EXPLANATORY TEXT

INTRODUCTION

The Annual Survey of Philippine Business and Industry (ASPBI) is one of the designated statistical activities of the National Statistics Office (NSO). It is a nationwide undertaking designed to collect and generate information on the levels, structure, and trends of economic activities in the entire country. The 2010 ASPBI was conducted in 2011 with 2010 as reference year.

The 2009 Philippine Standard Industrial Classification (PSIC) was adopted for the first time in this survey round. This is the latest version of the industry classification in the country released by the NSCB after the 1994 PSIC was amended in 2002. It conforms with the International Standard Industrial Classification (ISIC) Revision 4 prescribed by the United Nations, but with modifications to suit national situation and requirement. The PSIC is a statistical classification of all economic activities, designed as a guide and a comprehensive framework for securing uniformity and comparability of both the government and private sectors. With the adoption of the 2009 PSIC, the ASPBI now covered 18 out of the 21 sectors of the Philippine economy, as compared to 14 out of 17 in the 1994 PSIC.

Presented in Table 1 are the series of each sector included in the annual surveys of establishments.

Data collected from the 2010 ASPBI constitute bases upon which the government and the private sector can formulate policies and evolve economic development plans.

Specifically, the survey results are used in:

- constructing national and regional income accounts of the Philippine economy
- formulating development strategies and monitoring plans/policies in the attainment of national and regional goals
- determining and comparing regional economic structure and performance
- valuating conditions of the economy, employment and income perspective in order to make more informed decisions
- evaluating business options, assessing opportunities for new investments and estimating market shares of industries
- providing updates for the frame of establishments.

ASPBI Slogan and Logo

Providing Statistics for a Globally Competitive Economy is the slogan of the census/survey of establishments since the 2000 Census of Philippine Business and Industry. Along with the slogan is the logo shown below.

The logo, which is a stylistic representation of the Filipino flag, capsulizes the objectives of the 2010 ASPBI.

The golden sun represents the vision of hope which reaches out like the sun's rays for the improvement of the quality of life of all Filipinos; the red chart, the desired trend of the country's economic progress; the white building, the businesses and industries that propel the growth of the economy; while the blue background symbolizes the cooperation between and among the data providers, data producers and data users.

LEGAL AUTHORITY

The conduct of the 2010 ASPBI was undertaken by authority of the following legislative acts and presidential directives:

- Commonwealth Act No. 591 An Act to Create the Bureau of the Census and Statistics to consolidate statistical activities of the government therein which was approved on August 19, 1940. This empowers the Bureau, among other things, to prepare for and undertake all censuses of population, agriculture, industry and commerce.

Penalty Clause

Section 3 of the Commonwealth Act No. 591 states that:

"... Any person who fails or refuses to accomplish, mail or deliver such questionnaire or form received by him to the Bureau of the Census and Statistics...or any person who in accomplishing any such questionnaire or form, knowingly gives data or information which shall prove to be materially untrue in any particular, or any person who signs such questionnaire or form after it has been accomplished in the knowledge that it is untrue in any particular shall upon conviction, be punished ..."

Confidentiality of Information

Section 4 of the Commonwealth Act No. 591 states that:

"Data furnished the Bureau of the Census and Statistics by an individual, corporation, partnership, institution or business enterprise shall not be used as evidence in any court or in any public office either as evidence for or against the individual, corporation, association, partnership, institution or business enterprise from whom such data emanates; nor shall such data or information be divulged to any person except authorized employees of the Bureau of the Census and Statistics, acting in the performance of their duties; nor shall data be published except in the form of summaries or statistical tables in which no reference to an individual, corporation, association, partnership, institution, or

business enterprise shall appear. Any person violating the provisions of this section shall, upon conviction, be punished by a fine of not more than six hundred pesos or by imprisonment for not more than six months, or by both.”

- Presidential Decree No. 418 dated March 20, 1974 reconstituted the Bureau of the Census and Statistics as a new agency to be known as the National Census and Statistics Office (NCSO), under the administrative supervision of the National Economic Development Authority (NEDA).
- Executive Order No. 121 Reorganization Act of the Philippine Statistical System, dated August 4, 1987 renamed the National Census and Statistics Office (NCSO) to National Statistics Office which shall be the major statistical agency responsible for generating general purpose statistics and undertaking such censuses and surveys.
- Executive Order 352 Designation of Statistical Activities that will generate critical data for decision-making by the Government and the Private Sector, dated July 1, 1996.
- Executive Order 5 **Strengthening** the National Statistics Office, dated July 29, 1998.

SCOPE AND COVERAGE

The 2010 ASPBI is a nationwide undertaking confined to the formal sector of the economy and as such excludes the informal sector. The following comprise the formal sector:

1. Corporations and partnerships
2. Cooperatives and foundations
3. Single proprietorship with employment of 10 or more
4. Single proprietorship with branches

Starting with the 2006 Census of Philippine Business and Industry and thereafter, all establishment censuses and surveys conducted by NSO cover only the formal sector. The decision to include only the formal sector was based on the contribution of this group to the value added of the major sectors. In particular, the 2003 and 2005 ASPBI results showed that the contribution of the formal sector was at least 50 percent of value added. In 11 of the 14 sectors, value added of the formal sector ranged from 80 to 100 percent of the total.

Another consideration was the quality of the survey frame. The survey frame was extracted from the List of Establishments (LE). The series of updating operations since 1999 focused more on the updating of the formal sector. Budgetary constraint was the reason why coverage was limited to these economic units.

The absence of a clear delineation between household operated activities and businesses was one of the problems encountered in the creation of the frame. Limiting the coverage of the survey to the formal sector clearly defines the units in the survey frame.

Thus, the 2010 ASPBI covered only the following economic units:

- All establishments with total employment (TE) of 10 and over, and

- All establishments with TE of less than 10, except those establishments with Legal Organization = 1 (single proprietorship) and Economic Organization = 1 (single establishment), that are engaged in economic activities classified according to the 2009 Philippine Standard Industrial Classification (PSIC).

Listed below are the economic activities within the scope of the 2010 ASPBI.

UNIT OF ENUMERATION

The unit of enumeration in the 2010 ASPBI was the establishment. An establishment is defined in the United Nations International Recommendations on Industrial Statistics as:

“an economic unit under a single ownership or control, i.e., under a single legal entity, engaged in one or predominantly one kind of economic activity at a single fixed location.”

In actual practice, however, there were difficulties in applying the ideal definition so the establishment is defined in operational terms to take into account the organization and record keeping practices of certain sectors by making the single location and activity criteria more flexible. Thus, the operational definition of an establishment is as follows:

“the unit that is engaged in the production of the most homogenous group of goods and services, usually at one location, but sometimes over a wider area, for which separate records are available that can provide data concerning the production of these goods and services and the materials, labor and physical resources used in the production.”

The above definition is applicable to the following: Construction; Transportation and Storage; Telecommunications activities; Other monetary intermediation; Activities of holding companies; Investment company operation; Investment house operation; Securities dealership, own account; Credit card activities; Venture capital corporation operation; Life insurance; Non-life insurance; Reinsurance for Life and Non-life insurance; Pension funding; Activities auxiliary to insurance and pension funding; Fund management activities; Real estate buying, selling, renting, leasing and operating of self-owned/ leased apartment building, non-residential and dwellings; Real estate buying, developing, subdividing and selling; Cemetery and columbarium development , selling, renting, leasing and operation of self-owned cemetery/columbarium (including burial crypt); Investigation and security activities; Travel agency and tour operators; Other reservation service and related activities; Electric cooperatives; and Water district cooperatives. It is then necessary to use the *kind-of-activity unit* for these sectors. A kind-of-activity unit differs from the establishment as there is no restriction with respect to the geographical areas in which a given kind of activity is carried on by a single legal entity.

SURVEY DESIGN

Classification of Establishments

An establishment is categorized by its economic organization, legal organization, industrial classification, employment size, and geographic location.

Economic Organization (EO). This relates to the organizational structure or role of the establishment in the organization. The following are the types of EO:

- *Single establishment* (EO=1) is an establishment which has neither branch nor main office.
- *Branch only* (EO=2) is an establishment which has a separate main office located elsewhere.
- *Establishment and main office* (EO=3), both located in the same address and with branch/es elsewhere.
- *Main office only* (EO=4) is the unit which controls, supervises and directs one or more establishments of an enterprise.
- *Ancillary unit other than Main Office* (EO=5) is the unit that operates primarily or exclusively for a related establishment or group of related establishments or its parent establishment and provides goods or services that support but do not become part of the output of those establishments.

Legal Organization (LO). This provides the legal basis for ownership of the establishment. The following are the types of LO:

- *Single Proprietorship* (LO=1) is a business establishment organized, owned and managed by one person, who alone assumes the risk of the business enterprise.
- *Partnership* (LO=2) is an association of two or more individuals for the conduct of a business enterprise based upon an agreement or contract between or among them to contribute money, property or industry into a common fund with the intention of dividing profits among themselves.
- *Government Corporation* (LO=3) is a corporation organized for private aim, benefit or purpose with the government as the majority stockholder, regardless of whether they are stock or non-stock corporations.
- *Stock Corporation* (LO=4) is an ordinary business corporation organized by private persons, created and operated for the purpose of making a profit which may be distributed in the form of dividends to stockholders on the basis of their invested capital.
- *Non-Stock Corporation* (LO=5) is a business corporation who does not issue stock to its members and are created not to profit but for the public good and welfare. Of this character are most of the religious, social, literary, scientific, civic and political organizations and societies.
- *Cooperative* (LO=6) is an organization composed primarily of small producers and/or consumers who voluntarily join together to form a business enterprise, which they themselves own, control and patronize.
- *Others* (LO=7) are organizations not classified in any of the above classification like private associations, foundations, non-government organizations, etc.

Industrial Classification. The industrial classification of an economic unit was determined by the activity from which it derives its major income or revenue. The 2009 PSIC was utilized to classify economic units according to their economic activities. It was approved for adoption by government agencies and instrumentalities through NSCB Resolution No.2 Series 2010 signed on February 10, 2010. It was used for the first time for the ASPBI. The 2009 PSIC is aligned with the International Standard Industrial Classification of all Economic Activities (ISIC) Revision 4, as officially released by the United Nations Statistics Division on August 11, 2008 for adoption by countries in their revised national classifications by 2010. The 2009 PSIC took into account the significant changes on the relative importance of various economic activities in the country that have taken place since 2002. It is linked with the ASEAN Common Industrial Classification (ACIC) as approved by the AHSOM (ASEAN Heads of Statistical Offices) in November 2006.

The 2009 PSIC consists of alpha character and five numeric digits. The alpha character, which represents the sector or section, is denoted by the characters A to U. The first two numeric digits represent the division; the first three numeric digits, the group; the first four digits, the class; and the five digits, the sub-class.

Establishment Size. The size of an establishment was determined by its total employment. The following were the employment size classifications used in the survey:

TABLE 3 Employment Size and Code

TE Code	Total Employment	TE Code	Total Employment
0	1 – 4	5	100 – 199
1	5 – 9	6	200 – 499
2	10 – 19	7	500 – 999
3	20 – 49	8	1000 – 1999
4	50 – 99	9	2000 and over

Geographic Classification. Establishments were also classified by geographic area using the Philippine Standard Geographic Classification (PSGC). The PSGC is a systematic classification and coding of geographic areas in the country. It contains the latest updates on the official number of regions, provinces, cities, municipalities, and barangays in the Philippines.

For the 2010 ASPBI, the PSGC as of December 31, 2010 was adopted. It consists of the 17 administrative regions as approved under Executive Order No. 36 dated 19 September 2001 (*Providing for the Reorganization of the Administrative Regions in Mindanao....*) and Executive Order No. 103 dated 17 May 2002 (*Dividing Region IV into Region IV-A and Region IV-B, transferring the province of Aurora to Region III*).

Frame of Establishments

The frame for the 2010 ASPBI was extracted from the 2010 List of Establishments (LE). This frame was used to draw the sample establishments for the survey.

The 2010 LE was the combined result of the following:

- Mail inquiries of “no matched” establishments from Top 15,000 Corporations, 2009 edition
- PEZA list as of February 28, 2010
- Clark Subic Marketing Directory
- Board of Investments list of registered projects from 2000-2009
- SEC partial list of partnerships from 2003-2008
- NSO's 2009 Traders list of importers and exporters
- Jollibee Group of Companies
- Various websites

The 2009 ASPBI, 2009 Survey of Information and Communication Technology (SICT), 2009 Survey of Tourism Establishments in the Philippines (STEP) and other regular surveys conducted by the Industry and Trade Statistics Department (ITSD) provided updates on characteristics and status of sample establishment and business births.

An estimate from the 2010 LE showed that there were about 778,000 establishments in operation in the country in 2010. Distribution of these establishments reveals that about 610,000 establishments (78.0%) were classified as the informal sector and the remaining 168,000

establishments were considered as the formal sector. A total of 150,000 (89%) establishments classified in the formal sector were within the coverage of the 2010 ASPBI and thus, comprised the frame of the survey.

SAMPLING DESIGN

The 2010 ASPBI used stratified systematic sampling with 5-digit PSIC serving as industry strata and employment size as the second stratification variable.

Sampling Units

Generally, the sampling units for the sections, except Construction, and Transportation and Storage, were single establishment (EO = 1), branch only (EO=2), and establishment and main office (EO=3). For Construction, Transportation and Storage, and selected industry group/class/sub-class, the sampling units were single establishment (EO = 1), establishment and main office (EO=3), and main office only (EO=4). The branches of these establishments do not strictly meet the criteria for defining an establishment as these are classified as kind-of-activity units.

For Government-Owned-and-Controlled Corporations (GOCCs), the sampling units were those with EO=1, 3 and 4. Presented in Table 4 are the sampling units by industry.

Sampling Domain

For establishments with TE of 20 and over, the domains were the region and industry, with employment size as the stratification variable. For establishments with TE of less than 20, the whole country and industry were the domains with employment size as the stratification variable.

Geographic Domain

For establishments with TE of less than 20, the geographic domain was the whole country. For those with TE of 20 and over, the geographic domains were the 17 administrative regions of the country. Hence, the samples of the 2010 ASPBI with TE of 20 and over can provide estimates up to the regional level while those with TE of less than 20 at the national level.

Table 5 lists the geographic domains (regions) and the provinces comprising the region.

Industry Domain

The 2010 ASPBI used the 5-digit level of the 2009 PSIC as its industry domains. This was done to enable also the production of data from the amended 1994 PSIC to the 2009 PSIC with emphasis on the sub-classes that were split into two or more ISIC codes; and to provide data for Information and Communications Technology (ICT) and other emerging industries.

There were 1,228 industry sub-classes (5-digit PSIC) which constituted the industry domains for both establishments with TE of 20 and over and TE of less than 20. Table 6 presents the distribution of the number of industry domains by section of the 2009 PSIC.

Employment Stratum

For the 2010 ASPBI, the TE sizes were either combined or taken as a group to comprise an employment stratum and were limited to only five strata for all sections. The basic consideration for grouping was the concentration of establishments in the TE sizes.

Within the industry domains for each section, the establishments were grouped according to the following employment stratum:

TABLE 7 Employment Stratum

Employment Stratum	
TE 1 - 9	(size 0 & 1)
TE 10 - 19	(size 2)
TE 20 - 49	(size 3)
TE 50 - 99	(size 4)
TE 100 & over	(size 5 to 9)

Sample Size

The sample size of the 2010 ASPBI was maintained at the same level as that of 2009 ASPBI for manageability. This was necessary to provide for data at the aligned amended 1994 PSIC with the 2009 PSIC. The timeliness of retrieval of the questionnaires and release of final results were also primary considerations why the number of samples should still be kept to a minimum. Given the importance of the results of the ASPBI to the Philippine System of National Accounts (PSNA), the sample size has to be at a manageable level without compromising the reliability

and accuracy of the survey returns. The shorter processing time before the release of results and scarce manpower and financial resources were also considered. Other considerations include: the acceptable sampling error and the level of disaggregation of the estimates with due concern for confidentiality and shorter processing time.

In general, the TE 100 and over was a *certainty stratum* for all sectors. The employment strata TE of 20 and over, whose establishments are considered as 'large' units comprised the *certainty strata* for selected industries in sectors Manufacturing (PSIC C); and Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles (PSIC G).

*A **certainty stratum** is defined as the employment stratum whose sampling ratio is 100 percent. In this stratum, all establishments are taken as certainty samples, i.e. the selection probability is 1 and the sampling weight is 1. On the other hand, a **non-certainty stratum** is the employment stratum where only sample establishments are taken.*

For all sectors except B and D, those identified as the Information and Communication Technology (ICT) core industries, the employment strata in TE of less than 20 were considered as non-certainty strata.

The following sectors were, however, taken on a 100 percent basis regardless of employment stratum because of the relatively small number of their population.

- Mining and Quarrying (B)
- Electricity, Gas , Steam and Air Conditioning Supply (D)

Sample Size for TE of Less Than 20

The sample size for establishments with TE of less than 20 was determined by applying the specified sampling rates for each employment stratum (that is, separately for strata TE 1-9 and TE 10 -19) of the industry domain (5-digit PSIC) at the national level. The total sample size for establishments with TE of less than 20 was 15,228 establishments.

Sample Size for TE of 20 and Over

The sample size for establishments with TE of 20 and over was obtained by applying the specific sampling rates for the i^{th} employment stratum in the h^{th} industry stratum at the national level and then allocated to geographic domain (region). The aggregate sample size for TE of 20 and over in all sectors was 14,070 establishments.

Thus, the total number of samples for the 2010 ASPBI was 29,298 establishments. Table 8 shows the distribution of samples by section and by employment size.

Sample Allocation

Sample Allocation for TE of Less Than 20 (Strata TE 1-9 and TE 10-19)

No allocation was done in these strata, as the sample sizes were determined at the 5-digit PSIC (industry domain) and national level.

Minimum sample size was set to 3 establishments and maximum of 100 establishments per cell (industry domain and employment stratum). However, when the total number of establishments (*N*) in the cell was equal to or less than the set minimum sample size, all establishments in that cell were taken as samples.

Sample Allocation for TE of 20 and Over (Strata TE 20-49 and TE 50-99)

Proportional allocation was used in allocating the number of samples in the sampling strata of TE 20-49 and TE 50-99 of the industry domain and employment stratum at the regional level. Basis of allocation was the number of establishments (N) in the region by industry domain and by employment stratum.

Minimum sample size was also set to 3 establishments and maximum of 10 establishments per cell (industry domain, employment stratum and region). However, when the total number of establishments (N) in the cell was equal to or less than the set minimum sample size, all establishments in that cell were taken as samples.

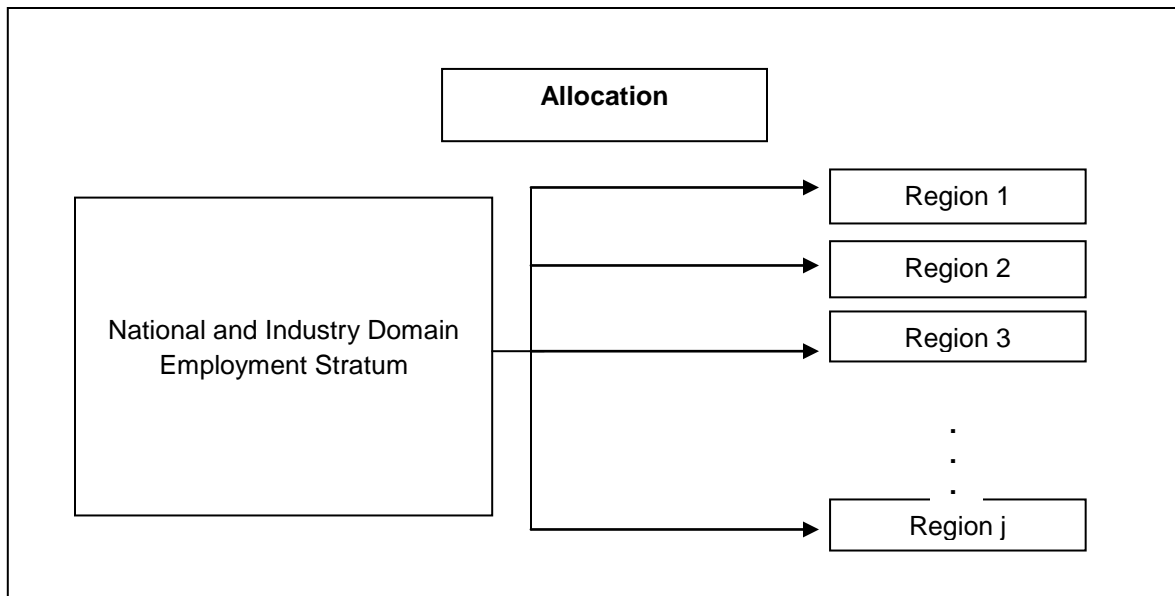

The number of samples for each employment stratum of the industry domain at the national level was allocated by region. The formula used was,

$$n_{hij} = \frac{N_{hij}}{N_{hi}} \times n_{hi}$$

where:

- N_{hij} = total number of establishments in the j^{th} region of the i^{th} employment stratum in the h^{th} industry domain
- N_{hi} = total number of establishments in the i^{th} employment stratum of the h^{th} industry domain
- n_{hij} = number of sample establishments in the j^{th} region of the i^{th} employment stratum in the h^{th} industry domain
- n_{hi} = number of sample establishments in the i^{th} employment stratum of the h^{th} industry domain

**FIGURE 1 Sample Allocation Diagram for TE of 20 and Over
(Strata TE 20-49 and TE 50-99)**

Sample Selection

For all sectors, sample establishments in the sampling strata of TE of less than 20 were selected using systematic sampling by industry domain and employment stratum. For each industry domain and employment stratum, the establishments were sorted by region, province from highest total employment to lowest total employment, business name, and Establishment Control Number (ECN).

For each of the sampling strata of TE of 20 and over, that is TE 20-49 and TE 50-99, sample establishments were selected using systematic sampling within the region. For each region in the employment stratum and industry domain, the establishments were sorted by province from highest total employment to lowest total employment, business name and ECN.

Systematic sampling was chosen so that sample employment values are spread out. Resulting from having representative samples for each TE size in the employment stratum. Likewise, this mode of sampling will somehow provide implicit stratification of TE by employment size group, thus avoiding all sample establishments with low TE values or high TE values. A special program designed by the information Resources Department was used to draw the samples.

Estimation Procedure

For Establishments with TE of Less Than 20

a. Non-certainty Stratum

The estimate of the total of a characteristic (\hat{X}_s) for the non-certainty employment stratum TE less than 20 in the s^{th} industry domain was

$$\hat{X}_s = \sum_{j=1}^{n_s} W_{sj} x_{sj}$$

where:

s denotes the non-certainty employment strata in TE of less than 20

x_{sj} = value of the j^{th} establishment in the non-certainty employment stratum in TE of less than 20 in the s^{th} industry domain

$j = 1, 2, 3, \dots, n_s$ establishments

W_{sj} = weight of the j^{th} establishment in the non-certainty employment stratum in TE of less than 20 in the s^{th} industry domain

$$W_{sj} = \frac{N_s}{n_s}$$

N_s = total number of establishments in the non-certainty employment stratum in TE of less than 20 in the s^{th} industry domain

n_s = number of sample establishments in the non-certainty employment stratum in TE of less than 20 in the s^{th} industry domain

b. Certainty Stratum

The estimate of the total of a characteristic (\hat{X}_c) for the certainty employment stratum in the c^{th} industry domain was

$$\hat{X}_c = \sum_{j=1}^{m_c} x_{cj}$$

where:

- c denotes the certainty employment strata in TE of less than 20 in the c^{th} industry domain
- x_{cj} = value of the j^{th} establishment in the certainty employment strata in TE of less than 20 in the c^{th} industry domain
- j = 1, 2, 3, ..., m_c establishments
- m_c = number of establishments in the certainty employment strata in TE of less than 20 in the c^{th} industry domain

c. Total Estimate for TE of Less Than 20

For all sections except B and C, national level estimates of the total of a characteristic (X_d) for the industry domain was obtained by aggregating the estimates for all employment strata (non-certainty and certainty) in the same industry domain,

$$X_d = \sum \hat{X}_s + \sum \hat{X}_c$$

where d denotes the industry domain.

For Establishments with TE of 20 and Over

a. Non-Certainty Stratum (strata of TE 20 to 49 and TE 50 to 99 for Section D, G, H, K, M and N)

The estimate of the total of a characteristic (\hat{X}_{sp}) for the non-certainty employment strata in TE of 20 and over for selected industry domain in each region was

$$\hat{X}_{sp} = \sum_{j=1}^{n_{sp}} W_{spj} x_{spj}$$

where:

- s denotes the non-certainty employment strata in TE of 20 and over
- p = 1, 2, ..., 17 regions (geographic domains)
- x_{spj} = value of the j^{th} establishment in the non-certainty employment strata in TE of 20 and over for an industry domain in each region
- j = 1, 2, 3, n_{sp} establishments
- W_{spj} = weight of the j^{th} establishment in the non-certainty employment strata in TE of 20 and over for an industry domain in each region

$$W_{spj} = N_{sp} / n_{sp}$$

N_{sp} = total number of establishments in the non-certainty employment strata in TE of 20 and over for an industry domain in each region

n_{sp} = number of sample establishments in the non-certainty employment strata in TE of 20 and over for an industry domain in each region

b. Certainty Stratum

The estimate of the total of a characteristic (\hat{X}_{cp}) for the certainty employment stratum in TE of 20 and over in an industry domain in each region was

$$\hat{X}_{cp} = \sum_{j=1}^{m_{cp}} x_{cpj}$$

where:

c denotes the certainty employment strata in TE of 20 and over

p = 1, 2, ..., 17 regions (geographic domains)

x_{cpj} = value of the j^{th} establishment in the certainty employment strata in TE of 20 and over in an industry domain within each region

j = 1, 2, 3, m_{cp} establishments

m_{cp} = number of establishments in the certainty employment strata in TE of 20 and over in an industry domain within each region

c. Total Estimate for TE of 20 and Over

The estimate of the total of a characteristic (X_{dp}) for the industry domain in each region (geographic domain) was obtained by aggregating the estimates for all employment strata (non-certainty and certainty) in the same industry domain,

$$X_{dp} = \sum \hat{X}_{sp} + \sum \hat{X}_{cp}$$

where dp denotes the industry domains in each region.

National level estimates of the characteristics by industry domain were obtained by aggregating separately the estimates (X_{dp}) for the particular industry domain from all the regions.

Weight Adjustment Factor for Non-Response

To account for non-response in the non-certainty strata, the adjustment factor (n/n') was multiplied with the sampling weight (W) of each of the sampling unit. The sampling weight, defined as N/n , was recomputed as

$$W' = \frac{N}{n} \times \frac{n}{n'} = \frac{N}{n'} \quad \text{General Formula}$$

Thus, the adjusted weight (W'_{sj}) for employment stratum in TE 1-9 or TE 10-19 was

$$W'_{sj} = \frac{N_s}{n_s} \times \frac{n_s}{n'_s} = \frac{N_s}{n'_s}$$

where:

N_s = total number of establishments in the employment stratum in TE 1-9 or TE 10-19 in the s^{th} industry domain

n'_s = number of responding establishments in the employment stratum in TE 1-9 or TE 10-19 in the s^{th} industry domain

For the non-certainty employment stratum for the selected industry domain with TE 20-99, the adjusted weight (W'_{spj}) was

$$W'_{spj} = \frac{N_{sp}}{n_{sp}} \times \frac{n_{sp}}{n'_{sp}} = \frac{N_{sp}}{n'_{sp}}$$

where:

N_{sp} = total number of establishments in the non-certainty employment stratum with TE 20-99 for the selected industry domain within each geographic domain (region)

n'_{sp} = number of responding establishments in the non-certainty employment stratum with TE 20-99 for the selected industry domain within each geographic domain (region)

Questionnaire Design

The 2010 ASPBI utilized five types of questionnaires, each with corresponding NSCB approval number and an expiration date of March 31, 2012. These questionnaires were designed after taking into consideration the requirements of the main users. Table 9 lists the questionnaire type, spot color and NSCB Approval number specific for the sectors.

Reference Period

All information collected in the 2010 ASPBI refers to calendar year 2010 except for employment data, which is as of November 15, 2010.

SURVEY OPERATIONS

The 2010 ASPBI consisted of the following major phases of survey operation: preparatory activities; training; field operations; data processing; tabulation and data dissemination; and evaluation and documentation.

Preparatory Activities

NSO officials, subject-matter statisticians and selected Information and Resources Department (IRD) staff undertook the planning activities for the 2010 ASPBI with the organization of the Steering Committee, Technical Committee and Working Groups under Special Order No. 2011-7 dated January 5, 2011. Activities undertaken during this phase included the updating of the frame, questionnaire design and content, publicity campaign, clearance process, budget preparation, manual preparation, training plans, sample design and selection, preparation of edit specifications, preparation of tabulation formats and specifications, computer systems design and program development, recruitment of statistical researchers, printing of survey forms and manuals, preparation for shipment of survey materials, and other related activities.

Publicity

Publicity campaign was done to inform and educate the general public of the basic information and importance of the 2010 ASPBI and its rider surveys. It aimed to solicit support from government and non-government agencies, business organizations, and target respondents in the early submission of reports. Display of 2010 ASPBI streamers and posters were done in the central office and in the field offices.

Training

Training for the field operations and processing was done in two phases, as follows: (1) Field Operations, and (2) Training for Data Processing.

Phase I - Training for Field Operations

Training for Field Operations and Field Editing was done in three levels, as follows:

- Task Force training. The first level training was conducted on March 7 to March 9, 2011 in Tagaytay City. Field operation procedures, technical and administrative aspects of the survey were discussed extensively in this training. It was attended by Industry and Trade Statistics Department (ITSD) Statisticians and selected IRD staff who then served as trainers for the 2nd and 3rd level trainings.
- Second level training. The second level training was conducted on March 22 to 23, 2011 in all Regional Offices, except National Capital Region (NCR), with Task Force training participants as trainers. Regional Directors, Provincial Statistics Officers, OICs, Regional Statisticians and Regional Statistical Staff (with at least SG 11) responsible for establishment surveys and Provincial Statisticians or Provincial Statistical Staff (with at least SG 13) participated in this training.
- Third level training. This training was conducted in all provinces and six districts of NCR on March 28 to 29, 2011 with participants in the second level training as trainers. One ITSD staff who attended the Task Force training was assigned to assist the 3rd level trainers in selected provinces. Participants to this training were the Provincial Statistical Staff, District Statistics Officers (DSOs), Statistical Coordination Officers (SCOs), and hired Statistical Researchers (SRs). For each NCR district three (3) Task Force Training participants were assigned as trainers

Phase II - Training for Data Processing

- Training for Manual Processing. The first training was conducted on December 9 and 10, 2011. Editing instructions and folioing were discussed thoroughly in this training. Participants were the ITSD subject-matter staff and hired statistical researcher.
- Training for Machine Processing. Data encoding, verification of error listing, completeness and summary file report were discussed thoroughly in this training. Participants to this training were ITSD subject matter staff and selected ITSRD staff.

A Workshop on Edit, Table and Format Specifications was carried out on March 17 to 19, 2012 in Antipolo City, Rizal. This was participated in by subject-matter specialists and IRD staff who were responsible in preparing standard tabulation formats, and consistency and edit specifications for the five types of questionnaires.

Field Operations

Distribution of Questionnaires

Distribution of questionnaires for the 2010 ASPBI, including that of the rider survey, was done by SCOs, Provincial Staff, and hired SRs through personal delivery of the questionnaires to the sample establishments. E-questionnaires (excel format) were also sent to sample establishments with e-mail accounts. This activity was done from April 1-30, 2011.

Collection of Questionnaires

Collection of accomplished questionnaires commenced 10 days after the distribution. The collection phase was programmed from third week of April to second week of June 2011. For regions with large workload such as NCR and Region IV-A, timetable for collection was until February 2012. Actual collection of accomplished questionnaires was extended up to April 2012 to allow more time for collection of establishments that were considered as industry leaders.

Supervision

The Regional Directors, Provincial Statistics Officers, and Regional and Provincial Statisticians conducted close supervision of collection and editing of questionnaires to ensure the quality of data and completeness of survey returns.

Receipt and Control

A Monitoring and Tracking System (MTS) was developed by IRD and adopted by field offices to keep track the distribution, collection, and transmittal of questionnaires and MTS data files. At the same time, a control list of sample establishments was made available where information on the status of the questionnaire was recorded. The MTS facilitated preparation and early submission of progress reports to ITSD since field offices can submit them electronically.

A central office version of the MTS was utilized by ITSD to monitor the distribution, collection and submission of questionnaires and MTS data files from the provincial offices to the Central Office. Consolidated progress reports and status reports were prepared regularly to inform the management and field offices on the progress of the survey operations.

Data Processing

Processing or editing of accomplished questionnaires was done to check for the completeness, validity, consistency, and reasonableness of data. It consisted of two stages: manual editing and machine processing.

Manual Processing

Manual processing of questionnaires was done in three levels, as follows:

- Field editing of data was done by the field staff, hired SRs and Provincial Staff upon collection of the accomplished questionnaire from the sample establishment. The objective is to check for completeness and consistency of entries in the questionnaire, following the instructions provided in the Field Operations and Processing Manual. Any missing data was corrected at this stage as this can be immediately verified from the respondent.
- Verification of data was done by Provincial Staff upon receipt of the accomplished questionnaires from the field staff and hired SRs to check for the completeness as well as for the consistencies and validity of entries. In some instances, the staff contacted

directly the establishments through phone call or sent email inquiries to verify some inconsistent or missing data.

- Review of accomplished questionnaires to check the consistency and reasonableness of entries and processing of consolidated reports were done by the ITSD subject-matter staff. Consolidated reports of enterprises were disaggregated at the firm level using ratios and proportions of the individual firms to enterprise. Moreover, the review process validated the status of establishments that were non-responding and reported closed, cannot be located, transferred, and out of scope. Telephone inquiry was extensively utilized to verify information from the establishment's contact person. The internet was also used to obtain information on the contact address and to research for information on the status of the establishment.

Machine processing

Machine processing consisted of data entry, validation of data, encoding of updates, generation and verification of completeness of questionnaires report, summary file report and statistical tables.

A microcomputer-based machine processing and tabulation system for the 2010 ASPBI was developed by the staff of the IRD using MySQL software. The 2010 ASPBI computer system has four modules designed for processing the survey data. These modules are the data entry, validation, export, and tabulation.

Data entry and all other machine processing activities were done by the subject-matter staff.

Imputation Procedure

Data of non-responding establishments were imputed manually and electronically based on the established imputation methods. Sources of information were from previous reports of the same establishment or from report of other responding establishment with similar characteristics, financial statements filed at Securities and Exchange Commission, and other establishment-based surveys.

Sample establishments that were either out of scope, duplicate or closed belonging in the certainty stratum were not imputed.

Tabulation

Tabulation included generation and evaluation of preliminary and final statistical tables. The statistical tables were evaluated for internal and external consistency of data.

The statistical tables were presented at the national level for all employment sizes and for establishments with TE of less than 20. For establishments with TE of 20 and over, the statistical tables were presented at the national and regional levels for all sections except for section B which is at the national level only. The statistical tables were further disaggregated by industry sub-class (5-digit) and in some cases by industry group (3-digit).

Statistical Disclosure Control

Section 4 of Commonwealth Act No. 591 requires that the data of individual business firms be kept confidential. To avoid disclosure of information of individual establishment, statistical tables do not provide information for any industry group or sub-class wherein the number of establishments is less than three. Figures relating to such industries were either suppressed or combined with those of other related industries in accordance with the guidelines on statistical disclosure control of data for establishments' survey.

Dissemination

Survey results were disseminated in the form of Special Releases posted on the NSO website, data dissemination seminars, and publication reports.

National data dissemination seminar was conducted on October 4, 2012 at Intercontinental Manila in Makati City to inform the stakeholders on the preliminary results of the survey. This was attended by selected respondents of the survey, representatives from different government agencies, and media organizations.

Regional data disseminations were also conducted from November to February 2013 by NSO Regional Field Offices. Attendees were representatives from both government and non-government organizations and some respondents of the survey who were considered industry leaders in their respective regions. Table 11 shows the list and schedule of the regional data dissemination seminars.

Concepts and Definitions

Book value is the initial value or acquisition cost of tangible fixed assets less accumulated depreciation.

Capital participation refers to the claims of individuals against capital/equity by foreign and/or local investors.

Capital expenditures refer to the cost of acquisition of tangible fixed assets, intangible assets, and non-produced assets acquired in 2010 whether or not full payments have been made. Assets received from other establishments belonging to the same enterprise are valued as though purchased.

Cost refers to all expenses incurred during the year whether paid or payable. Valuation is at purchaser prices including taxes and other charges, net of rebates, returns and allowances. Goods and services received by the establishment from other establishments of the same enterprise are valued as though purchased.

Depreciation is the total amount set aside for the year to cover the decreases in value of tangible fixed assets owned by the establishment because of foreseen obsolescence, wear and tear as a result of operation and normal amount of accidental damage.

Economic activity is the establishment's source of income. If the establishment is engaged in several activities, its main economic activity is that which earns the biggest income or revenue.

Gross addition to tangible fixed assets is equal to capital expenditures less sale of fixed assets, including land.

Inventories refer to the stock of goods owned by and under the control of the establishment as of a fixed date, regardless of where the stocks are located. Valuation should be at current replacement cost in purchaser (market) prices. Replacement cost is the cost of an item in terms of its present price rather than its original cost.

Change in inventories is equivalent to the value of inventories at the end of the year less the value of inventories at the beginning of the year.

Losses and damages refer to the decrease in the book value of tangible fixed assets due to theft, major catastrophe, and other accidental destructions.

Major alterations and improvements are done to increase the performance or capacity of existing tangible fixed assets or to significantly extend their previous expected service lives.

New tangible fixed assets refer to brand new fixed assets acquired during the year, including directly or newly imported tangible fixed assets.

Revenue includes cash received and receivables for goods/products and by-products sold and services rendered. Valuation is at producer prices (ex-establishment), net of discounts, and allowances, including duties and taxes but excluding subsidies.

Salaries and wages are payments in cash or in kind to all employees, prior to deductions for employee's contributions to SSS/GSIS, withholding tax, etc. Included are total basic pay, overtime pay, and other benefits.

Other benefits include vacation, sick and maternity leave pay, bonuses, cost of living allowances, food, uniforms, housing, commissions paid for salaried employees, commutable transportation and representation allowances, and share of catch/harvest given to employees as salaries and wages. Excluded are costs of working clothes, reimbursable transportation and representation allowances, and separation, retirement, terminal pay, gratuities, etc.

Overtime pay is payment given for extra hours worked.

Sale of tangible fixed assets refer to the actual amount received/realized (**not** book value) from the sale of tangible fixed assets during the year including the value of tangible fixed assets transferred to other establishments of the same enterprise.

Social contributions refer to payments made by the employer on behalf of the employees. Examples are SSS, GSIS, Employees Compensation Commission (ECC), Phil health and PAG-IBIG.

Subsidies refer to special grants received from the government in the form of financial assistance or tax exemption or tax privilege given by the government to aid and develop an industry.

Tangible fixed assets are physical assets expected to have productive lives of more than one year and intended for use and/or being used by the establishment. Included are land, buildings, other structures and land improvements, transport equipments, machinery and other equipments, furniture, fixtures, and other fixed assets.

Tangible fixed assets produced on own account refer to the physical assets produced by the establishment for its own use. It is valued as the cost of all work put in place, including overhead.

Taxes on products and production refer to all taxes, other than income tax, incidental to the production or sale of goods and services that are chargeable as expenses including business license, BIR stamps, real estate tax and other local taxes.

Total employment is the number of persons who worked in for the establishment as of November 15, 2010.

Paid employees are all persons working in the establishment and receiving pay, as well as those working away from the establishment paid by and under the control of the establishment. Included are all employees on sick leave, paid vacation or holiday. Excluded are consultants, home workers, receiving pure commissions only, and workers on indefinite leave.

Unpaid workers are persons working for at least one third of the working time normal to the establishment and do not receive regular pay.

Working owners are owners who are actively engaged in the management but do not receive regular pay, i.e. not included in the payrolls. Managers and directors of corporations working for pay are reported as managers.

Used tangible fixed assets refer to those that have been used previously within the country.

Value added is gross output *less* intermediate cost. Gross output for accommodation and food service activities is the sum of the total revenue (less interest income, rent income from land, dividend income, royalty income and franchise income), capital expenditures of fixed assets produced on own account and change in inventories. Intermediate input is equal to the sum of the following cost items: materials and supplies purchased; fuels, lubricants, oils and greases purchased; electricity and water purchased; cost of industrial services done by others; cost of non-industrial services done by others; goods purchased for resale; research and experimental development expense; environmental protection expense; royalty fee; and franchise fee and other cost.
