AFCs as Social Mobilization Agents

National Agricultural and Fishery Council (NAFC)

nafc.da.gov.ph

As the need arises and/or as requested by the regional AFCs based on the clamor from local AFCs and LGUs

The Program aims to determine the effectiveness of the Agricultural and Fishery Councils as agents for social mobilization – a broad scale movement to engage people's participation and make them self reliant in achieving a specific development goal. This is based on a social mobilization framework composed of five elements, namely: capacity development, networking and alliance building, advocacy, participatory M & E and IEC or behavior change communication.

Integration of the Strategic Agriculture and Fisheries Development Zone (SAFDZ) into the Comprehensive Land Use Plan (CLUP)

Bureau of Soils and Water Management

bswn.da.gov.ph

⌚ As per request of local government units

The SAFDZ are centers for the development of agriculture and fishery sectors. They are hierarchy of cluster of areas (lands or bodies of water) within a municipality. The Bureau is tasked for the proper planning of these areas considered as prime lands for agriculture and fishery wherein return of investment is favorable. Potential development of these areas will be based on crop suitability ratings. After the SAFDZ evaluation of areas, the results may be integrated into the respective municipal comprehensive land use plans.

Establishment of Soil Conservation Guided Farm

Bureau of Soils and Water Management

🕒 As per request of local government units

One of the most effective approaches to enhance agricultural production and to restore ecological balance in the most vulnerable uplands in the soil conservation guided farm. This is an integration of all matured Soil and Water Conservation (SWC) approaches and technologies in upland farming systems that include all measures involving the manipulation of land, water, and other resources suitable in the biophysical and socio-economic condition in an upland area. These conservation measures include reforestation, water impoundment, terracing, and contour farming.

Governance for Water and Sanitation

Local Government Academy
www.lga.gov.ph

🕒 Regular

Water crisis is mainly a crisis of governance. It has resulted not from insufficient water source or lack of financial and technical options but rather from failures in water governance. Consequently, LGUs have limited capacity to introduce sustainable water resources management and services and address the governance issues surrounding the establishment of an appropriate policy and institutional enabling environment. This course is aimed at giving LGUs a better understanding on water and sanitation and provides them the basis for workable reforms in many areas of water supply and sanitation geared towards effective water management. The program focuses more on enhancing LGUs competence in the various aspects of water and sanitation planning, management and project implementation.

The Local Government Academy

The Local Government Academy (LGA) was created as a national training institution that would coordinate, synchronize, rationalize and deliver training programs for local governments. It was formally organized in August 1988 as the training arm of the Department of the Interior and Local Government (DILG) to which it is attached.

The LGA is governed by a Board of Trustees (BOT) chaired by the Secretary of the DILG and four (4) members appointed by the President. An Executive Director manages the operations of the Academy.

A council of Advisers provides the Academy with advisory services. It is composed of representatives from the Academe, NGO, business sector and the leagues of government.

Its core values – Integrity, Commitment and Teamwork are instilled in every staff of the Academy. The dynamism of the fast-changing local government field is the driving force of each LGA employee. We continuously develop trainings, researches and other technical services that are mostly needed by the LGUs. We partner with other National Agencies and Local Resource Institutions because we believe that doing so, we create local partnerships for development.

Local Governance Training and Research Institutes - Philippine Network

The Local Government Training and Research Institutes Philippine Network is the country's response to rationalize and direct the capacity development efforts in local governance and to institute mechanisms towards a sustained, responsive, appropriate, transparent, accountable, and quality capacity building interventions to the local governments.

Patterned after the Local Government Training and Research Institutes (LOGOTRI) in the Asia-Pacific, the Local Government Academy of the Department of the Interior and Local Government (LGA-DILG) has facilitated its establishment on September 12, 2003 during the National Convention of Local Resource Institutions (LRIs) held in Los Baños, Laguna. A total of forty LRIs all over the Philippines took part in organizing the Network.

Since its establishment in 2003, 84 government entities, academic institutions, consulting companies, non-government organizations and people's organizations constitute the Network.

Strengthening Local Governments in the Philippines

Why is there a need for this project?

The implementation of the LG Code of 1991 paved the way towards local autonomy and providing local government units with vast powers and resources needed for the development of their communities. Despite this significant development, after more than a decade of LG Code implementation, a lot of communities (26%) are still experiencing poverty. A large number of LGUs are still striving to reach their envisioned development and reducing poverty remains to be a formidable challenge to them. Strengthening local governments will definitely contribute in addressing this dilemma.

What is the Project all about?

The project will utilize capability building as the fundamental process to facilitate genuine local autonomy and enhancing the capacities of local government units to be effective economic and service units. It will focus on the areas of local financial management, revenue generation and local enterprise development to improve LGUs' management and administrative capabilities.

The project aims to:

- Enhance the capacity of LGA as enabler and service provider for the training needs of LGUs; and
- Enhance the capacities of LGUs in the areas of local finance, resource and revenue utilization, generation and management with cross-cutting themes on gender and development and environmental protection.

Specifically, to meet the overall aim, the following will have to be carried out:

- Capability building programs that will enable LGUs to create a business-friendly environment that fosters sustainable climate for financing and investment; and
- Professionalization of public duties which will support the implementation of capacity building courses and training interventions specialized in different subjects of local governance field.

Who are our development partners in this intervention?

The Spanish Government through the Spanish Agency for International Development Cooperation (AECID) will provide financial and technical assistance in this program. Local institutions such as DILG National and Field Offices, Local Government Units in the Regions of Bicol and CARAGA, Local Resource Institutions, Leagues of Local Governments and Other Development Partners from the ODA community will play a crucial role in ensuring the attainment of the goals of this program.

Where and for how long will it be implemented?

The project will be implemented in selected LGUs in Regions V and XIII. The project will be done in 3 phases until 2010. Bicol and CARAGA were pre-identified by the development partner since they are already implementing programs on agriculture, health and education in the said areas which are mainly funded and pioneered by the AECID. This program will reinforce the delivery and implementation of the existing AECID programs in Bicol and CARAGA by focusing on the governance aspect which is deemed as a crucial area that would ensure efficiency, accountability and efficacy in terms of translating outputs into development outcomes.

What are the potential benefits from this project?

1. Institutional capacity of LGA will be strengthened to deliver the necessary capacity building interventions;
2. Local planning mechanisms will be implemented to encourage participation of all the social groups,
3. Environmental protection and gender and development will be prioritized as cross-cutting issues in the program,
4. Communication systems in the beneficiary LGUs will be enhanced; and
5. Institutional conditions of the beneficiary LGUs in financial management, public service delivery and technical capability will be improved.

How are we going to meet the intended results?

Initially, a Project Management Office (PMO), which will be assisted by a Spanish Program Director, is going to be established in LGA. In the course of implementation, a pool of multi-disciplinary local experts will be tapped to assist LGA and DILG in the implementation of this program.

The PMO will be responsible in the conduct of the following:

1. Training/ workshops for municipal authorities and civil servants;
2. Activities on citizens participation and gender equality;
3. Activities for the improvement of organizational, administrative and municipal planning systems;
4. Publications and technical assistance for the implementation of municipal communication and information systems; and
5. Strengthening of management capabilities for the improvement of municipal finances and joint revenue collection.

“Creating a business-friendly environment that fosters sustainable climate for financing and investment”
