penting bagi menyedia dan mengendalikan latihan dan program pembelajaran yang berkaitan bagi memprolehi pengetahuan dan kemahiran terkini kepada kakitangan. Sejumlah 948 staf JPSM telah mendapat manfaat dari pelbagai aktiviti latihan yang dijalankan di sepanjang tahun. Di samping itu, seramai 56 orang telah menghadiri Kursus Sijil Pengawas Hutan di Sekolah Perhutanan Kepong dan berjaya memperolehi sijil masing-masing. Manakala seramai 17 orang telah menghadiri Kursus Sijil Perhutanan Renjer Hutan bagi sesi 2006/2007. Program latihan sepanjang 2007 adalah seperti berikut:

## IX. HUMAN RESOURCE DEVELOPMENT

*In 2007, the Department had devoted significant resources to provide and organize relevant training and learning programmes for staffs to acquire new knowledge and skills. A total of 948 staffs from the Department had benefited from the various training activities implemented during the year. In addition, 56 persons who attended the Forester Certificate Course in the School of Forestry, Kepong had successfully obtained their Forester Certificates, while a total of 17 candidates attended the Forestry Ranger Certificates Course for the 2006/2007 session. The training programmes during 2007 were as follows :*

## PENGUMPULAN DAN PEMPROSESAN MADU LEBAH LIAR COLLECTION AND PROCESSING OF WILD HONEY

Lebah tergolong dalam famili *Apidae* dan terdiri daripada genus *Apis*, disifatkan dengan pembentukan sarang secara menegak daripada sel-sel yang berbentuk segi enam pada dahan pokok dengan menggunakan lilin yang diliurkan oleh lebah pekerja. Dua sifat semulajadi madu lebah adalah perangai berkelompok serta berkongsi informasi tentang sumber-sumber makanan dengan tarian isyarat.

Terdapat empat spesies lebah dalam genus *Apis*, iaitu *A. dorsata*, *A. mellifera*, *A. cerana* dan *A. florea*. Dua spesies yang biasanya digunakan untuk pemeliharaan lebah adalah dalam satu koloni sarang lebah, terdapat seekor ratu lebah, 60,000 – 80,000 lebah pekerja dan beberapa ratus lebah jantan. Fungsi penting lebah ratu hanya menghasilkan telur dan seterusnya menghasilkan sama ada lebah pekerja, lebah jantan atau ratu baru. Tugas utama biologikal lebah jantan hanya untuk melakukan persenyawaan dengan ratu lebah. Lebah pekerja: mengumpul pollen dan nektar untuk dijadikan madu, sumber makanan dan juga bertindak sebagai askar. Madu yang dihasilkan oleh lebah liar adalah daripada spesies *A. dorsata*. Kebiasaanannya, lebah spesies ini membuat sarang pada pokok Tualang [*Koompassia excelsa*] kerana batang pokok tersebut licin dan tinggi untuk mengelakkan sarang diganggu oleh pemangsa.

Pokok Tualang [*Koompassia excelsa*]

Bees belonging to the family *Apidae* with a single genus, *Apis*, which is characterized by the building of vertical combs of hexagonal cells constructed bilaterally from a midrib, using only wax secreted by worker bees. Two behavioral characters of honey bees are their clustering behaviour and the communication of information about food sources as well as the recruitment of foragers by 'dance language'.

The genus comprises four species, namely *A. dorsata*, *A. mellifera*, *A. cerana* and *A. florea*. *A. mellifera* and *A. cerana* are usually used in apiculture. In a single honey bee colony, there is one queen bee, 60,000 – 80,000 worker bees and several hundred drone bees. The essential function of the queen bee is to lay eggs which eventually will either become worker bees, drones or a new queen. The sole biological function of drones is to mate with queens. The worker bees sequentially take on a series of specific chores during their lifetime : collecting pollen and nectar to become honey, guards and under-takers. Wild honey is mainly obtained from *A. dorsata* species. These species usually build their nests suspended on Tualang trees [*Koompassia excelsa*] because of its smooth bark and height, making access to terrestrial predators very difficult.

Pengumpul madu memanjat pokok dengan kaedah paku  
Honey collector climbing tree using nails as steps

Pengumpulan madu lebah liar (*A. dorsata*) di hutan merupakan kerja yang berisiko tinggi. Pada masa sekarang, aktiviti tersebut semakin kurang dilakukan oleh generasi muda disebabkan banyak tarikan pekerjaan yang menawarkan pendapatan lebih menarik dan alternatif kepada orang ramai untuk mendapatkan madu di pasaran yang dihasilkan oleh penternak lebah (*A. mellifera*). Aktiviti pengumpulan madu lebah liar hanya dilakukan oleh masyarakat kampung sebagai menambah pendapatan sampingan selain untuk kegunaan sendiri. Disebabkan nilai khasiat madu, kekurangan bekalan dan risiko tinggi terlibat dalam penuaan madu lebah liar, terpaksa memanjat melebihi 220 kaki pokok Tualang, maka harga yang ditawarkan menjadi mahal.

Lazimnya pengumpulan madu lebah liar dijalankan secara berpasangan atau ada kalanya berkumpulan setelah lokasi sarang lebah telah dikenalpasti. Madu lebah liar hanya akan dituai sekiranya telah matang, iaitu bentuk sarangnya berlengkung atau selepas 44 hari dari mula sarang dibina untuk memastikan ianya matang. Selain daripada kaedah membina tangga, kaedah memasang paku sepanjang 6 inci pada batang pokok untuk pengumpul memanjat pokok tersebut. Terdapat juga dimana sesetengah pencari menggunakan kaedah tali rotan dan panjat pokok bersebelahan yang mempunyai sarang lebah. Masa yang sesuai bagi pengumpulan madu ialah malam untuk mengelak daripada disengat lebah tetapi ada kalanya, dijalankan pada siang hari bagi mereka yang sudah lali dengan sengatan lebah.

Peralatan utama yang digunakan ialah pisau, baldi, tali dan bahan pengasap bagi menghasilkan asap untuk menenangkan lebah. Bahan pengasap terdiri

Menenangkan lebah dengan menggunakan asap  
Smoke used to calm the bees

*Harvesting of wild honey [*A. dorsata*] in the forest is dangerous work. Currently, the younger generations are less keen in such job because of better opportunities offering attractive incomes and alternatives in purchasing honey produced by bees reared by apiculturists [*A. mellifera*] from the market. This activity is mainly carried out by the rural folks to supplement their incomes besides for their own consumption. Due to its nutritional value, scarce resources and high risks involved in the harvesting of wild honey, having to climb more than 220 feet high Tualang trees, the price of wild honey offered becomes more expensive.*

Menurunkan baldi yang mengandungi sarang lebah  
*Lowering of pail containing honey comb*

*Wild honey collection is usually carried out in pairs, but at times, in groups after the location of the bees' hives is identified. Wild honey is usually harvested when the shape of the bees' hive is curved (bent down) or 44 days after the bees make their hives to ensure that the honey is matured. The harvester will either construct ladders made from branches onto the trees or nail six inches nails onto the trees as steps for climbing to collect the honey. There are other collectors who use rattan ropes or climb the adjacent tree before crossing over to the host tree. Honey collection is usually carried out in the night to prevent the attack of the bees, although some harvesters who are numbed with bees' stings prefer to do it in the morning.*

daripada bunga kelapa sawit, kulit pokok kenanga, sabut kelapa dan reja-reja kayu. Bahagian sarang lebah yang mengandungi madu dipotong dengan menggunakan pisau dan dimasukkan ke dalam baldi. Kemudian baldi berisi madu akan diturunkan dengan menggunakan tali dengan bantuan pembantu di bawah pokok tersebut.

Mengambil bahagian sarang lebah yang mengandungi madu secara tidak langsung dapat mengurangkan kerosakan pada keseluruhan sarang lebah dan membolehkan lebah dapat menghasilkan semula madu pada sarang yang sama dalam tempoh masa yang lebih singkat, puratanya 20 hari. Walau bagaimanapun, terdapat juga pencari yang mengambil keseluruhan sarang lebah untuk dijadikan lilin.

Baldi yang mengandungi sarang lebah akan dibawa balik ke rumah untuk ditapis dan dibotarkan. Bagi pengumpul orang asli, madu yang diperolehi akan dijual bersama sarang terus kepada orang tengah tanpa pemprosesan. Untuk aktiviti pemprosesan, sarang lebah yang berisi madu dibelah dua bagi mengeluarkan madu dari dalam sarang. Madu dibiarkan mengalir ke dalam bekas (plastik) dan kemudiannya ditapis untuk mengasingkan benda asing. Madu yang ditapis akan dimasukkan ke dalam botol dan ditutup dengan penutup jenis gabus ataupun plastik. Bekas logam tidak boleh diguna untuk menyimpan madu kerana akan mencemar madu dengan toksik besi dan plumbum.

Warna dan rasa madu turut mempengaruhi harga madu. Warna madu berbeza dari warna kuning keemasan ke perang kehitaman. Manakala,

Menapis madu  
*Sieving honey*

*The main equipments used for harvesting are knife, pail, rope and materials used to produce smoke to calm the bees. These materials include oil palm's flower, kenanga barks, coconut husk and wood chips. The part containing the honey is scraped from the comb using a knife and placed into the pail. The pail is then lowered by means of ropes to an assistant on the ground.*

*Harvesting the part containing the honey does not result in the whole colony being killed. The bees are able to reconstruct their nests in a shorter period, averagely in 20 days. However, there are others who harvest the whole nests for beeswax.*

Sarang lebah yang dikumpulkan  
*Honey comb collected*

*The pail containing the honey will be brought home for sieving and bottled. The orang asli usually do not process the honey but sold their harvest which include the comb directly to the middleman. The collected honey combs are then sliced into half and left to drip dry onto a plastic container. An ordinary sieve is used for removing any impurities. The sieved honey is then bottled and sealed, usually with a cork. It is not advisable to use metal containers as they can taint the sweet honey with toxic iron and lead.*

rasa berubah dari manis ke sangat manis dan adakalanya terdapat sedikit rasa buah-buahan dan bunga bergantung kepada sumber nektar yang diperolehi dari persekitaran. Madu yang telah siap dibotolkan akan dijual secara terus kepada pembeli dengan harga diantara RM 100 – 150 sekilo atau RM 60 - 80 sekilo kepada orang tengah. Namun bagi masyarakat orang asli, madu yang diperolehi akan dijual bersama sarang dengan harga diantara RM 17 – 20 sekilo.

*Colours and tastes of wild honey also influenced the price of honey. The honey colours vary from golden light yellow to shades of dark brown. Meanwhile, the taste differs from lightly sweet, too sweet, bitter sweet, flowery to subtly fruity. All these depended on the nectar and pollen collected by the wild bees. Bottled honey sold to customers ranged from RM 100 – 150 per kg or RM 60 – 80 per kg to middleman. Orang asli honey collectors sell the honey with comb at RM 17 – 20 per kg.*

Madu dalam botol  
*Bottled honey*

## PROJEK TANAMAN KARAS (*Aquilaria malaccensis*) OLEH JABATAN PERHUTANAN NEGERI TERENGGANU – SATU PENGALAMAN *KARAS (Aquilaria malaccensis) PLANTATION PROJECT BY THE TERENGGANU STATE FORESTRY DEPARTMENT – AN EXPERIENCE*

### 1.0 PENGENALAN

Gaharu berasal dari perkataan Sansekerit iaitu "agaru" yang bererti kayu berat [tenggelam] sebagai produk damar atau resin dengan aroma yang harum apabila kayu dibakar. Gaharu dikenali dengan lebih dari 20 nama seperti agaru, aloeswood, agar wood, eagle wood, chen-xiang, jinkoh, jinko, oud, ood, ud dan lain-lain lagi.

Di negara Asian terdapat lebih kurang 15 spesies gaharu. Gaharu diperolehi dari sejenis tumbuhan dari famili *Thymelaeaceae*. Spesies yang paling popular berkaitan dengan gaharu adalah *Aquilaria malaccensis*. Spesies ini merupakan spesies yang mempunyai ketinggian 25 meter hingga 36 meter atau lebih dan mempunyai diameter di paras dada sehingga 60 centimeter [Anon, 1973]. Antara negara-negara yang mempunyai spesies ini adalah Bangladesh, Bhutan, India [Assam, Manipur, Meghalaya, Tripura], Indonesia [Kalimantan, Sumatera], Iran, Malaysia [Semenanjung Malaysia], Myanmar, Philippines, Singapura dan Thailand.

Di Semenanjung Malaysia terdapat lima spesies *Aquilaria* yang berpotensi boleh menghasilkan "aleoresins" [Chang et al, 2001] seperti di **Jadual 1**.

### 1.0 INTRODUCTION

*Gaharu comes from the Sanskrit word "agaru" which means heavy wood [sinking] is an aromatic resin product that emits pleasant fragrance when burnt. Gaharu is also known by more than 20 names like agaru, aloeswood, agar wood, eagle wood, chen-xiang, jinkoh, jinko, oud, ood, ud and many more.*

*In Asian countries, there are about 15 species of gaharu. It is extracted from a plant species in the family Thymelaeaceae. The most popular species related to gaharu is Aquilaria malaccensis. This species can grow to a height of 25 meters to 36 meters or more, and a diameter measured at breast height of up to 60 centimeters [Anon, 1973]. This species are found in Bangladesh, Bhutan, India [Assam, Manipur, Meghalaya, Tripura], Indonesia [Kalimantan, Sumatera], Iran, Malaysia [Peninsular Malaysia], Myanmar, the Philippines, Singapore and Thailand.*

*There are five species of Aquilaria that have the potential to produce 'aleoresins' in Peninsular Malaysia [Chang et al,2001] as shown in Table 1.*

**Jadual / Table 1 : Spesies Aquilaria Yang Boleh Menghasilkan Gaharu Di Malaysia**  
*Aquilaria Species That Can Produce Gaharu In Malaysia*

Spesies / Spesies	Nama Tempatan / Local Name	Gred / Grade

Ladang Karas  
Karas Plantation

## 2.0 PROJEK TANAMAN KARAS

Pada pertengahan tahun 2005, Jabatan Perhutanan Negeri Terengganu telah mengambil inisiatif menubuhkan Ladang Karas seluas 47 hektar di Hutan Simpan Merchang, Marang. Projek tanaman karas ini dimulakan pada bulan Ogos tahun 2005 dimana kerja-kerja menebas, menebang, membakar, menggali parit serta membaiki jalan-jalan yang sedia ada dilakukan. Kerja-kerja menanam pula dimulakan pada bulan Oktober dan siap pada bulan November 2005.

Di antara faktor-faktor yang menyumbang kepada kejayaan projek ini ialah:-

a. **Keadaan cuaca**

Pokok karas boleh tumbuh pada ketinggian 750 meter dari aras laut dengan suhu antara 28°C hingga 34°C. Kelembapan pula antara 60% hingga 80%. Sementara curahan hujan pula adalah antara 1,000 hingga 2,000 millimeter/tahun.

b. **Kadar pertumbuhan**

Sebagai perbandingan, Sumarna (2002) telah melaporkan kadar pertumbuhan spesies *Aquilaria malaceensis* di Indonesia ialah 1.64 sentimeter/tahun, manakala kadar pertumbuhan yang direkod di negeri Terengganu pada masa ini menunjukkan ketinggian sehingga 2.54 meter bagi spesies yang sama selepas dua tahun ianya di tanam.

c. **Peratus kehidupan yang tinggi**

Peratus kehidupan yang telah direkodkan oleh Jabatan Perhutanan Negeri Terengganu selepas tiga bulan ditanam daripada sejumlah 39,500 anak pokok adalah 83%.

d. **Umur pokok matang yang terpendek boleh menghasilkan gaharu secara proses inokulen**

Gaharu boleh dihasilkan melalui proses inokulen selepas beberapa tahun ditanam. Pada masa ini, Jabatan Perhutanan Negeri Terengganu berasaskan pemerhatian di Indonesia di mana

## 2.0 KARAS PLANTATION PROJECT

In mid-2005, the Terengganu State Forestry Department took the initiative to establish a 47-hectare Karas Plantation in the Merchang Forest Reserve, Marang. The project started with land clearing, cutting of trees, construction of drains and road repairs on existing roads in August 2005. Planting started in October and was completed in November 2005.

Among the factors that contributed to the success of this project are:-

a. **Weather condition**

The karas trees can grow to a height of 750 meters from sea level with temperatures between 28°C to 34°C. Humidity is between 60% to 80%. Meanwhile, rainfall is between 1,000 to 2,000 millimeter/year.

b. **Growth rate**

For comparison, Sumarna (2002) reported that the growth rate of *Aquilaria malaceensis* in Indonesia was 1.64 centimeter/year, while the growth rate recorded in Terengganu was 2.54 meter for the same species two years after planting begins.

c. **High percentage of survival**

The percentage of survival recorded by the Forestry Department of Terengganu after three months of planting 39,500 seedlings was 83%.

d. **The earliest tree that matures and can produce gaharu by using the inoculation process**

Gaharu can be produced using the inoculation process after several years of planting. Currently, the Terengganu State Forestry Department based the inoculation process on observations

Kerja-kerja membersihkan ladang Karas  
Clearing of undergrowth in Karas plantation

proses inokulen dimulakan seawal usia pokok lima tahun dan mendapatkan hasil gaharu selepas 10 tahun ditanam [Sumarna, 2002].

e. **Kaedah penanaman yang mudah**

Kaedah penanaman boleh dilaksanakan dengan beberapa cara antaranya secara monokultur dengan jarak tanaman yang sesuai iaitu 3m x 3m dengan jumlah pokok sebanyak 1,000 hingga 1,300 pokok se hektar atau boleh menggunakan jarak 2m x 3m dengan jumlah anak pokok yang ditanam boleh mencapai sehingga 1,600 pokok se hektar. Kawasan-kawasan yang dianggap miskin serta terosot boleh ditanam dengan pokok karas. Tanaman secara selang juga boleh diamalkan dibawah pokok-pokok lain yang berumur antara 5 hingga 8 tahun seperti di ladang kelapa sawit atau ladang kopi [Sumarna, 2002].

f. **Harga pasaran gaharu yang tinggi**

Harga pasaran gaharu adalah tinggi terutamanya di Arab Saudi, Hong Kong, Jepun, Vietnam, Egypt dan lain-lain negara untuk penghasilan minyak wangi dan nilai-nilai perubatan yang tinggi. Harga gaharu di pasaran ada dikatakan boleh mencapai RM 8,000/kg hingga RM10,000/kg.

### 3.0 KOS – KOS YANG TERLIBAT

Awal penubuhan ladang karas melibatkan kos-kos seperti di **Jadual 2**. Perbelanjaan keseluruhan projek ini menggunakan peruntukan kewangan Kumpulan Wang Pembangunan Hutan (KWPH).

*in Indonesia, where the trees were inoculated as early as five years old to yield gaharu after 10 years of planting [Sumarna, 2002].*

e. **Simple planting method**

*The method of planting is conducted in several ways such as monoculture where the trees are grown within the 3m x 3m distance with a total of 1,000 to 1,300 plants per hectare or using the 2m x 3m distance where the number of trees planted reached 1,600 per hectare. Areas that are considered poor and isolated can be planted with karas trees. It can also be planted as an inter-crop with other trees aged between 5 to 8 years old in oil palm or coffee plantations [Sumarna, 2002].*

f. **High market price for gaharu**

*The market price for gaharu is high especially in Saudi Arabia, Hong Kong, Japan, Vietnam, Egypt and other countries for the production of perfume and medicinal products. The market price for gaharu is said to be as high as RM 8,000/kg to RM10,000/kg.*

### 3.0 COSTS INVOLVED

*The costs of establishing a karas plantation are as shown in **Table 2**. The overall expenditure for this project is borne by allocations from the Forest Development Fund (KWPH).*

**Jadual / Table 2 : Kos Penubuhan Ladang Karas Seluas 47 ha\***  
**Costs of Establishing A Karas Plantation Over 47 ha\***

Bil./No.	Perbelanjaan / Expenditure	Jumlah Kos/ Total Cost (RM)
1.	Pembelian 70,000 anak pokok karas secara sebutharga <i>Purchase of 70,000 karas seedlings based on quotation</i>	115,500
2.	Penyediaan tapak dan aktiviti menanam <i>Preparation of site and planting activity</i>	115,560
3.	Lain-lain perbelanjaan <i>Other expenditure</i>	41,983
	<b>JUMLAH / TOTAL</b>	<b>270,043</b>

\* tidak termasuk harga tanah / exclude price of land

Sehingga kini, Jabatan Perhutanan Negeri Terengganu telah membelanjakan sebanyak RM 450,000 untuk kerja-kerja rawatan seperti membaja, merumpai, meracun, menyulam dan lain-lain kerja yang berkaitan.

Ladang Karas berusia dua tahun  
*Two years old Karas Plantation*

#### **4.0 MASALAH-MASALAH DAN CABARAN YANG DIHADAPI DAN LANGKAH-LANGKAH PENCEGAHANNYA**

##### **a. Serangan oleh scale insect**

Selepas 4 bulan ditanam, anak pokok karas yang telah ditanam telah diserang oleh sejenis *scale insect* dari spesies *Aulacaspis spp.*. Spesies ini telah menyerang daun dan batang yang menyebabkan daun menjadi kuning dan batang menjadi kering dan sekiranya tidak diambil tindakan segera menyebabkan pokok mati. Tindakan pencegahan yang perlu diambil ialah dengan menyembur racun yang mengandungi *white oil* sehingga 72% w/w seperti racun Albarol.

##### **b. Pokok musuh seperti *Acacia mangium* dan rumpai mengganggu pertumbuhan**

Masalah yang dihadapi selepas enam bulan ditamam ialah pokok-pokok karas telah bersaing dengan pokok-pokok *Acacia mangium* yang terlalu cepat tumbuh (purata ketinggian *Acacia mangium* ialah sekaki pada umur sebulan). Keadaan ini telah menyebabkan pertumbuhan anak-anak pokok karas terbantut. Masalah *Acacia mangium* boleh diatasi dengan menggunakan kaedah yang telah dipraktikkan oleh RRIM iaitu dengan menggunakan racun Garlon yang dicampur dengan minyak diesel dengan menggunakan formula 1:5 atau 1:9 dan disapu pada batang yang telah ditebas. Sementara rumput rumpai boleh diatasi dengan menggunakan racun-racun biasa yang ada di pasaran seperti CAPAYAN, SHOOT dan Paraquat 13.

To - date, the Forestry Department of Terengganu has spent RM 450,000 for fertilizing, weeding, pest control, replacing dead seedlings and other related work.

Serangan oleh ulat ratus  
*Spodoptera citura attacked*

#### **4.0 PROBLEMS, CHALLENGES FACED, AND PREVENTIVE MEASURES**

##### **a. Attack by scale insect**

After four months, the planted karas seedlings were attacked by a species of scale insect from *Aulacaspis spp.*. This species attacked the leaves and stems turning the leaves yellowish and the stems dry, and if no immediate steps being taken, the trees will die. Preventive measure taken was by spraying pesticides containing white oil up to 72% w/w like the poison Albarol.

##### **b. Invasive trees like *Acacia mangium* and weed that affect growth**

Problems faced after six months of growth was that the karas trees had to compete with the fast growing *Acacia mangium* trees (average growth of *Acacia mangium* is a foot in one month). This situation stunt the growth of the karas trees. The problem of *Acacia mangium* was overcome by using the method used by RRIM, that is mixing the poison Garlon with diesel using the 1:5 or 1:9 formula and is applied to the trunks that have been cut. As for weeds, it was controlled by using common herbicides available in the market like CAPAYAN, SHOOT and Paraquat 13.

- c. **Serangan oleh ulat ratus**  
**(*Spodoptera citura*)**  
Masalah ulat ratus didapati telah mengancam pokok karas selepas setahun penanamannya terutama selepas hujan turun dimana ulat-ulat ini telah memakan daun karas dan ada setengah daripada pokok yang diserang telah mati. Masalah ini boleh diatasi dengan menggunakan racun yang mengandungi bahan aktif cypermethrin seperti racun *Kencis* yang disembur pada daunnya.
- d. **Kejadian penyakit akar putih**  
**(*Rigidoporous lignosus*)**  
Penyakit ini dikesan melalui simptom pada pokok karas iaitu daun layu, berwarna kekuningan serta gugur dan akhirnya pokok tersebut akan mati. Biasanya pokok-pokok yang diserang berada di kawasan tanah pamah yang mana salirannya tidak baik. Bahan yang mempunyai bahan aktif hexaconazole perlu digunakan dengan menyiram racun ini pada pangkal pokok. Antara racun yang didapati dipasaran seperti *Xzole 50*, *Vantil*, *AGR Hexagon* boleh digunakan untuk merawat penyakit ini.
- e. **Serangan oleh ulat pengorek batang**  
**(*Rhytidodera simulans*)**  
Lazimnya ulat ini menyerang pokok dengan menetas di dalam ranting yang agak lembut dan mengorek masuk ke dalam batang yang lebih besar. Ranting atau dahan yang diserang akan mempunyai lubang dan jika serius daun-daun pada ranting dan dahan itu akan layu dan mati. Untuk mengatasi masalah ini ranting yang telah diserang dicantas dan dimusnahkan. Kawalan dengan menggunakan bahan kimia sebagai rutin juga dapat mengawal serangga ini iaitu dengan cara memasukkan racun *Malathion* ke dalam lubang dan ditutup dengan tanah liat atau plastersin.
- f. **Kejadian penyakit Koya** (*Phaenococcuc spp.*)  
Penyakit ini membawa kesan pada daun dimana daun akan menjadi kuning dan hampir layu disebabkan oleh air daripada daun diserap oleh spesies ini dan akhirnya daun akan gugur dan sekiranya tidak dikawal secepat yang mungkin pokok akan mati. Cara mencegahnya ialah dengan menyembur racun yang mengandungi *white oil* seperti racun *Albarol*.
- c. **Attack by *Spodoptera citura***  
This insect is a threat to one-year-old karas trees, and will attack the trees usually after a rainy spell where the leaves will be eaten and some trees will die after the attack. This problem can be overcome by applying herbicides containing cypermethrin like the poison *Kencis* sprayed onto the leaves.
- d. **White root disease**  
(*Rigidoporous lignosus*)  
This disease was detected by observing the wilting leaves when the leaves turned yellowish, drop and ultimately killing the trees. Trees that were affected were normally those located in areas with poor drainage. Chemical containing hexaconazole were sprayed at the base of the trees. Among the poison available in the market are *Xzole 50*, *Vantil*, *AGR Hexagon* that can be used to treat this disease.
- e. **Attack by bore insect**  
(*Rhytidodera simulans*)  
Usually these insects will attack a tree by boring and laying eggs that will hatch in the softer branches and once hatch, it will bore further into bigger branches. If the attack is serious, the leaves will wilt and branches will die. To overcome this problem, the attacked branches will be cut, removed and destroyed. Control is by applying chemicals on a routine basis that is by applying the poison *Malathion* in the hole and closing it with mud or plastercine.
- f. **The 'Koya' (*Phaenococcuc spp.*) disease**  
This disease effects the leaves where the leaves will turn yellow and wilt because of the absorption of the liquid by this species and finally the leaves drop and the plant may die unless it receives treatment early. Prevention is by spraying poison containing white oil like *Albarol*.

**g. Keperluan siram pokok karas di musim kemarau**

Musim kemarau di Terengganu berlaku diantara bulan April hingga Ogos. Pokok-pokok karas perlu disiram pada musim ini. Oleh itu pembinaan parit di dalam kawasan ladang yang mempunyai air sepanjang musim amat diperlukan samada untuk kegunaan meracun dan menyiram pada musim kemarau. Beberapa tangki air 500 liter juga telah dipasang di puncak bukit sebagai tempat menyimpan air yang berterusan. Tangki air bergerak juga telah digunakan di ladang ini.

**h. Keadaan tanah yang mempunyai pH yang rendah**

Keadaan tanah yang berasid dengan pH antara 4.2 hingga 4.25 adalah tidak sesuai untuk pertumbuhan pokok karas. Kerja-kerja pengapuran dengan menggunakan GML(*Ground Magnesium Limestone*) sebanyak 260g/pokok perlu dilaksanakan untuk mendapatkan pH tanah antara 5.5 hingga 6.5 supaya pokok-pokok karas dapat hidup dengan subur. Kerja-kerja pengapuran perlu dilakukan enam bulan sekali bagi menambahkan unsur *Ca* dan *Mg*. Selain daripada itu, kerja-kerja untuk memperbaiki sistem saliran perlu dilakukan supaya air tidak bertakung di kawasan tanaman. **Jadual 3** menunjukkan ukuran pH tanah yang telah diambil di dalam petak-petak tumbesaran seluas 1 ha yang ditubuhkan setelah 3 bulan kerja-kerja menanam selesai dijalankan.

**g. Need to water the karas tree during dry season**

The dry season in Terengganu occurs from April to August. The karas trees need to be watered during this season. As such, there is a need to construct drains in the plantation as water is required throughout the season. Water is not only used for watering but in pest control during the dry season. Several water tanks with the capacity of 500 litres have been placed at high elevations to store water. Mobile water tanks are also being used in the plantation.

**h. Soil containing low pH**

The soil acidity of pH between 4.2 to 4.25 is not suitable for the growth of karas trees. Lime had to be applied using GML (*Ground Magnesium Limestone*) to 260g/tree to achieve a soil pH of between 5.5 to 6.5 to support a healthy growth of the karas trees. Lime need to be applied every six months to improve the quantity of *Ca* and *Mg*. Apart from this, improvement to the drainage need to be carried out to prevent water stagnation. **Table 3** shows the measurement of pH of soil taken from the growth compartment in a one hectare area where planting had been carried out after three months.

**Jadual / Table 3 : Peratus Kematian Berbanding Dengan pH Tanah Serta Kandungan Ca dan Mg / Percentage of Mortality Compared With Soil pH and the Content of Ca and Mg**

Blok/ <i>Block</i> <i>(1 ha)</i>	pH Tanah <i>Soil pH</i>	Peratus Kematian <i>Mortality (%)</i>	Ca <i>(meq/100g)</i>	Mg <i>(meq/100g)</i>
1	5.5	15.15	0.46	0.19
2	5.0	18.78	0.24	0.07
3	4.1	21.81	0.19	0.01
4	4.6	11.12	0.45	0.07
<b>PURATA <i>AVERAGE</i></b>		<b>16.72</b>		

Dari **Jadual 3**, adalah didapati peratus purata kehidupan adalah 83.28%. Di samping ini, kandungan *Ca* dan *Mg* didapati kurang bagi blok 2 dan 3, oleh itu pengapuran dengan GML perlu dilakukan (260g/pokok) di blok-blok tersebut.

From **Table 3**, it was found that the average percentage of survival is 83.28%. In addition, the content of *Ca* and *Mg* was less for block 2 and 3, and therefore the application of lime with GML need to be carried out (260g/tree) in the blocks.

i. **Keperluan kejadian kawalan daripada binatang ternakan dan binatang liar**

Kedudukan kawasan ladang karas yang berhampiran dengan kawasan ladang kelapa sawit telah menimbulkan masalah dimana binatang ternakan dan binatang liar dari kawasan ladang kelapa sawit telah memasuki kawasan ladang. Bagi mengatasi masalah ini, Jabatan Perhutanan Negeri Terengganu telah memasang pagar elektrik yang menggunakan kuasa solar dengan kos yang rendah untuk mengelakkan kawasan ini diceroboh oleh binatang-binatang tersebut. Pagar ini pula tidak membahayakan kepada manusia.

## 5.0 STRATEGI MASA DEPAN

a. **Penubuhan Pusat Penyelidikan Karas Negeri Terengganu**

Pada tahun 2007, ladang karas telah diisyiharkan sebagai Pusat Penyelidikan Karas Negeri Terengganu. Untuk memastikan maklumat penyelidikan dalam penubuhan ladang ini tercapai, banyak lagi data-data perlu dikutip dan dikumpulkan untuk memastikan kejayaan tanaman ini di Malaysia. Banyak agensi yang berkaitan perlu dijemput untuk bekerjasama dalam melaksanakan penyelidikan. Sehingga ini terdapat dua agensi sahaja yang terlibat iaitu Jabatan Perhutanan Negeri Terengganu dan Agensi Tenaga Nuklear Malaysia.

Pusat Penyelidikan Karas Negeri Terengganu bakal menjadi Pusat Penerangan dan perlu dibuka kepada orang ramai atau agensi lain untuk dilawati. Secara tidak langsung, pusat ini turut menjadi satu destinasi pelancongan bagi negeri Terengganu. Kenyataan ini boleh direalisasikan dengan terbinanya jalan masuk ke pusat tersebut disamping sebuah Dewan Serbaguna dan dijangka siap pada tahun 2008.

b. **Mewujudkan Manual Penanaman Pokok Karas**

Manual Penanaman Pokok Karas perlu diwujudkan untuk menyebarkan maklumat kepada orang ramai dan agensi-agensi swasta yang berminat tentang cara-cara penanaman dan kawalan penyakit serta penyelenggaraan yang lebih sistematis untuk memastikan kejayaannya.

i. **Need to control pest, farm and wild animals**

*The location of the karas plantation near an oil palm plantation created problem where farm and wild animals encroached into the karas plantation. To overcome this problem, the Forestry Department of Terengganu has erected electric fence using solar energy that is cost efficient to prevent further encroachment by these animals. The fence poses no danger to humans.*

## 5.0 FUTURE STRATEGY

a. **Establishment of the Terengganu Karas Research Centre**

*In 2007, the karas plantation was declared as the Terengganu Karas Research Centre. To ensure that research information meet the objective of the establishment the research center, much more data need to be gathered to assist the success of such a project in Malaysia. Many related agencies have to be invited to co-operate in carrying out research. At this moment only two agencies, namely the Forestry Department of Terengganu and the Malaysian Institute of Nuclear Energy are involved.*

*The Terengganu Karas Research Center is set to become an Information Centre and should be opened to the public or other agencies. Indirectly, this center could become a tourist destination for the state of Terengganu. This could be realized with the construction of a road leading to the center besides a Multi-Purpose Hall expected to be completed in 2008.*

b. **Publishing a Manual on the Cultivation of Karas Trees**

*A manual on the cultivation of karas trees need to be published for the dissemination of information to the public and private agencies who are interested to learn about the cultivation and control of diseases as well as systematic maintenance to ensure its success.*

c. **Mempromosikan secara meluas penanaman pokok karas secara ladang**

Penanaman pokok karas secara ladang perlu dipromosikan kepada semua negeri-negeri di Malaysia untuk memastikan bekalan gaharu di masa hadapan akan terus berkekalan. Permintaan gaharu yang masih tinggi di pasaran dunia telah menyebabkan negara-negara lain seperti Vietnam, Kemboja, Thailand dan Indonesia menanam karas secara ladang dengan banyaknya.

d. **Mempertingkatkan kajian penghasilan gaharu**

Kajian untuk menghasilkan gaharu dengan lebih cepat melalui proses inokulen perlu diteruskan dari masa ke semasa. Agensi lain seperti Agensi Tenaga Nuklear Malaysia dan FRIM harus mengkaji dengan lebih intensif untuk menghasilkan gaharu sebagaimana yang telah dilaksanakan oleh Thailand dan Indonesia. Baru-baru ini Universiti Minnesota, Amerika Syarikat telah berjaya mencipta bahan inokulen yang dinamakan CA Kit dan telah dijual di beberapa negara seperti Vietnam, Thailand dan Malaysia.

c. **Promoting the cultivation of karas trees on a plantation scale**

*Planting karas trees on a plantation scale need to be promoted in all the states in Malaysia to ensure a sustainable supply of gaharu in the future. The high demand for gaharu in the world market has resulted in countries like Vietnam, Cambodia, Thailand and Indonesia cultivating karas on a plantation scale.*

d. **Enhancing research on production of gaharu**

*Research on enhancing the production of gaharu using the inoculation method must be intensified. Agencies such as the Malaysian Institute of Nuclear Energy and FRIM need to intensify their research on the production of gaharu like those initiated by Thailand and Indonesia. Recently, the Universiti Minnesota, USA succeeded in creating an inoculant called CA Kit and being sold to several countries like Vietnam, Thailand and Malaysia.*

MAJLIS PELANCARAN PROGRAM PENANAMAN POKOK BAKAU DAN SPESIES-SPESIES YANG SESUAI DI PESISIRAN PANTAI NEGARA PERINGKAT KEBANGSAAN DI KAMPUNG

BARU PULAU SAYAK, KOTA KUALA MUDA, KEDAH

*THE OFFICIAL LAUNCHING OF THE PLANTING PROGRAMME WITH MANGROVES AND OTHER SUITABLE TREE SPECIES ALONG THE NATIONAL COASTLINE AT KAMPUNG BARU PULAU SAYAK, KOTA KUALA MUDA KEDAH*

Pada 26 Disember 2004, masyarakat dunia telah dikejutkan oleh tragedi ombak besar tsunami yang telah melanda dan menenggelamkan beberapa kawasan pesisiran pantai di negara-negara rantau Asia, seperti Indonesia (Aceh), Sri Lanka, India, Myanmar, Thailand, Kepulauan Maldives serta negeri-negeri di sebelah pantai timur benua Afrika dan beberapa negeri di bahagian utara Semenanjung Malaysia. Gegaran gempa bumi di Utara Sumatera pada 9.0 skala Richter telah menghasilkan gelombang pertama melanda daerah Langkawi pada jam 12.20 tengahari manakala daerah Kuala Muda pada jam 1.15 tengahari dengan ketinggian mencecah 2.5 meter iaitu selepas 4 jam gegaran di Utara Sumatera.

Di kawasan yang serius dilanda ombak besar tersebut dilaporkan meragut beratus-beratus ribu nyawa terutama di kawasan pesisiran-pesisiran pantai yang luas terbuka dan tidak dilindungi dan terdedah kepada risiko ancaman ombak besar tsunami.

Salah satu kawasan pesisiran pantai di Utara Semenanjung Malaysia yang terjejas adalah Kota Kuala Muda, Kedah. Deretan rumah kediaman runtuh, kenderaan hanyut dibawa arus, bot-bot nelayan bergelimpangan, manakala jeti-jeti pengkalan nelayan rosak teruk dan lain-lain infrastruktur musnah. Ianya jelas menunjukkan kawasan-kawasan yang terlindung dengan dirian hutan paya laut seperti bakau dan nipah hanya mengalami kerosakan ringan berbanding dengan kawasan-kawasan penempatan yang terdedah kepada lautan luas.

Menyedari akan kepentingan hutan pesisiran pantai ini, Kementerian Sumber Asli dan Alam Sekitar

*On the 26<sup>th</sup> December 2004, the world was shocked when Tsunami struck and hit the shorelines of the Asian region covering Indonesia (Aceh), Sri Lanka, India, Myanmar, Thailand, the Island of Maldives and those areas on the eastern shores of the African continent and some states in the northern region of Peninsular Malaysia. As a result of a series of earth quakes that strike Northern Sumatera at a scale of 9.0 Richter scale, resulting in after shocks striking Langkawi at 12.20 pm and Kuala Muda experiencing a 2.5 meter high waves at 1.15 pm, that is four hours after the tremor.*

*Several coastlines were seriously affected resulting in the loss of hundreds of lives especially in areas not protected and vulnerable to Tsunami wave threats.*

*One of the areas in the northern region of Peninsular Malaysia shorelines seriously affected by the strong hit was Kota Kuala Muda, Kedah. Several houses were destroyed, vehicles swept away, fisherman boats thrown onto the land, jetties destroyed, while other infrastructures were badly affected. It is observed that areas protected with mangrove and nipah stands shown to be less affected as compared to those areas directly facing the open sea.*

*Notifying the significant contribution of the coastal forests, the Ministry of Natural Resources and*

telah membentuk satu Pasukan Petugas Khas Jawatankuasa Operasi Menanam Pokok Bakau dan Spesies-Spesies Yang Sesuai Di Pesisiran Pantai Negara yang dipengerusikan oleh Ketua Setiausaha Kementerian Sumber Asli dan Alam Sekitar untuk mengubal langkah-langkah penting untuk memulihar dan memelihara pantai Negara.

Kempen ke arah usaha pemuliharaan bermula dengan Jawatankuasa Tanaman Bakau telah mengatur suatu Majlis Pelancaran Penanaman Pokok Bakau dan Lain-lain Spesies Yang Sesuai Di Pesisiran Pantai Negara. Bagi tujuan ini, Kampung Baru Pulau Sayak di Kota Kuala Muda, Kedah telah dipilih sebagai Tapak Pelancaran Majlis dan telah disempurnakan oleh YAB Perdana Menteri Malaysia pada 2 Februari 2007. Tetamu-tetamu kehormat termasuk YB Dato' Seri Azmi bin Khalid dan YB Dato' Seri Mahadzir bin Khalid telah menanam pokok jenis Bakau Minyak (*Rhizophora apiculata*) bersama penduduk-penduduk setempat yang juga diberi kesempatan menanam pokok-pokok bakau sebanyak 100 pokok sebagai tanda keprihatinan mereka ke atas peranan tumbuhan pesisiran pantai dalam melindungi kawasan penempatan mereka. Majlis ini merupakan permulaan kepada usaha-usaha pemeliharaan hutan bakau dan tanaman pesisiran pantai. Ianya juga merupakan usaha untuk memulihara kawasan pesisiran pantai.

Selain daripada aktiviti penanaman pokok, juga diadakan pameran hutan paya laut oleh Jabatan Perhutanan Semenanjung Malaysia dan Institut Penyelidikan Perhutanan Malaysia. Pameran tersebut mempamerkan maklumat, penyelidikan-penyelidikan yang berkaitan dengan hutan paya laut dan peranannya kepada alam sekitar dan masyarakat setempat.

Seramai lebih kurang 2,000 tetamu telah melibatkan diri di dalam program penanaman pokok, termasuk 100 orang pelajar-pelajar sekolah berdekatan yang dijemput khas ke tapak pelancaran. JKKK Kota Kuala Muda bersama agensi-agensi kerajaan lain seperti Polis DiRaja Malaysia, Jabatan Bomba & Penyelamat,

*Environment formed a Special Task Force on the Planting Programme with Mangroves and Other Suitable Tree Species Along the National Coastline chaired by the Secretary-General, Ministry of Natural Resources and Environment has formulated strategies to rehabilitate and conserve the national coastline.*

*The campaign for rehabilitation of the coastline began with the forming of the Committee on Mangroves Planting organising the Official Launching of the Planting Programme with Mangroves and Other Suitable Tree Species Along the National Coastline. For this purpose, Kampung Baru Pulau Sayak in Kota Kuala Muda, Kedah was selected for the launching which was officiated by the Honorable Prime Minister of Malaysia on the 2nd February 2007. Other guests of honor, include, YB Dato' Seri Azmi bin Khalid and YB Dato' Seri Mahadzir bin Khalid who planted Bakau Minyak (*Rhizophora apiculata*) together with the villagers who planted 100 mangrove seedlings to show their concerns on the importance of mangrove stands in their village. This event marks the beginning of the efforts on mangrove conservation as well as the vegetation along the coastline. It is also an effort to conserve the national coastline.*

*Besides the tree planting activity, exhibition on mangroves were also displayed by the Forestry Department of Peninsular Malaysia and the Forest Research Institute Malaysia. The exhibitions display information, research on mangroves and its role to the environment and local communities.*

*A total of 2,000 visitors participated in the tree planting programme, including 100 school children from nearby schools were specifically invited to the launching site. The Kota Kuala Muda Village Security Committee (JKKK) and other various government agencies such as the*

Jabatan Kerja Raya, Jabatan Penerangan, Jabatan Pendidikan, Jabatan Kesihatan dan Jabatan Pengairan & Saliran juga turut berkerjasama bagi menjayakan majlis itu.

Pelbagai usaha akan dilakukan secara berterusan oleh agensi-agensi yang berkaitan untuk memulih dan memelihara pesisiran pantai negara terutama di lokasi yang telah dilanda ombak Tsunami seperti

*Police Force, Fire Department, the Public Works Department, Information Department, Education Department, Health Department and Drainage and Irrigation Department were also invited to participate to make this event a success.*

*Efforts were continuously taken by the relevant agencies to rehabilitate and conserve the national coastline, especially those areas seriously affected by the Tsunami, Kota Kuala*

YAB Perdana Menteri menyampaikan ucapan kepada hadirin dan seterusnya merasmikan Pelancaran Program Penanaman Pokok di Kota Kuala Muda, Kedah pada 2 Februari 2007

*YAB Prime Minister delivering his speech to the audience and officiates the Launching Ceremony of Tree Planting Programme at Kota Kuala Muda, Kedah on 2 February 2007*

YB Menteri Besar Kedah turut berucap di Majlis Pelancaran pada 2 Februari 2007

*YB Kedah Chief Minister also delivered a speech at the Launching Ceremony on 2 February 2007*

YB Menteri Sumber Asli dan Alam Sekitar berucap di Majlis Pelancaran pada 2 Februari 2007

*YB Minister of Natural Resources and Environment delivering his speech at the Launching Ceremony on 2 February 2007*

VIP yang turut hadir di Majlis Pelancaran

*The VIP at the Launching Ceremony*

di Kota Kuala Muda, Kedah. Jabatan Perhutanan Negeri Kedah telah melipatgandakan usaha-usaha pembangunan tanaman bakau di sepanjang pantai Kampung Baru Pulau Sayak, Kampung Sungai Yu, Kota Kuala Muda, Merbok dan juga di Langkawi. Sehingga kini, jumlah tanaman bakau yang telah dilaksanakan di Kedah ialah sebanyak 800,000 anak pokok. Namun, pengamatan susulan dari majlis pelancaran, mendapati kebanyakan anak-anak bakau telah musnah dibawa ombak. *Geotube* yang dipasang sepanjang pantai oleh Jabatan Pengairan & Saliran (JPS) bagi membantu memecah ombak dan melindungi anak-anak pokok dari pukulan ombak kuat juga telah gagal. Institut Penyelidikan Perhutanan Malaysia juga turut menjalankan tanaman percubaan anak-anak bakau sebanyak 1,000 pokok dengan pelbagai kaedah seperti tanaman dalam buluh atau *Bamboo Encasement Method* (BEM), tanaman menggunakan *Comp Mat*, tanaman dalam bakul dan lain-lain tanaman secara konvensional. Namun begitu, teknik-teknik ini juga gagal.

Jabatan Perhutanan Semenanjung Malaysia akan terus memperingati kawasan ini dan bercadang untuk mendirikan sebuah monumen sempena memperingati tragedi ombak besar Tsunami pada tahun 2004.

YAB Perdana Menteri melancarkan Program Penanaman Pokok Bakau Dan Spesis-Spesis Yang Sesuai Di Pesisiran Pantai Negara Peringkat Kebangsaan  
*YAB Prime Minister officiated the launching of the Planting Programme with Mangroves and Other Suitable Tree Species Along the National Coastline*

*Muda, Kedah. The Kedah Forestry Department has doubled its efforts towards the development and planting of mangroves along the shores of Kampung Baru Pulau Sayak, Kampung Sungai Yu, Kota Kuala Muda, Merbok and Langkawi. To-date, about 800,000 mangroves and other suitable trees species were planted in Kedah. However, follow-up visits made after the launching ceremony, found that most of trees planted during the launching were either washed away or dead. Geotube set up along the shorelines by the Drainage and Irrigation Department to break the waves and to protect the seedlings also failed. The Forest Research Institute also established planting trials of 1,000 mangrove seedlings using the various techniques such as the Bamboo Encasement Method (BEM), Comp Mat, basket encasement, as well as the conventional method. However, all these techniques failed.*

*With this, the Forestry Department Peninsular Malaysia will treasure this launching site of the tree planting programme and plans to build a monument to commemorate the Tsunami tragedy in 2004.*

# PERISTIWA DALAM TAHUN 2007

## EVENTS IN 2007

### 4 Januari / January

Majlis Memperbaharui Ikrar Perkhidmatan Awam 2007 di Ibu Pejabat Perhutanan.  
Year 2007 Public Services Pledge Ceremony at Forestry Department Headquarters

### 17-19 Januari / January

Retreat Bagi Membincangkan Perancangan Pelaksanaan Fizikal dan Pembangunan dan Perbelanjaan RMK9 di Pulau Pangkor, Perak

Retreat to Discuss the Planning for the Physical Implementation and Development and Expenditure under the 9th Malaysia Plan in Pulau Pangkor, Perak

### 2 Februari / February

Majlis Pelancaran Program Penanaman Pokok Bakau dan Spesies-spesies Yang Sesuai Di Pesisiran Pantai Negara yang telah disempurnakan oleh Y.A.B. Datuk Seri Abdullah bin Hj. Ahmad Badawi, Perdana Menteri Malaysia, di Kg Pulau Sayak, Kedah

Launching of the Planting Programme with Mangroves and Other Suitable Tree Species Along the National Coastline by Y.A.B. Datuk Seri Abdullah bin Hj. Ahmad Badawi, Prime Minister of Malaysia, at Kg Pulau Sayak, Kedah

### 11-15 Mac / March

Kursus Pengenalan Mesin/Peralatan dan Tatacara Permohonan Industri Berasas Kayu (Siri 1/2007) di Kuala Terengganu, Terengganu  
Introductory Course on Machinery/Equipment and Application Procedure of Wood-based Industries (Series 1/2007) at Kuala Terengganu, Terengganu

### 20 - 21 Mac / March

Persidangan Kebangsaan Pengurusan dan Konservasi Biodiversiti Hutan di Malaysia di Hotel Marriot, Putrajaya  
National Conference on the Management and Conservation of Forest Biodiversity in Malaysia at Marriot Hotel, Putrajaya

## 8 Mei / May

Majlis Penyampaian Sijil Bagi Kursus Sijil  
Renjer Hutan dan Sijil Pengawas Hutan  
*Certificate Presentation Ceremony for the  
Forest Ranger and Foresters Certificate  
Course*

## 9 -12 Mei / May

Retreat Pegawai-pegawai Kanan Bagi Perancangan  
Pelan Strategik JPSM di Genting Highlands, Pahang  
*Senior Officer's Retreat on Strategic Planning for FDPM  
at Genting Highlands, Pahang*

## 20 - 25 Mei / May

Ekspedisi Saintifik Kepelbagai Biologi Hutan  
Pergunungan, Cameron Highlands, Pahang  
*Forest Biological Diversity Scientific Expedition of  
Montane Forest, Cameron Highlands, Pahang*

## 24 Mei / May

Lawatan Kerja Menteri Sumber Asli Dan  
Alam Sekitar ke Jabatan Perhutanan Negeri  
Sembilan  
*Working Visit by the Honourable Minister of  
Natural Resources and Environment to Negeri  
Sembilan State Forestry Department*

## 11 Jun / June

Lawatan Kerja Oleh Pegawai-Pegawai Kanan  
Jabatan Perhutanan Sarawak Ke Pusat  
Eko-Pelajaran Hutan Paya Laut Matang,  
Kuala Sepetang, Perak  
*Working Visit by the Senior Officers of the  
Sarawak Forestry Department to the  
Eco-Education Centre, Matang Mangrove  
Forest, Kuala Sepetang, Perak*

## 13 - 23 Jun / June

Lawatan staf Jabatan Perhutanan Sarawak Ke  
Delta Kelantan, Kelantan  
*Visit by the Sarawak Forestry Department staff to the  
Kelantan Delta, Kelantan*

## 18 - 23 Jun / June

Ekspedisi Saintifik Kepelbagai Biologi Hutan Taman  
Royal Belum II, Perak.  
*Forest Biological Diversity Scientific Expedition of Taman  
Royal Belum II, Perak*

## 24 - 30 Jun / June

Kursus Keselamatan dan Kesihatan Pekerjaan  
di Sektor Perhutanan untuk Pihak Pengurusan  
anjuran Ibu Pejabat Perhutanan di Pulau  
Langkawi, Kedah  
*Course on Occupational Safety and Health in  
Forestry Sector for Managerial Level Organized  
by Forestry Department Headquarters in Pulau  
Langkawi, Kedah*

## 2 - 6 Julai / July

Ekspedisi Saintifik Kepelbagai Biologi Hutan  
Gunung Angsi, Kuala Pilah, Negeri Sembilan  
*Forest Biological Diversity Scientific Expedition of  
Gunung Angsi, Kuala Pilah, Negeri Sembilan*

## 27 Julai - 2 Ogos / July - August

Retreat Pembalakan Haram di Genting Highlands,  
Pahang  
*Retreat on Illegal Logging at Genting Highlands,  
Pahang*

## 6 - 7 Ogos / August

Seminar Ekspedisi Saintifik Kepelbagai  
Biologi Hutan Bukit Bauk, Terengganu  
di Awana Kijal, Terengganu  
*Seminar on Forest Biological Diversity  
Scientific Expedition of Bukit Bauk,  
Terengganu at Awana Kijal, Terengganu.*

## 12 - 16 Ogos / August

Kursus Pengenalan Mesin/Peralatan dan  
Tatacara Permohonan Industri Berasas Kayu  
(Siri 2/2007) di Port Dickson, Negeri Sembilan  
*Introductory Course on Machinery/Equipment  
and Application Procedure of Wood-based  
Industries (Series 2/2007) in Port Dickson, Negeri  
Sembilan*

## 13 - 24 Ogos / August

Bengkel 'Human Resources Development in  
Geographic Information System & Remote Sensing  
For The Forestry Personnel of ASEAN Countries' di  
Kuala Lumpur  
*Workshop on Human Resources Development in  
Geographic Information System & Remote Sensing  
For The Forestry Personnel of ASEAN Countries in  
Kuala Lumpur*

## 17 Ogos / August

Majlis Gotong-Royong dan Sambutan  
Hari Kemerdekaan ke 50 di Ibu Pejabat  
Perhutanan  
*Gotong-Royong Programme and 50th  
Independence Day Celebration at Forestry  
Department Headquarters*

## 20 - 24 Ogos / August

Lawatan Persidangan Pengarah-  
Pengarah Perhutanan Negeri  
Semenanjung Malaysia Ke-27 di Johor  
Bahru Johor  
*27th State Forestry Director's  
Conference in Johor Bahru, Johore*

## 24 Ogos / August

Majlis Sambutan Hari Kualiti Jabatan Perhutanan Semenanjung Malaysia di Johor Bahru, Johor  
*Forestry Department Peninsular Malaysia Quality Day Ceremony at Johor Bahru, Johore*

## 7 September / September

Kempen Derma Darah di Ibu Pejabat Perhutanan  
*Blood Donation Campaign at Forestry Department Headquarters*

## 9 September / September

Lawatan Ahli-Ahli Jawatankuasa Mesyuarat Pasukan Petugas Khas Tanaman Bakau Dan Spesies-Spesies Yang Sesuai Di Pesisiran Pantai Negara Ke Delta Kelantan.  
*Visit by the Special Task Force of the Planting With Mangroves and Other Suitable Species Along the National Coastline to the Kelantan Delta*

## 11 September / September

Persidangan Gaharu Kebangsaan 2007 di Hotel Seri Pacific, Kuala Lumpur  
*2007 National Gaharu Conference at Seri Pacific Hotel, Kuala Lumpur*

## 18 September / September

Majlis Perhutanan Negara ke 21 di Putrajaya  
*21st National Forestry Council Meeting at Putrajaya*

## 24 September / September

Majlis Berbuka Puasa dan Solat Tarawikh di Ibu Pejabat Perhutanan  
The Breaking of Fast and Tarawikh Prayer at  
the Forestry Department Headquarters

## 2 - 4 November / November

Kempen Kesedaran Alam Sekitar "Treasure The Mangroves" di Taman Negara Tanjung Piai, Johor  
Treasure The Mangrove Environmental Awareness Campaign at Tanjung Piai, Johore

## 7 November / November

Majlis Sambutan Hari Raya di Ibu Pejabat Perhutanan  
Hari Raya Celebration at Forestry Department Headquarters

## 11 November / November

Lawatan Y.Bhg. Datuk Seri Utama Jeane Abdullah Ke Taman Botanical, Ayer Keroh, Melaka  
Visit by Y.Bhg. Datuk Seri Utama Jeane Abdullah to Botanical Garden, Ayer Keroh, Melaka

## 15 November / November

Bengkel Kebangsaan "Central Forest Spine" di Kuantan, Pahang  
National Workshop on Central Forest Spine at Kuantan, Pahang

## 3 - 4 Disember/ December

Seminar Ekspedisi Saintifik Kepelbagai Biologi Hutan Gunung Panti, Johor di Johor Bharu

Seminar on Forest Biological Diversity  
Scientific Expedition of Gunung Panti, Johore  
at Johor Bharu

## 5 - 7 Disember/ December

Retreat Bagi Membincangkan Perancangan Pelaksanaan Fizikal dan Pembangunan dan Perbelanjaan RMK9 di Pasir Salak, Perak  
Retreat to Discuss the Planning for the Physical Implementation and Development and Expenditure of Projects under the 9th Malaysia Plan at Pasir Salak, Perak

## 7 - 9 Disember/ December

Pameran Perhutanan Sempena Minggu Perkayuan Negeri Johor  
Forestry Exhibition In Conjunction With Johore Timber Week

## 10 - 11 Disember/ December

Seminar Ekspedisi Saintifik Kepelbagai Biologi Hutan Simpan Bintang Hijau, Negeri Perak di Lumut, Perak

Seminar on Forest Biological Diversity  
Scientific Expedition of Bintang Hijau Forest Reserve, Perak at Lumut, Perak

## 16 - 17 Disember/ December

Seminar Penilaian Ekonomi Barang dan Perkhidmatan Hutan 2007 di Kuala Terengganu, Terengganu

Seminar on Economic Valuation of Forest Goods and Services 2007 at Kuala Terengganu, Terengganu

## 18 Disember/ December

Lawatan Kerja oleh YAB Menteri Besar Negeri Sembilan Ke Taman Ular Sawa Di Ulu Bendul Kuala Pilah, Negeri Sembilan

Working visit by YAB Negeri Sembilan Chief Minister to Ulu Bendul Snake Park, Kuala Pilah, Negeri Sembilan

Hasliandi bin Hashim	Pengajar / <i>Tutor</i>	
Mohd Asri bin Yusof	Pengajar / <i>Tutor</i>	
Norddin bin Noor	Pengajar / <i>Tutor</i>	
Riano bin Janirin	Pengajar / <i>Tutor</i>	
Asma binti Zainuddin	Pengajar / <i>Tutor</i>	
Norazilla binti Yatim	Pengajar / <i>Tutor</i>	

**Unit Kejuruteraan Hutan / Forest Engineering Unit**

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Yong Kai Min	Pengarah Kejuruteraan Hutan <i>Director of Forest Engineering</i>	Unit Kejuruteraan Hutan <i>Forest Engineering Unit</i>
Abdul Rashid bin Othman	Pembantu Teknik <i>Technical Assistant</i>	
Razeman bin Abd Rahim	Pembantu Teknik <i>Technical Assistant</i>	
Nurmaliza binti Mohd Azmi	Pembantu Teknik <i>Technical Assistant</i>	
Unit Kejuruteraan Hutan di Jabatan Perhutanan Negeri-Negeri <i>Forest Engineering Unit at State Forestry Department</i>		
Zainal Abidin bin Jonid	Pembantu Teknik <i>Technical Assistant</i>	Perak
Mariam binti Abd Karim	Juruteknik <i>Technician</i>	Perak
Suhaimi bin Mokhtar	Jurutera <i>Engineer</i>	Pahang
Raja Ablah bin Raja Ismail	Pembantu Teknik <i>Technical Assistant</i>	Pahang
Alias bin Sulaiman	Jurutera <i>Engineer</i>	Terengganu
Mohd Hanafi bin Hamzah	Pembantu Teknik <i>Technical Assistant</i>	Terengganu
Mohd Nawi bin Ismail @ Ali	Juruteknik <i>Technician</i>	Terengganu
Rohaizi bin Hashim	Jurutera <i>Engineer</i>	Kedah
RS Chandrasegaran a/l Subramaniam	Pembantu Teknik <i>Technical Assistant</i>	Kedah

Yahaya bin Mohd Noh	Jurutera <i>Engineer</i>	Johor
Azizan bin Mohd Yasin	Jurutera <i>Engineer</i>	Kelantan
Wan Amran bin Wan Osman	Pembantu Teknik <i>Technical Assistant</i>	Kelantan

#### Unit Penguatkuasaan / *Enforcement Unit*

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Mohd Nasir bin Abu Hassan	Pengarah Penguatkuasaan <i>Director of Enforcement</i>	Unit Penguatkuasaan <i>Enforcement Unit</i>
Muhamad Ezhar bin Yusuf @ Antik	Pegawai Penguatkuasaan <i>Enforcement Officer</i>	

#### Unit Kemajuan Perindustrian Hutan / *Forest Industrial Development Unit*

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Saiful Muzamir bin Ismail	Pengarah Kemajuan Perindustrian Hutan <i>Director of Forest Industrial Development Unit</i>	Unit Kemajuan Perindustrian Hutan <i>Forest Industrial Development Unit</i>
Burhanuddin bin Abdul Rahman	Jurutera/ <i>Engineer</i>	
Vijayan a/l Kangaya	Jurutera/ <i>Engineer</i>	
Mohd Azmi bin Hashim	Jurutera/ <i>Engineer</i>	
Ahmad Fikri bin Mohd Omar	Jurutera/ <i>Engineer</i>	
Kosong	Jurutera/ <i>Engineer</i>	
Kamarulzaman bin Hussin	Pembantu Teknik <i>Technical Assistant</i>	
Ismail bin Desa	Pembantu Teknik <i>Technical Assistant</i>	
Zulazfar Husaini bin Abdullah Sani	Pembantu Teknik <i>Technical Assistant</i>	
Kosong	Pembantu Teknik <i>Technical Assistant</i>	

**Unit Tugas-Tugas Khas Dan Wilayah Persekutuan  
Special Functions Unit And Federal Territory**

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Borhanudin bin Arshad	Pengarah Tugas-Tugas Khas & Wilayah Persekutuan <i>Director of Special Functions &amp; Federal Territory</i>	Unit Tugas-Tugas Khas Dan Wilayah Persekutuan / Special Functions & Federal Territory Unit
Zahriah binti Anis	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	

**Unit Antarabangsa Dan Keurusetiaan / International And Secretariat Unit**

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Dr. Mohd Yunus bin Zakaria	Pengarah Antarabangsa & Keurusetiaan <i>Director of International &amp; Secretariat</i>	Unit Antarabangsa & Keurusetiaan International & Secretariat Unit
Nazir Khan bin Nizam Khan Suratee	Pegawai Antarabangsa & Keurusetiaan International & Secretariat Officer	
Mohd Yusof bin Baharom	Pegawai Antarabangsa & Keurusetiaan International & Secretariat Officer	

**Bahagian Perancangan Dan Pembangunan Hutan  
Forest Planning And Development Division**

**Unit Silvikultur dan Perlindungan Hutan / Silviculture and Forest Protection Unit**

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Koh Hock Lye	Pengarah Silvikultur & Perlindungan Hutan <i>Director of Silviculture &amp; Forest Protection</i>	Unit Silvikultur & Perlindungan Hutan Siviculture & Forest Protection Unit
Kosong	Timbalan Pengarah Silvikultur (Hutan Bukan Kayu) <i>Deputy Director of Silviculture (Non-Wood Forest)</i>	
Shashiah binti Abdul Karim	Timbalan Pengarah Silvikultur (Kepelbagai Hutan) <i>Deputy Director of Silviculture (Forest Diversity)</i>	
Kosong	Timbalan Pengarah Silvikultur (Hutan Bukit) <i>Deputy Director of Silviculture (Hill Forest)</i>	
Rahimi bin Osman	Timbalan Pengarah (Pembangunan Latihan) <i>Deputy Director (Trainning Development)</i>	Unit Latihan Perhutanan Kepong <i>Forestry Training Unit, Kepong</i>

Zahari bin Ibrahim	Penolong Pengarah Silvikultur (Sumber Genetik) <i>Assistant Director of Silviculture (Genetic Resource)</i>	<i>Unit Penguatkuasaan Enforcement Unit</i>
Zainuddin bin Jamaluddin	Penolong Pengarah Silvikultur (Hutan Bukan Kayu) <i>Assistant Director of Silviculture (Non-Wood Forest)</i>	
Sulahi @ Suhaili bin Rosli	Penolong Pengarah Silvikultur (Hutan Paya Laut) <i>Assistant Director of Silviculture (Mangrove Forest)</i>	
Mohd Shukri bin Aziz	Penolong Pengarah Silvikultur (Hutan Rekreasi) <i>Assistant Director of Silviculture (Recreational Forest)</i>	<i>Jabatan Perhutanan Negeri Perlis Perlis State Forestry Department</i>
Azman bin Abdul Rahman	Penolong Pengarah Silvikultur (Hutan Masyarakat) <i>Assistant Director of Silviculture (Community Forestry)</i>	
Raffae bin Ahmad	Penolong Pengarah Silvikultur (Hutan Bukit) <i>Assistant Director of Silviculture (Hill Forest)</i>	
Nor Hafizah binti Mustafa	Pen. Pegawai Silvikultur (Hutan Bukan Kayu ) <i>Assistant Silviculture Officer (Non-Wood Forest)</i>	
A. Rahim bin Omar	Pen. Pegawai Silvikultur (Hutan Bukit) <i>Assistant Silviculture Officer (Hill Forest)</i>	
Fadlish bin Kansuh	Pen. Pegawai Silvikultur (Hutan Paya Laut) <i>Assistant Silviculture Officer (Mangrove Forest)</i>	

#### Unit Ladang Hutan / *Forest Plantation Unit*

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Zulkefli bin Mokhtar	Pengarah Ladang Hutan <i>Director of Forest Plantation</i>	<i>Unit Ladang Hutan Forest Plantation Unit</i>
Kosong	Timbalan Pengarah Ladang Hutan <i>Deputy Director of Forest Plantation</i>	
Kamaruzaman bin Ali Budin	Timbalan Pengarah Ladang Hutan (Perhutanan Tani) <i>Deputy Director of Forest Plantation (Agro-Forestry)</i>	
Kosong	Timbalan Pengarah Ladang Hutan (Pengurusan) <i>Deputy Director of Forest Plantation (Management)</i>	

Mohd Ridza bin Awang	Pen. Pengarah (Perolehan Bahan Tanaman) <i>Assistant Director</i> <i>(Planting Materials Procurement)</i>	Pegawai Khas Kepada KPP <i>Special Officer to DG</i>
Mohd Yussainy bin Md Yusop	Pen. Pengarah (Pengurusan & Kajian Ladang) <i>Assistant Director</i> <i>(Management &amp; Plantation Trial)</i>	Unit Latihan <i>Perhutanan</i> <i>Forestry Training Unit</i>
Kosong	Pen. Pengarah (Perhutanan Tani) <i>Assistant Director (Agro Forestry)</i>	
Nor Halizah binti Abd Halim	Pen. Pengarah (Maklumat & Pengembangan) <i>Assistant Director</i> <i>(Information &amp; Development)</i>	
Noradli @ Mohd Adli bin Parsada	Pen. Pengarah (Pemuliharaan Hutan) <i>Assistant Director (Forest Rehabilitation)</i>	Sekretariat Bakau <i>Mangrove Secretariat</i>
Rusli bin Tahir	Pen. Pengarah (Perancangan & Penubuhan Ladang) <i>Assistant Director</i> <i>(Planning &amp; Plantation Establishment)</i>	
Kosong	Pen. Pengarah (Pengusahaan Ladang) <i>Assistant Director (Plantation Harvesting)</i>	
Claysius @ Clasius bin Kongoi	Pen. Pengarah (Perlindungan dan Pembangunan) <i>Assistant Director</i> <i>(Protection and Development)</i>	
Norzalyta binti Mohd Ghazali	Pen. Pengarah (Pemeliharaan Ex-situ) <i>Assistant Officer (Ex-situ Rehabilitation)</i>	Sekretariat Bakau <i>Mangrove Secretariat</i>
Mohamad Rizal bin Abd. Rahim	Pen. Pegawai Ladang (Hutan Komersial) <i>Assistant Plantation Officer</i> <i>(Commercial Forest)</i>	
Kosong	Pen. Pegawai Ladang (Pengurusan dan Kajian Ladang) <i>Assistant Plantation Officer</i> <i>(Management &amp; Plantation Trial)</i>	
Azmi bin Mohd Zain	Pen. Pegawai Ladang (Pengusahaan Ladang) <i>Assistant Plantation Officer</i> <i>(Plantation Harvesting)</i>	
Mazuraa bin Marzuki	Pen. Peg. (Pemeliharaan Ex-situ) <i>Assistant Officer (Ex-situ Rehabilitation)</i>	
Noor Izianti binti Ishak	Pen. Pegawai Ladang (Maklumat & Pengembangan) <i>Assistant Plantation Officer</i> <i>(Information &amp; Development)</i>	
Sanja a/p Boon Kong	Pen. Pegawai Ladang (Penubuhan Ladang) <i>Assistant Plantation Officer</i> <i>(Plantation Establishment)</i>	

Jailani bin Omar	Pen. Peg. Pemuliharaan Ex-situ <i>Assistant Officer Ex-situ Rehabilitation</i>	Unit Penguatkuasaan <i>Enforcement Unit</i>
Azlan bin Abdul Aziz	Pen. Pegawai Ladang (Perhutanan - Tani) <i>Assistant Plantation Officer</i> <i>(Agro-Forestry)</i>	
Siti Aishah binti Abd Wahab	Pen. Pegawai Ladang (Perlindungan & Pembangunan Hutan) <i>Assistant Plantation Officer</i> <i>(Forest Protection and Development)</i>	
Suhaidi bin Sinin	Pen. Pegawai Ladang (Pemuliharaan Hutan) <i>Assistant Plantation Officer</i> <i>(Forest Rehabilitation)</i>	
Rajihan binti Rahim	Pen. Pegawai Ladang (Perolehan Bahan Tanaman) <i>Assistant Plantation Officer</i> <i>(Planting Materials Procurement)</i>	
Ngaijah binti Sadali	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Unit Latihan Perhutanan, Kepong <i>Forestry Training Unit,</i> <i>Kepong</i>
Mohd Nasir bin Muhammad	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Unit Latihan Perhutanan, Kepong <i>Forestry Training Unit,</i> <i>Kepong</i>
Zainal Abidin bin Atan	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Unit Latihan Perhutanan, Kepong <i>Forestry Training Unit,</i> <i>Kepong</i>
Mohd Rubaai bin Sarpin	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Unit Latihan Perhutanan, Kepong <i>Forestry Training Unit,</i> <i>Kepong</i>
Ramley @ Ramly bin Ali	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Jabatan Perhutanan Negeri Kedah <i>Kedah State Forestry</i> <i>Department</i>
Rosmawati binti Ismail	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Ladang Hutan Negeri Sembilan <i>Negeri Sembilan</i> <i>Forest Plantation</i>
Jalil bin Ahmad Tabon	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Ladang Hutan Ulu Sedili <i>Ulu Sedili Forest</i> <i>Plantation</i>
Michael bin Maijohn	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Ladang Hutan Kemasul <i>Kemasul Forest</i> <i>Plantation</i>

## Unit Pengurusan Hutan / Forest Management Unit

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Nik Mohd Shah bin Nik Mustafa	Pengarah Pengurusan Hutan <i>Director of Forest Management</i>	Unit Pengurusan Hutan <i>Forest Management Unit</i>
Kosong	Timbalan Pengarah (Pengurusan Sumber Hutan) <i>Deputy Director (Forest Resource Management)</i>	
Kosong	Timbalan Pengarah (Inventori Hutan) <i>Deputy Director (Forest Inventory)</i>	
Kosong	Timbalan Pengarah (Perancangan Sumber Hutan) <i>Deputy Director (Forest Resource Planning)</i>	
Shahrulnizam bin Kasmani	Pen. Pengarah (Perancangan Sumber Hutan) <i>Assistant Director (Forest Resource Planning)</i>	
Dr. Mohd Hizamri bin Mohd Yasin	Pen. Pengarah (Pengurusan Sumber Hutan) <i>Assistant Director (Forest Resource Management)</i>	
Rosaizan Haryani binti Rosli	Pen. Pengarah (Inventori Hutan) <i>Assistant Director (Forest Inventory)</i>	
Azmi bin Abdul Rahman	Pen. Pegawai (Pengurusan Sumber Hutan) <i>Assistant Officer (Forest Resource Management)</i>	
Erik Lim Chong Ping	Pen. Pegawai (Pemantauan Sumber Hutan) <i>Assistant Officer (Forest Resource Monitoring)</i>	
Mohd Sufian bin Anuar	Pen. Pegawai (Pengurusan Data Hutan) <i>Assistant Officer (Forest Data Management)</i>	
Md Nurrahiem bin Mohd Ali	Pen. Pegawai (Penilaian Sumber Hutan) <i>Assistant Officer (Forest Resource Assesment)</i>	
Shohaimi bin Md Sani	Pen. Pegawai (Penilaian Sumber Hutan) <i>Assistant Officer (Forest Resource Assesment)</i>	
Donald Gabriel Guakin	Pen. Pegawai (Pengurusan Data Hutan) <i>Assistant Officer (Forest Data Management)</i>	
Gerald Trabucon	Pen. Pegawai (Penyelenggaraan & Dokumentasi) <i>Assistant Officer (Maintenance &amp; Documentation)</i>	
Noorazilawati binti Mostapa	Pen. Pemelihara Hutan <i>Assistant Conservator of Forest</i>	Unit Teknologi Maklumat <i>Information Technology Unit</i>

**Unit Perancangan Hutan / Forest Planning Unit**

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Chin Yue Mun	Pengarah Perancangan Hutan <i>Director of Forest Planning</i>	Unit Perancangan Hutan <i>Forest Planning Unit</i>
Kosong	Timbalan Pengarah (Perancangan Projek) <i>Deputy Director (Project Planning)</i>	
Kosong	Timbalan Pengarah (Perancangan Strategik) <i>Deputy Director (Strategic Planning)</i>	
Ku Azmi bin Ku Aman	Timbalan Pengarah (Perancangan Sumber Manusia) <i>Deputy Director (Human Resource Planning)</i>	
Lim Kee Leng	Pegawai Perancangan Wilayah <i>Regional Planning Officer</i>	
Aldrich Richard	Pegawai Perancangan Hutan (Penilaian & Pengawalan) <i>Forest Planning Officer (Evaluation &amp; Control)</i>	
Mohd Puat bin Dahalan	Pegawai Perancangan Projek <i>Project Planning Officer</i>	
Kholizan binti Jamaludin	Pen. Pegawai Perancang Hutan (Projek I) <i>Assistant Forest Planning Officer (Project I)</i>	
Hamzan bin Mat Husin	Pen. Pegawai Perancang Hutan (Projek II) <i>Assistant Forest Planning Officer (Project II)</i>	
Kosong	Pen. Pegawai Perancang Hutan (Projek III) <i>Assistant Forest Planning Officer (Project III)</i>	
Asmadi bin Mohd	Pen. Pegawai Perancang Hutan (Wilayah I) <i>Assistant Forest Planning Officer (Region I)</i>	
Tharmizie bin Sagiran	Pen. Pegawai Perancang Hutan (Wilayah II) <i>Assistant Forest Planning Officer (Region II)</i>	
Shaharom Najim bin Ishak	Pen. Pegawai Perancang Hutan (Penilaian & Pengawalan I) <i>Assistant Forest Planning Officer (Evaluation &amp; Control I)</i>	
Suhaimie bin Ibrahim	Pen. Pegawai Perancang Hutan (Penilaian & Pengawalan II) <i>Assistant Forest Planning Officer (Evaluation &amp; Control II)</i>	

## Unit Ekonomi Hutan / Forest Economics Unit

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Kosong	Pengarah Ekonomi Hutan <i>Director of Forest Economics</i>	Unit Ekonomi Hutan <i>Forest Economics Unit</i>
Saharuddin bin Ahmad	Pegawai Ehwal Ekonomi (Hutan Asli) <i>Economist (Natural Forest)</i>	
Poh Lye Yong	Pegawai Ehwal Ekonomi (Analisis Makro & Mikro) <i>Economist</i> <i>(Macro &amp; Micro Analysis )</i>	
Tuan Marina Tuan Ibrahim	Pegawai Ehwal Ekonomi (Analisis Hutan Bukan Kayu) <i>Economist (Analysis of Non-Wood Forest)</i>	
Zulnaidah binti Manan	Pegawai Ehwal Ekonomi (Penilaian Hutan) <i>Economist (Forest Valuation)</i>	
Komathi a/p Subramaniam	Perangkawan (Bancian & Perangkaan) <i>Statistician (Census &amp; Statistics)</i>	
Mohd Thajirine bin Sukri	Pen. Pegawai Ehwal Ekonomi (Analisis Makro & Mikro) <i>Assistant Economist</i> <i>(Macro &amp; Micro Analysis)</i>	
Amir Hafidz bin Mohd Taha	Pen. Pegawai Ehwal Ekonomi <i>Assistant Economist</i>	
Teddy Sius @ Lawrencius	Pen. Pegawai Ehwal Ekonomi (Hutan Asli) <i>Assistant Economist (Natural Forest)</i>	
Kosong	Pen. Pegawai Ehwal Ekonomi (Analisis Hutan Bukan Kayu) <i>Assistant Economist</i> <i>(Analysis of Non-Wood Forest)</i>	

## Unit Teknologi Maklumat / Information Technology Unit

NAMA PEGAWAI / Officers' Name	GELARAN JAWATAN / Post	STESYEN / Station
Khairuddin bin Mohamad Mor	Pengarah Teknologi Maklumat <i>Director of Information Technology</i>	Unit Teknologi Maklumat <i>Information Technology Unit</i>
Seksyen MIS / MIS Section		
Ihsan bin Hassan Basri	Pegawai Sistem Maklumat <i>System Analyst</i>	
Aiesa bin Saad	Pegawai Sistem Maklumat <i>System Analyst</i>	

Abdul Hafidz bin Malek Fauzi	Pen. Pegawai Sistem Maklumat <i>Assistant Information System Officer</i>	
Ibrahim bin Kayat	Pen. Pegawai Sistem Maklumat <i>Assistant Information System Officer</i>	
Nor Nazeta binti Omar	Pen. Pegawai Sistem Maklumat <i>Assistant Information System Officer</i>	
Noriswani binti Za'aldin	Pen. Pegawai Sistem Maklumat <i>Assistant Information System Officer</i>	

### Seksyen GIS / *GIS Section*

NAMA PEGAWAI / <i>Officers' Name</i>	GELARAN JAWATAN / <i>Post</i>	STESYEN / <i>Station</i>
Saleh bin Awaluddin	Ketua Seksyen GIS <i>Head of GIS Section</i>	Unit Teknologi Maklumat <i>Information Technology Unit</i>
Kosong	Pegawai GIS <i>GIS Officer</i>	
Noorazilawati binti Mostapa	Pen. Pegawai Pemetaan <i>Assistant Mapping Officer</i>	

### Jabatan Perhutanan Negeri Johor / *Johore State Forestry Department*

Nama Pegawai / <i>Officers' Name</i>	Gelaran Jawatan / <i>Post</i>	Stesyen / <i>Station</i>
Dr. Abdul Rahman bin Abdul Rahim	Pengarah Perhutanan Negeri <i>State Director of Forestry</i>	Jabatan Perhutanan Negeri Johor <i>Johore State Forestry Department</i>
Yahaya bin Mahmood	Timbalan Pengarah (Pembangunan) <i>Deputy Director (Development)</i>	
Mohd Fauzi bin Abu Bakar	Pen. Pengarah (Silvikultur & Perlindungan) <i>Assistant Director (Silviculture &amp; Protection)</i>	
Redzuwan bin Endot	Pen. Pengarah (Perancangan & Pengurusan) <i>Assistant Director (Planning &amp; Management)</i>	
Khairun Nizam bin Abdul Rahim	Pen. Pengarah (Operasi & Penguatkuasaan) <i>Assistant Director (Operation &amp; Enforcement)</i>	
Kosong	Pen. Pengarah (Hutan Lipur) <i>Assistant Director (Recreational Forest)</i>	

Ramli bin Mat	Pen. Pengarah (Perindustrian & Pengusahasilan) <i>Assistant Director (Industries &amp; Harvesting)</i>	
Mohd Zohdi bin Shihabudin	Pen. Pemelihara Hutan (Operasi & Penguatkuasaan) <i>Assistant Conservator of Forest (Operation &amp; Enforcement)</i>	
Abdul Nasir bin Ismail	Pen. Pemelihara Hutan (Silvikultur & Perlindungan) <i>Assistant Conservator of Forest (Silviculture &amp; Protection)</i>	
Mariatul Qiptiyah binti Md Sah	Pen. Pemelihara Hutan (Perancangan & Pengurusan) <i>Assistant Conservator of Forest (Planning &amp; Management)</i>	
Hasnudin bin Mat Ali	Pen. Pemelihara Hutan (Hutan Lipur) <i>Assistant Conservator of Forest (Recreational Forest)</i>
